CITY GOVERNMENT OF 1934

TOGETHER WITH THE

ANNUAL REPORTS

OF THE OFFICIALS OF THE YEAR

1933

CITY DOCUMENT NO. 45

E. L. GRIMES PRINTING COMPANY
368 CONGRESS STREET
BOSTON

AN INDEX OF THE REPORTS APPEARING
IN THIS VOLUME WILL BE FOUND
AT THE END OF THE BOOK

INAUGURAL ADDRESS BY MAYOR CHARLES A. ROSS
TO THE MEMBERS OF THE CITY COUNCIL
MONDAY, JANUARY 1, 1934

Gentlemen of the City Council:

We assemble today to organize the legislative branch of the City Government, to review the year that has passed, and to outline a program for the coming year.

The City of Quincy received its charter in 1888, and organized its first Council in 1889. I had hoped to have with us today Mr. John C. Kapples, the only surviving member of the first City Council, and it is with deep regret that I learned he would not be able to participate in these ceremonies.

It is a great pleasure for me to welcome to its duties the Council of 1934, the 46th in succession. Five of you gentlemen are assuming office, while four are continuing. I am sure you are impressed with your responsibilities.

These responsibilities have increased in far greater measure than has the growth of the city, not only to you, gentlemen, but to every member of the City Government.

It is well at this time to comment on the various measures that have been submitted by me to the City Council in 1933, and to say that all of them received the approval and support of that body.

This was due to the harmony that existed between the executive and legislative departments, a relationship which I trust will continue this year, and to that end I pledge my hearty cooperation.

Election of Auditor

One of the progressive steps of the past year was the restoration to the City Council of the right to elect the City Auditor, a policy which your Mayor has consistently advocated. The city is particularly fortunate and is to be congratulated on having the benefit of the services of the present incumbent who has been continued in office.

Welfare Department

Here in Quincy we have been faced with at least our proportionate share of the burden of relief problems. All of this was due to the ranks of unemployed being augmented by the depression. We believe, and I think rightly, that this year many more men will be placed at work in Quincy through our industries, and that our relief expenditures will be greatly reduced.

There has been a close personal contact between our relief department and the recipients of aid, with a most thorough investigation of each case. It is a matter of record that recipients have received better attention than ever before, and have been given every consideration.

Disbursements of relief, particularly through the Department of Public Welfare, have taxed the capacities of all. The Commissioner and his associates have rendered an invaluable service.

City Hall Accommodations

In order to carry on the affairs of the city we must have proper accommodations. It would be unwise to spend money on the present City Hall. Until we have a new building to adequately accommodate the various departments, it will continue to be necessary to use quarters in privately owned buildings.

Public Safety

Improvements in the departments of public safety are most desirable. In this connection I believe the Police Department can be

brought to a still higher point of efficiency through the installation of radio, and I will recommend in the annual budget that the City Council provide an appropriation for that purpose.

I believe funds should be provided this year for the construction of a new fire station, to be the headquarters of the department. Surveys show that it should be located just south of Quincy Center.

In order to anticipate the growth of the city the new station should be an eight-way building, with accommodations for an aerial ladder and a double company.

If this is done it will lead to increased efficiency in the department and will be a step toward a reduction in fire insurance rates, with saving to our citizens.

City Hospital

The City Government has approved the building of a new administration unit at the Quincy City Hospital, with utility features, to take the place of the old wooden structure still in service.

It will provide the facilities which are much needed. The transfer of many activities from the old to a new one has long been desired by the surgical and medical staffs, the Board of Managers, and those in charge of administration.

Schools

Generally speaking, school buildings of the city are in good condition, with the repairs that are desirable being made.

The request of the School Committee for increased facilities in the northern section of the city should receive the earnest consideration of the City Council.

Finance

Through prudent and economical management during the past year, the credit of the City has been reestablished. Despite the abnormal conditions of business and excessive unemployment, the administration has courageously faced its responsibilities. Advantage has been taken of every opportunity to make it possible for the property owner to meet his obligations.

Our present City Charter was drafted with a view of centralizing responsibility in the Mayor. My every effort has been to conduct the business of the city on an economical basis, without neglecting the interests and welfare of our taxpayers and the citizens of our fair city.

We have reason to believe that this year holds promise of better things, but it does not alter the fact that prudent economy must still be the watchword.

I have been constantly available for conference with the members of the City Council, who are co-directors of city affairs, and have sought their views on innumerable occasions. This practice shall be continued. I invite the hearty cooperation and assistance of your Honorable Body, also the continued cooperation of the Quincy Chamber of Commerce, and all organizations interested in the welfare of the city. And I urge the press to place the affairs of the city properly before the citizens.

The past year has been a period of great distress, and the citizens of our city have placed their faith in us. We must justify that faith, and we must go forward with our work, and with Divine Providence inspiring us, we shall be successful.

With the sincere wish that the same harmonious relations of the past year will be continued, I bid you, one and all, a Happy New Year.

CITY GOVERNMENT—1934

MAYOR, HON. CHARLES A. ROSS

DEPARTMENT OFFICIALS

COMMISSIONER OF PUBLIC WORKS, ANGELO P. BIZZOZERO.

Secretary of Board and Superintendent of Schools

JAMES N. MUIR

The regular meetings of the School Committee are held at 7:30 o'clock P.M. on the last Tuesday of each month except July.

REPORT OF THE AUDITOR

APRIL 2, 1934.

To His Honor the Mayor and the City Council:

In accordance with the requirements of the City Ordinances, I herewith submit the annual report of the financial transactions of the City of Quincy for the year ending December 31, 1933, including detailed departmental expense schedules as reported by the several departments, together with a balance sheet as of the close of the year, and various statements showing the condition of the city as of that date.

In compliance with Section 50, Chapter 41 of the General Laws, there is appended a certificate under oath with reference to the verification of cash balances in the hands of the City Treasurer and various trustees having custody of funds. During the year, bank accounts of the Tax Collector were closed out and consolidated with the Treasurer's accounts, the Collector now depositing daily to those accounts.

Respectfully submitted,

GEORGE H. BONSTALL,
Auditor of Accounts.

I hereby certify that I have verified, by actual count of the cash and verification of the bank balances, the cash of the City Treasurer, the Board of Managers of the Adams Temple and School Fund, the Board of Managers of the Woodward Fund and Property, and the Trustees of the Thomas Crane Public Library.

GEORGE H. BONSTALL,
Auditor of Accounts.

Sworn to before me this 20th day of April, 1934.

HATTIEMAY THOMAS,
Notary Public.

IN COUNCIL

Order No. 100

FEBRUARY 27, 1933.

Ordered:

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1933, and ending December 31, 1933, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, and Expenses of Water Department be paid from Water Receipts.

EDWARD G. MORRIS,
Collector of Taxes.

REPORT OF DEPARTMENT OF HEALTH

FEBRUARY 7, 1934.

To His Honor the Mayor and the President and Members of the City Council.

GENTLEMEN:—I am re-establishing the policy instituted in my report for 1927 in that this report for Health Department activities for 1933 is modelled on the scoring system adopted by the American Public Health Association. During the years 1930, 1931 and 1932 there was no such report made. Early in 1933 the score for 1932 was made out by Mr. Francis Driscoll—statistician—assisted by Mr. Alec Robertson, who was formerly connected with this department. Although this score properly does not belong here, I believe it is necessary for purposes of record.

The score is easily understood and by this method one can compare the health work of this city with all others using this scoring system. It will be seen that the numerical values assigned to each subject automatically inform one as to the more important health activities. Two are especially important—"Communicable Disease Control" and "School Hygiene."

Activities	Attain- able Points	1928	1929	1930 & 1931 score	1932	1933
Vital statistics	50	50	50	No	26	44.5
Communicable disease control	160	142	150		127.2	124.8
Venereal disease control.....	50	20	23		27	32
Tuberculosis control	90	83	80		81.4	84.6
Maternity hygiene	80	56	56		56	56.8
Infant hygiene	80	64	66		45.6	72
Pre-school hygiene	80	32	44		30.4	29.6
School hygiene	120	73	76		64.8	81.6
Milk and food control	70	49	54		55.3	55.3
Sanitation	80	53	56		52	52
Laboratory	60	43	49		45.6	46.8
Popular health instruction.. ...	40	37	38		0	27.6
Cancer control	20	2	2		1.2	3
Heart disease control	20	8	2		.40	3
	1000	712	746		612.4	714.20

It will be seen that there were gains in all subjects except Communicable Disease Control and Preschool Hygiene. The total loss in both these subjects amounted to only 3.2 points. There was a gain of 101.7 points in spite of the fact that the budget was smaller than the previous year.

The appraisal form should be looked upon as capable of presenting a reasonably accurate picture of health service actually performed in a city as evidenced by selected typical activities.

The following paragraphs will take up each one of the Health Department activities individually—along with comments that might be of interest in a report of this nature.

Vital Statistics

Statistical tables and charts have been kept of each of the locally important causes of death for the past sixty years. The City Clerk's department deserves much credit for this good score.

Communicable Disease Control

During February there was an outbreak of forty-nine cases of scarlet fever directly traced to a supply of infected raw milk from a neighboring town. This dealer delivered approximately one hundred and fifty quarts daily—mostly in the Cranch Hill district. On the same milk route were also many cases of so-called septic-sore throat and one or two cases of erysipelas. One case of erysipelas died. On account of the quick work of the health agent in the town where the milk was produced, who ordered immediate pasteurization of this infected milk supply, the epidemic was checked before it reached alarming proportions. The State Department of Health made a careful investigation of this outbreak and have added this additional milk-borne epidemic to their ever-growing list of epidemics produced by unsafe raw milk. The actual cost to the city because of hospitalization of scarlet fever cases from this epidemic was \$600.00.

There were twenty-five cases of diphtheria—one less than the year before—but the mortality rate of these cases was much higher. This is either due to a delay in receiving anti-toxin or perhaps these fewer cases were due to a more virulent organism. Almost all of these cases occurred in Quincy Point. There were no diphtheria prevention clinics during the year on account of a marked reduction in the Health Department Budget. Many newspaper articles stressing the importance of preventing diphtheria were written. The parents of every baby born in Quincy received a notice when the baby was six months old about the necessity of using toxin-antitoxin or diphtheria toxoid.

During the last of the year, however, four small clinics were run for welfare recipients only. The Health Department encourages the hospitalization of scarlet fever cases in order to cut down the number of secondary cases.

During the coming year an effort is to be made to accumulate a supply of scarlet fever convalescent serum which can be used most effectively in preventing secondary cases in the same family.

Venereal Disease Control

There was approximately a twenty-five per cent increase in visits to the Venereal Disease Clinic. The Health Commissioner and the Venereal Disease Physician are strongly of the opinion that more follow-up of lapsed cases is necessary. Until such time that this department can secure one or two trained social workers this will of necessity be impractical. The facilities for treatment in the Quincy Dispensary are wretched. Surely this city needs a newer and larger building!

Tuberculosis Control

The rapid increase in the cost of tuberculosis control is beyond question. However, the other side of the picture is that the rapid *decrease* in the cases of tuberculosis is also beyond question. In 1923—ten years ago—tuberculosis cost the City of Quincy \$14,098, in a total Health Department Budget of \$45,555. This amounted to almost 31 cents of the Health Department dollar. In 1933 the cost of tuberculosis prevention went up to \$39,395 in a total health

budget of \$77,898. This came to almost 51 cents of the Health Department dollar. I believe, however, that this is probably the peak.

No one would ever suggest that the number of tuberculous patients admitted to the sanatoria be reduced, if there are cases to be admitted, but it is unfortunate that so large a percentage of the Health Department budget goes for hospitalizing these cases. While hospitalization of these cases is of great importance, nevertheless, other Health Department activities of equal importance must necessarily suffer because of lack of funds. The waiting list for admission to the Norfolk County Sanatorium is much shorter and at times cases have been admitted with no delay whatsoever. During the year the State Department of Health carried on the "Ten Year Program" as before. In this way it is hoped to reach more and more of the childhood cases. The State Department of Labor also carried on an investigation as to the percentage of stone cutters showing "silicosis"—a condition which is very apt to encourage tuberculosis in the same individual. This investigation was done because practically all the industrial insurance companies refused to cover the stone-cutting industry.

The Norfolk Health Camp took care of 34 children as compared with 50 children during the previous year. The Ten Year Tuberculosis program in the schools will undoubtedly pick up a number of cases of childhood tuberculosis. Most of these will be able to continue in school, but steps should be taken to provide rest periods for these children at the schoolhouses. Open air classrooms are no longer considered necessary, but rest and improved nutrition are important.

Maternity Hygiene

Maternity Hygiene service in Quincy is provided almost entirely by the Visiting Nursing Association. For three years the Quincy Hospital has also managed a pre-natal clinic held in the Quincy Dispensary once a week. There should be more pre-natal cases under clinic supervision. The neonatal death rate is the lowest since 1919 (when records were first kept) and probably the lowest in the history of the city.

Infant Hygiene

Because of the fact that automobile transportation was secured for each child welfare nurse the number of nursing visits increased from 1,918 visits in 1932 to 3,755 visits in 1933. It is always cheaper to the city for their nurses to have automobile transportation because then a much larger number of visits can be made in a given time. It is poor economy to pay a nurse for a walking tour.

There was only one death among the registered babies under one year. This was from pneumonia—which certainly cannot be considered a preventable death. This record (no deaths from nutritional disturbances) shows the effectiveness of this particular phase of preventive medicine.

The West Quincy Conference, which was the most poorly attended clinic in the city, was abolished on grounds of economy. The present quarters for the Baby Conferences are about as good as can be secured. Through the cooperation of the School Department and Woodward Institute three of the conferences are now held in school buildings. There were about 250 fewer babies registered than in the previous year.

Pre-School Hygiene

The nurses' visits to the pre-school child increased from 216 to 458. On grounds of economy the Pre-school Clinic was temporarily discontinued. The attendance at this clinic was rather poor. Certainly the public should take more interest in the child's health at this period of life. An attempt will be made in the coming year to arouse interest in the "Summer Round Up" whereby each child is examined about four months before entering school and all physical defects corrected as soon as possible.

Health of the School Child

This is under the care of the School Department as far as the public schools are concerned.

Early in March, following permission of His Honor, the Mayor, a half-time nurse was appointed who devoted every morning to health work in the parochial schools. Your Health Commissioner also examined the first-grade children in each one of the three parochial schools. The commonest defect seemed to be carious teeth. This existed to such an extent that there is no doubt in my mind but that a program to preserve teeth must start during the child's pre-school life to be effective. Through the courtesy of the Speech Reader's Guild it was also possible to secure audiometer tests for the entire school population in the parochial schools. All possible hearing defects thus discovered were corrected. The school nurse carried out accurate sight tests, using the usual Snellen test types.

Unfortunately, as far as the public schools are concerned, there has been no dental program whatsoever during the year.

Food and Milk Control

As yet we have no system of scoring food establishments. With only one half-time food inspector restaurant inspection is impossible.

During the early spring of 1933 Quincy had its FOURTH MILK BORNE EPIDEMIC. There were previously three small typhoid epidemics in 1913, 1915 and 1925.

This year the city experienced a milk borne scarlet fever epidemic—in spite of the fact that there is only about one and three-tenths per cent of the milk sold in this city unpasteurized. Another striking fact is that the six months' average of the bacterial counts from the particular milk producer involved showed an average of about half of the counts of the other raw milk producers selling in Quincy. This shows the fallacy of depending upon bacterial counts as indices of the safety of various milk supplies. It also shows that the only safe milk supply for any city is one that is either completely pasteurized or one that allows only *certified* raw milk to be sold. About 85 per cent of the milk sold in the state is now pasteurized. The following cities and towns have adopted regulations preventing the sale of raw milk unless said milk is pasteurized or certified: Boston, Brookline, Newton, Dedham, Watertown, Waltham, Chelsea, Winchester, Salem, Fall River, Lexington and Ayer. The city of Attleboro has adopted such a regulation, taking effect January 1, 1934. The following extract is from the milk sanitation program of the United States Public Health Service.

"SHOULD THE HEALTH OFFICER RECOMMEND COMPULSORY PASTEURIZATION OR SHOULD HE PROMOTE PASTEURIZATION BY PURELY EDUCATIONAL METHODS?"

There can no longer be any question but that authoritative and expert opinion is almost unanimously to the effect that all milk should be pasteurized.

Tuberculin testing, while a necessary and valuable public health measure, is nearly, but never quite, 100 per cent protective against tuberculosis. Laboratory examinations of dairy employees will eliminate many typhoid fever carriers, but no bacteriologist believes that all carriers can thus be excluded from dairies. The washing and sterilization of utensils, and the sanitation of farm water and supplies and privies, are important items of sanitation, but they cannot be assumed to protect against septic sore throat organisms which gain access to the milk from the throat of an infected milker, or from an infected udder which has escaped recognition.

On the other hand, opinion, even authoritative opinion, is sharply divided as to whether pasteurization should be secured by compulsion or through education.

Many health officers are coming to adopt the method of compulsion and are urging their legislative bodies to pass ordinances requiring all milk to be pasteurized before delivery to the consumer. They take a position which has the appeal of logic, namely, that **THE PRINCIPAL VICTIMS OF INFECTED RAW MILK ARE CHILDREN WHO HAVE NOT THE POWER OF DECIDING FOR THEMSELVES EVEN IF THEY COULD BE EDUCATED WITH REFERENCE TO THE IMPORTANCE OF PASTEURIZATION.**

On the other hand, there are many health officers who feel that pasteurization should be promoted by education rather than by compulsion. This is particularly true of the smaller municipalities in which a valid fear is frequently entertained that compulsory pasteurization may lead to a milk monopoly in the hands of a single pasteurization plant. Furthermore, in many, particularly the smaller communities, there is still a widespread lack of information on the subject, and raw milk is demanded by a large section of the population. Health officers of such communities, however convinced they may personally be as to the necessity for pasteurization, may feel that they cannot afford to proceed faster than the majority of public opinion will follow, and that unless that opinion is in favor of pasteurization, stubborn insistence upon compulsion may do more harm than good.

It is believed, therefore, that the health officer may wisely undertake a campaign of education regarding pasteurization extending over a period of a year or more before attempting to secure compulsory pasteurization. After that has been done and it is found that the vast majority of opinion is in favor of pasteurization, there would seem to be no valid reason why the health officer should not attempt to bring the public face to face with the decision as to whether or not pasteurization should be made compulsory.

Finally, it is believed that every health officer should persistently recommend that all milk be properly produced, and then properly pasteurized either in a commercial pasteurization plant or at home. The health officer who has done this will occupy a defensible position when the inevitable epidemic is caused by one of the raw milk supplies, whereas the health officer who has not done this may have much uncomfortable explaining to do."

Accordingly, the Health Department passed a regulation to the effect this year forbidding the sale of any raw milk within this city unless it is certified. The scarlet fever cases from milk borne

epidemic cost the city about \$600 for hospitalization. During the year also more samples were taken from milk before pasteurization and about half as many from ice cream as in previous years, inasmuch as the comparative importance of one from the public health angle is much greater than the other. There are now only about 500 quarts of raw milk sold daily in contrast with more than 33,000 quarts of pasteurized milk.

Sanitation

There are still too many privies in one ward in this city. Rats are still a definite problem in certain areas—particularly so when one realizes that typhus fever—which is spread by the rat flea—is gradually creeping north.

Laboratory Service

The City of Quincy Laboratory is one that should not be tolerated in a city of this size. The quarters are totally inadequate and are constructed in such a way that they cannot be kept clean.

Popular Health Instruction

Much emphasis has been laid upon health instruction during the year. There has been a weekly health column in both newspapers under the heading, "Quincy's Health Officer says." There have been 84 newspaper articles—usually printed in two newspapers simultaneously. The excellent health films furnished by the Metropolitan Life Insurance Company were used nine times. Twenty-two talks were given before Women's Clubs, Mothers' Clubs and other organizations. Special articles were written for the newspapers whenever it seemed necessary. There have been quite a few groups of high school children coming into the Health Department offices seeking general information about how a modern city health department functions.

Heart Disease and Cancer Control

There has been very little done with both these problems. The first seems so closely connected with the general morale and spirit of the age that it almost seems impossible for anything to be accomplished until people go back to a calmer—less neurotic—"Mid-Victorian" way of living. With the exception of an occasional newspaper article on both subjects we can claim credit for nothing.

* * * *

In February, 1933, following the death of Superintendent Smith, the Sanitary Inspector, Howard E. Porter, consolidated both positions, thereby saving the city \$1,750. In a check up of tuberculosis settlements it was found that because of faulty settlements and omissions of subsidy claims, the city was paying unnecessarily. Four thousand one hundred and ninety-nine dollars was recovered, although some of this was legally not recoverable.

Recommendations for Improvement

1. This city certainly needs a new dispensary. In this small wooden building are held weekly:

- (1) Two Venereal clinics.
- (2) One Infantile Paralysis clinic.
- (3) Two Tuberculosis clinics.
- (4) Three Welfare clinics.
- (5) One Pre-natal clinic.

One-half of this small building is given up for the milk laboratories. If a larger, more central, building was erected it could also accommodate the offices of the Health Department.

2. Some of the staff are underpaid for the highly technical services that they render in a most efficient manner.

3. Establishment of generalized nursing service wherein each nurse could handle all the public health problems in her own district. This could not properly function without the services of a nursing supervisor.

4. The immediate purchase of two new or good second-hand automobiles.

5. Establishment of a sufficient sum in the annual budget for the running of a preventive dentistry clinic as recommended by the South Shore Dental Society and the Council of the Family Welfare Society.

This department incorporates the reports of the Quincy Child Guidance Clinic—conducted by Medfield State Hospital; and the Quincy Habit Clinic—conducted by the State Department of Mental Hygiene—because in this way one can get a clear idea of all the public health activities in Quincy.

During the year the Health Department suffered the loss from death of the Superintendent, Thomas Smith. For years he has worked faithfully and patiently—oftentimes under great handicaps, and never complained.

Miss Mary Keeley resigned to get married. She had given devoted service to the department for eight years as Tuberculosis nurse.

For all the cooperation and assistance that the Health Department has received, I should like to thank the State Department of Health, the Quincy Visiting Nurses, Quincy Physicians, Quincy School Department, the South Shore Dental Society, both the "Quincy Patriot Ledger" and the "Quincy Evening News" and the president and members of the City Council. I particularly wish to thank Mr. Alexander Robertson for his continued interest in the work of this department.

During the writer's experience Mayor Charles Ross has shown a much greater interest than any previous mayor in the work of the Health Department. The employees of the Health Department have been most loyal and interested in their work.

I feel that I can close this report with no more fitting statement than a statement from the American Public Health Association which I might adopt as the motto of the Quincy Health Department—"Our permanent objective is the effective control of preventable disease, and the security of health for all people."

Very truly yours,

E. B. FITZGERALD, M.D.,
Health Commissioner.

REPORT OF STATISTICIAN

JANUARY 1, 1934.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR SIR: I hereby submit the following report for the year 1933:

List of Causes of Death
Mortality Statistics
Communicable Disease Morbidity and Mortality Rates
for 1933
Some Comparative Morbidity Rates
Some Comparative Morbidity Cases
Reportable Diseases by Wards
Reportable Diseases by Months
Classification by months of deaths from important
communicable diseases
Infant Mortality
Corrected Birth Rate for 1933

All the facts and data for the graphs and charts in this report were computed and compiled by me, but the actual drawing of these graphs was done by Mr. Howard E. Porter, the Sanitary Inspector. The routine statistics during the year were among my duties.

Mortality Statistics

In 1933, 682 deaths occurred in Quincy. Based on the estimated population of 79,730 on July 1, 1933, the general death rate for the year was 8.6 per 1,000 population. Corrected for residents and non-residents, 748 residents who died give the city a "resident" death-rate of 9.4 per 1,000 population. Of these 682 deaths, 342 or slightly more than 50 per cent were males, while 403 or 59.9 per cent were native born.

The largest number of deaths in any one month occurred in January, when there were 77, the next largest in February, when there were 69. The fewest deaths (per month) came in August when 28 were registered.

DISEASES OF THE CIRCULATORY SYSTEM—This type of disease created a death rate of 24.8 per 10,000 population. Myocarditis, which caused 103 deaths (42 men and 61 women) was the chief contributor to this highest specific death rate.

DISEASES OF THE RESPIRATORY SYSTEM obtained a mortality rate of 10.3 per 10,000 population. Lobar pneumonia caused 40 deaths and Broncho-pneumonia accounted for 36, a combined total of 76, a rate of nearly one death per 1,000 population.

CANCERS OF ALL KINDS caused 79 deaths in 1933, for a rate of approximately one per 1,000 population.

DISEASES OF THE NERVOUS SYSTEM brought 77 deaths for a rate of 9.7 per 10,000 population. Of these 77 deaths, 68 (over 90 per cent) were caused by cerebral hemorrhage, cerebral embolism, thrombosis and apoplexy.

DISEASES OF THE GENITO-URINARY SYSTEM accounted for 63 deaths with a mortality rate of 7.9 per 10,000 population. Acute nephritis and chronic nephritis combined caused 59 deaths, more than 90 per cent of the deaths from this type of disease.

VIOLENT AND ACCIDENTAL DEATHS in 1933 numbered 52 for a rate of 6.5 per 10,000 population. Included in this group were 5 suicides, 2 homicides and 45 accidents (one of which was ill-defined). Automobile accident deaths for 1933 numbered 12 for a rate of 15.4 per 100,000 population.

INFECTIOUS AND PARASITIC DISEASES brought a mortality rate of 6.3 per 10,000 population. (Rates for specific diseases will be found in another part of this report.)

DISEASES OF THE DIGESTIVE SYSTEM caused 25 deaths with a rate of 3.2 per 10,000 population. Among the 25 deaths were 9 from appendicitis, 1 from diarrhea (child under 2 years old), 1 from gall stones and 1 from cirrhosis of the liver.

DISEASES OF EARLY INFANCY brought 20 deaths to Quincy for a rate of 2.5 per 10,000 population. Fourteen prematurely-born babies were numbered in this group and one died from an injury at birth.

The 5 deaths occurring from diseases of the Puerperal State all took place at home.

THE INFANT MORTALITY rate, corrected for residents and non-residents in 1933 was 47.6 per 1,000 live births, a jump over the previous year when the rate was 36.7 per 1,000 live births.

The corrected birth rate for Quincy in 1933 was 14.2 per 1,000 population, a loss since 1932, when the corrected birth rate was 20.7 per 1,000 population.

Very truly yours,

FRANCIS C. DRISCOLL,
Statistician.

REPORT OF CONTAGIOUS DISEASE NURSE

JANUARY 1, 1934.

EDMUND B. FITZGERALD, M.D., *Health Commissioner.*

DEAR DOCTOR: I herewith submit my annual report as contagious disease nurse for the year ending 1933.

One thousand two hundred and fifty-six cases of notifiable diseases were reported as follows:

Scarlet fever	547
Chicken pox	278
Whooping cough	158
Measles	55
Dog bite	78
Diphtheria	25
German measles	12
Mumps	20
Lobar pneumonia	54
Anterior poliomyelitis	9
Septic sore throat	7
Typhoid fever	3
Influenza	4
Cerebro-spinal meningitis	1
Encephalitis lethargica	1
Ophthalmia	2
Mumps—Meningitis	1
Amebic dysentery	1
Total visits	2,762
Nursing visits	2,695
By other nurses	67
Scarlet fever	2,149
Whooping cough	205
Diphtheria (cultures, 159)	129
Measles	101
Anterior poliomyelitis	109
Typhoid fever (cultures, 18)	43
Venereal disease	22
Streptococcus laryngitis	4

Scarlet Fever

Five hundred and forty-seven cases reported as compared with 211 in 1932. Of this number 76 cases were hospitalized at the Haynes Memorial Hospital in Brighton. There were four deaths. Three died in the hospital, and one case died at home.

Diphtheria

There were 25 cases reported, 10 cases were hospitalized. Four deaths occurred from this disease. Three died in the Brighton Hospital and one child died at home.

In co-operation with the Welfare Department three clinics for immunization were held during December, 1933, at the Quincy Dispensary. Twenty-five children received the three treatments, 17 were of pre-school age and 8 were of school age.

Measles

Half as many cases reported as in the previous year.

Typhoid Fever

Three cases reported, two of which were cared for at the Quincy Hospital. One case placarded at home.

Whooping Cough

Four cases of the total number reported were hospitalized. One death occurred at home.

Anterior Poliomyelitis

Nine cases reported, two cared for in Quincy Hospital and one was sent to Brighton Hospital. One death in the hospital. During August, 81 visits were made in the follow up work to contact people who had the disease to obtain donors of blood at a clinic at the Dispensary. This was done in co-operation with the State Department of Health.

Fifty-eight various clinics were attended during the year.

In the follow up work, 2,762 visits were made, including placarding, checking up of quarantine rules, taking of cultures, examination of contacts and releases from quarantine.

Office hours were held daily from 9-9.30 A. M. and 1-1.30 P. M.

Respectfully submitted,

CATHERINE F. COLEMAN, R.N.,
Contagious Disease Nurse.

REPORT OF THE VENEROLOGIST

JANUARY 1, 1934.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—The figures for the two clinics show an aggregate increase of 25 per cent over the figures for 1932, which in turn were double those of 1931.

Male Clinic

Treated for gonorrhœa (patients)	31
Referred to private physicians	8
Discharged cured	6
Remaining under treatment	17
Visits for treatment for gonorrhœa	322
Contacts examined	10
Treated for syphilis	38
Discharged arrested	4
Died	1
Referred to private physicians	3
Remaining under treatment	30
Visits for treatment for syphilis	664
Total visits by males	990

Female Clinic

Treated for gonorrhœa (patients)	8
Visits for treatment for gonorrhœa	32
Contacts	22
Treated for syphilis	17
Left town	3
Remaining under treatment	14
Visits for treatment for syphilis	480
Total visits by females	553

Respectfully submitted,

EDWIN E. SMITH, M.D.

REPORT OF DISPENSARY PHYSICIAN

JANUARY 1, 1934.

EDMUND B. FITZGERALD, M.D., *Health Commissioner.*

DEAR SIR:—Clinic records of the past year reveal that Tuberculosis is still increasing in the City of Quincy and this increase will probably continue during the depression. However, the surgical procedures now being used for lung collapse are very efficient in preventing the spread of the disease and the outlook is now better than at any time in the history of the fight against Tuberculosis.

However, there is still much time and money needed to educate the public and the community, for the two fundamental factors in overcoming Tuberculosis are early diagnosis and early hospitalization of the disease.

At the present time, municipal clinics are the most efficient means of spreading this education. How well this is being done in Quincy is manifest from the great increase in registration and attendance during the past year.

The total adult attendance in 1932 was 373. Total adult attendance in 1933 was 833. Registration of the adult clinic in 1932 was 133. Registration of the adult clinic in 1933 was 329. Another encouraging sign in our clinic work is the increasing number of physicians making use of the clinic for diagnosis and disposition of their Tuberculosis patients. If all physicians would immediately turn over their indigent cases to the clinics, I believe better work would result in finding and classifying contacts.

At present too many cases are reported either for the first time by death certificate or some few months previous. This not only produces poor vital statistics, but also causes unnecessary spread of Tuberculosis.

With the great increase in attendance of the adult patients during the year, there was also a great increase in X-rays taken, tuberculin skin tests and focal infections corrected. There was over 100 per cent increase over the preceding year.

The clinic has suffered a great loss in the resignation of Miss Keeley, one of the two efficient Tuberculosis nurses. Both Miss Russell and Miss Keeley have proved themselves very competent in the department. Both nurses have natural qualities for public health nursing and participated with honors in a post-graduate extension course in Public Health given by New York University during the past two years.

I trust the nurse appointed to fill the vacancy in the Tuberculosis Department, caused by Miss Keeley's resigning, will prove equally efficient.

Undernourished and Children's Contact Clinic

This clinic is in a very flourishing condition in Quincy. It is increasing at the rate of 10 to 15 per cent a year and now has passed the 2,000 mark in yearly attendance. This contact clinic is probably the most important factor in the prevention of the spread of Tuberculosis. Here early diagnosis is possible, and cure of infected cases practically assured. Also, discovering the case in the child, it is an easy matter to go into the home and probably find an active Pulmonary case which is the source of the trouble. Thus one can attack the problem in a comprehensive manner and stop the spread of the disease.

The clinic has also a great educational value. The parents come to the clinic with the children and thus you can teach precautions in general hygiene to the whole family.

The money the city spends in this prevention clinic is well repaid in health dividends. Also the taxpayer directly benefits in diminishing county assessments.

As in the past several years, I again strongly advise that this clinic idea be incorporated in the schools as a compulsory part of their health program. Many cities—at very little expense—have undernourished classes and rest periods for these children and much good results. Also it saves “repeats” amongst the children and here again the taxpayer is benefited.

Camp Norfolk

We were able to send only 34 children to camp during the past year. This was due to the cutting of the usual \$2,000 appropriation to \$1,000. From both an economical and a health standpoint this is poor policy.

The usual \$2,000 not only gives direct health benefits and assurance to some 50 children, but indirectly aids the morale of the Undernourished Clinic. More children and parents attend the clinic because they hope to have their children sent to camp. Hence, more preventive education can be spread among more families. In a word, the whole success of this prevention clinic is closely allied to the success of Camp Norfolk. I trust that the usual \$2,000 will be appropriated and continued.

Respectfully submitted,

C. J. LYNCH, M.D.

REPORT OF DISPENSARY NURSES

EDMUND B. FITZGERALD, M.D., *Health Commissioner.*

DEAR DOCTOR:—We herewith submit to you our annual report for the year ending December 31, 1933.

At home attending school under supervision	3	
"Disposition of new T. B. other cases"		
Reported to the Health Dept. by death certificate	2	
Admitted to sanatoria	4	
At home under supervision	1	
Moved away	1	
Total number of "adult" clinics held		49
Total attendance	833	
Total registration	329	
Number of T. B. skin tests done (Mantoux)	130	
Positive reactors	80	
Negative reactors	50	
Number of adults X-rayed		162
Contacts X-rayed	93	
Non-contacts X-rayed	69	
Contacts examined	152	
Non-contacts examined	681	
These X-rays include new clinical cases and ex-sanatoria cases.		
Total number of "Minimal" pulmonary tuberculosis cases reported		3
Two cases have been admitted to sanatorium.		
One on waiting list for sanatorium.		
One case was referred to the M. G. H. for the Lipiodol Test and was negative.		

Total number of deaths for the year	37
Died at the Wellington Home	1
Died at the Quincy City Hospital	8
Died at home	14
Died at the Veterans' Hospital	1
Died at Norfolk County Hospital	12
Died at Tewksbury State Infirmary	1

All ex-sanatoria cases that can be located are visited regularly by the dispensary nurses—attention being emphasized on re-examination and X-rays. All private cases are followed through the family physician. All new cases are visited only by permission of the physician reporting the case. On these home visits—we give instructions to patient and family regarding precautions (sputum boxes being provided the patient through the health department free of charge)—so that further spread of the disease may be checked. When possible we bring all contacts to the dispensary for physical examination, T. B. skin test, and X-ray. This examination is also done by permission of the attending physician. A copy of our findings is sent the physician. All of our cases are X-rayed at the Norfolk County Hospital on Tuesday mornings at 9.30. The nurses transport these cases. All homes are visited after a death from tuberculosis and instruction given for care of bedding and dishes, etc., and a careful check-up is made to have all contacts examined regularly.

"Undernourished and Contact Children's Clinic"

Total number of clinics held	52
Attendance at clinic	2,021
Registration at clinics	587
Number of contacts examined	759
Old contacts	661
New contacts	98
Cases referred to the Q. C. H. for T. and A.	72
Cases referred to Dr. Harkins (ear)	3
T. B. skin tests done	297
Positive reactors	66
Negative reactors	231
Number of children X-rayed	140
Contacts	97
Non-contacts	43
Total number of children sent to Camp Norfolk for 8 weeks	34
Boys from 8-13 years	14
Girls from 8-13 years	12
Girls from 14-18 years	8

These children were carefully chosen by Dr. Lynch, our dispensary physician (family history, per cent underweight, T. B. skin test, physical examination), and were sent to Dr. Pillsbury (superintendent of the Norfolk County Hospital and Camp Norfolk) for X-ray, where final decision was made as to their fitness for camp. As nearly as possible, all children going to camp had the necessary dental work done, and infected tonsils and adenoids removed, so that every possible chance of drawbacks from focal infection could be guarded against.

Total number of sputum examinations made	174
Total number of visits to and in behalf of patients	2,539
Total number of visits to contacts made	1,741
Total number of visits to preventorium cases	309

Total number of visits to post sanatorium cases....	489
Total number of cases hospitalized during the year (adults)	50
Total number of cases hospitalized (children under 12).....	14

“Norfolk County Hospital”

Total number of cases admitted during the year	47
Total registration of cases during the year	98
Total registration of cases at the end of the year	64
Condition of patients on discharge from the sanatorium:	
“Arrested” cases	10
Left against advice—“Improved”	3
Left against advice—“Unimproved”	6
Discharged “dead”	12
Discharged “non-tubercular”—(sent in for observation)	1
Discharged—“own request”—quiescent	2
One case left against advice and was readmitted to stay.	
One case admitted twice and left twice against advice.	

“North Reading State Sanatorium for Children”

Cases admitted during the year	16
Total registration during the year	21
Total registration at end of the year	11
Condition of patients on discharge from sanatorium:	
Discharged against advice “unimproved”	2
Discharged apparently “arrested”	5
Discharged well—malnutrition—but no T. B.	2
Discharged improved from lung abscess	1

“Westfield State Sanatorium for Children”

Cases admitted during the year	2
Total registration during the year	5
Total registration at end of the year	5
No cases were discharged during the year.	

Massachusetts State School for Crippled Children—“Canton”

One case registered (T. B. knee) from Quincy.

Lakeville State Sanatorium for T. B. Other Cases

Cases admitted during the year	5
Total registration during the year	9
Total registration at the end of the year	8
Condition of patients on discharge from sanatorium:	

Only one case was discharged during the year, this case having made a remarkable recovery from T. B. spine.

“Plymouth County Sanatorium”

1 case admitted from Quincy (pulmonary).
 1 case referred to sanatorium having settlement in Plymouth County.

“Tewksbury State Infirmary”

Cases admitted during the year	6
Total registration during the year	9

Total registration at end of the year	3
Total number cases discharged during the year	5
1 case died.	
3 cases transferred to N. C. H., having been admitted from the Quincy City Hospital.	
1 case discharged home.	

Rutland State Sanatorium

1 case was admitted during the year and left against advice, "un-improved."

Rutland Veterans' Hospital

All cases admitted are handled through the Veterans' Bureau.

Wallum Lake, Rhode Island

1 Quincy case is at this sanatorium.

Respectfully submitted,

GERTRUDE T. RUSSELL, R.N.,

MARY E. KEELEY, R.N.,

Dispensary Nurses.

REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 31, 1934.

DR. EDMUND B. FITZGERALD, *Commissioner of Health, Quincy, Mass.*

DEAR DOCTOR FITZGERALD: It is my privilege to submit to you the report of the Child Welfare Clinics of Quincy for the year ending December 31, 1933.

Statistics

Total Clinic Registration	1,571
Well-Baby Clinics	1,208
Preschool Clinics	169
Orthopedic Clinics	194
Number of Clinics	225
Well-Baby Clinics	205
Preschool Clinics	7
Orthopedic Clinics	13
Total Clinic Attendance	8,543
Well-Baby Clinics	8,142
Preschool Clinics	92
Orthopedic Clinics	309
Total Home Visits by Nurses	3,792
Babies	3,012
Preschool Children	458
Boarding Homes	322

A more detailed account of these figures appear in the reports of the Child Welfare Nurses and the Orthopedic Clinic report.

There have been 143 fewer clinics held in the city this past year and less than half as many as in 1930. In the interest of financial economy the weekly Preschool Clinic was discontinued in March, 1933; West Quincy Baby Clinic in February, and the Orthopedic Clinics reduced to one each month. In spite of the reduction in the number of Clinics, and the decrease in registration of 249 this year, the attendance has decreased only 15. Babies and children previously attending the Clinics which have been discontinued have transferred their registration to the Clinic in another Ward.

The work of the nurses in home visits has almost doubled: 1,859 more visits were made than in 1932. The adequate transportation service which was provided the nurses in March has made this possible.

Comparison of Clinic Statistics for Past Seven Years

Year	Registration	New Enrollments	Attendance
1927.....	1,752	622	7,047
1928.....	2,130	693	7,293
1929.....	2,783	652	6,795
1930.....	2,887	717	7,145
1931.....	2,826	992	8,257
1932.....	3,133	846	8,218
1933.....	2,275	798	8,543

References of Children

During the year 259 children have been referred by clinic doctors and nurses to the care of local physicians. This is about 50 less than last year, but practically the number referred in years previous to 1932. The general health of the clinic children has been remarkably good this past year. The fact has been commented upon both in the summer season when there were no severe digestive disturbances among the clinic babies, and again this winter season when the incidence of severe respiratory infection up to this date has been noticeably small.

Volunteer Help and Acknowledgments

During the past year the Clinics have been fortunate in having the help of excellent volunteers. Members of the Junior Welfare League of Quincy have attended the Clinics at Wollaston and Quincy Centre regularly each week. Their faithful and efficient help as recorders and in providing interesting occupation for the children in the waiting room has been much appreciated.

The Atlantic Clinic has continued to enjoy the benefits of Miss Alice G. Thompson's volunteer service. Miss Thompson's ability and interest in keeping the clinic records for the past three years has contributed much to the efficiency of the Clinic.

Members of the Wollaston Woman's Club have been generous in attending the Wollaston Clinic and assisting the nurses in recording the weights of babies.

It is pleasing, as well as helpful, to receive the support of enthusiastic volunteers, and we thank them for their continued interest.

Acknowledgments

Mrs. Nettie D. Fowler, R.N., and Miss Mary Marr, R.N., as executives, continue to conduct the clinics with quiet efficiency, and their contacts in the homes in the interim between the clinic visits have made a strong unity in the service of the Child Welfare program.

The nurses have been alert to the problems created in the homes by economic distress this past year. The generosity of several large manufacturing chemists has been of great practical helpfulness. Their gifts of cod liver oil and viosterol and vitamin B containing foods have in several instances averted the necessity of depriving children of these essential vitamins. As far as we are aware, there are no children in our active clinic registration who could be classified as having malnutrition, or who have been receiving less than a minimum requirement of basic food substances.

The privilege of holding the clinics at Woodward Institute, the City School Buildings at Quincy Point and Hough's Neck, Italian Hall at South Quincy, and at the North Quincy K. of C. Hall has been especially appreciated.

For cooperation and actively helpful interest in the Child Welfare work, may I thank you, as Commissioner of Health, and the other members of your Staff and personnel of the Health Department.

Respectfully submitted,

RACHEL L. HARDWICK, M.D.,
Child Welfare Physician.

REPORT OF CHILD WELFARE NURSES

JANUARY 1, 1934.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—The following is the report of the Child Welfare Nurses for 1933:

Registration January 1, 1933	1,457
Registration January 1, 1934	1,208
New babies registered during year	818
Moved or discharged over age	407
Referred to physicians	9
Referred to pre-school clinic (later discontinued)	169
Child Welfare conferences were held in all wards, with the exception of West Quincy, from 2 to 4 P. M. on certain days. The Wollaston conference was held in the morning. The pre-school clinic was discontinued March 6, 1933. There were four deaths among babies registered at the clinic. Only one of these was a baby under one year. Two were from drowning and two from pneumonia.	
Visits to babies under 1 year	1,957
Visits to babies between 1-2 years	1,055
Visits to pre-school children	458
Post-natal visits	110
Visits to 12 licensed boarding homes	101
Visits to 8 unlicensed boarding homes	74
Temporary boarding homes found	37
Referred to family dentist	33
Referred to welfare dentist	17
Referred to local physicians	209
Referred to Quincy City Hospital	15
Referred to venereal clinic	1
Referred to Massachusetts Eye and Ear Infirmary	1
Referred to Boston Children's Hospital	8

Clinics

Days	Stations	Attend- ance	New Cases	Attendance Increase or Decrease
Mondays	South Quincy	1,452	107	2% decrease
Tuesdays	Wollaston	1,594	147	20% increase
Tuesdays	Houghs Neck	469	50	19% decrease
Wednesdays	Quincy Point	1,306	104	4% increase
Thursdays	Quincy Centre	1,653	155	11% increase
Fridays	Atlantic	1,622	133	3% increase
Fridays	West Quincy	46	5	Discontinued Feb., 1933
Totals		8,142	701	
Orthopedic	Woodward	309	95	Conferences held only once a month instead of twice since January
Pre-School	Woodward	92	22	Discontinued Mar., 1933
Totals		8,543	818	

The attendance for 1932 was 8,558, so there was only a very slight diminution in the number of visits. It is hard to explain

the variation in attendance at the various clinics. In past years some of the clinics that show a marked increase this year had shown an equally marked decrease and vice versa.

We wish to extend our sincere thanks and appreciation for assistance and co-operation of the Wollaston Woman's Club, Junior Welfare League, Family Welfare Society, Visiting Nursing Association and the local physicians during 1933.

To Doctors Hardwick and Gorin we extend our thanks for their extreme patience and courtesy during a very busy year. We must not forget to mention the kindness of a volunteer who has assisted us for the past few years without remuneration.

Very truly yours,

NETTIE D. FOWLER, R.N.,

MARY E. MARR, R.N.,

Child Welfare Nurses.

REPORT OF ORTHOPEDIC CLINICS

JANUARY 31, 1934.

DR. EDMUND B. FITZGERALD, *Commissioner of Health, City Hall, Quincy, Massachusetts.*

DEAR DOCTOR FITZGERALD: The report of the work in the Orthopedic Clinics during the year 1933 is as follows:

There have been eleven clinics—one held each month except during August; 260 children have been examined—95 were new admissions, 165 for follow-up examinations.

Classification of Conditions Found in the New Cases

Healthy child—Shoe advice	16
Pronated feet	31
Pronated feet and knock knees	15
Bow-legs	12
Faulty posture in school age child	3
Retarded musculature development	4
Pronated feet and mild rickets	2
Bilateral Köhler's	2
Congenital contracture 5th toes	1
Abnormality of toe nail	1
Injury left foot	1
Club-foot	1
Infantile paralysis—Varus foot	1
Synovitis left knee	1
Brachial palsy—left	1
Congenital contraction 5th toes associated with pronation....	1
Pseudo-hypertrophic muscular dystrophy	1
Dislocated hip	1

Classification of Conditions Found in the Routine Follow-Up Examinations

Pronated feet	138
Pronated feet and knock knees	10
Bow-legs	5
Generalized muscular atony	2
Congenital forefoot adduction	2
Flexion contraction of 4th toes	1
Torticollis	1
Upper abdominal hernia	1
Corrected club foot	1
Bilateral cavus	1
Contracted heel cord	1
Routine check-up examinations on health child.....	2

Comparative Figures 1927 to 1933, Inclusive

Years	Number of Clinics	Visits	New Cases	Follow-up Examinations
1927.....	8	125	89
1928.....	12	164	91	73
1929.....	14	210	96	114
1930.....	14	250	95	155
1931.....	22	395	132	263
1932.....	22	410	106	304
1933.....	11	260	95	165

A review of the classification of the conditions found in these children reveals a large number of correctable orthopedic deformities.

Much of the satisfaction in the follow-up of the children who have been attending the clinics lies in the fact that permanent deforming or disabling conditions are prevented and corrected.

The success of this clinic is due to the interest and cooperation of the Child Welfare Physician, the nurses in attendance at the clinics, and the mothers who report regularly for advice.

Respectfully submitted,

(Signed) M. G. KATZEFF, M.D.,
Orthopedist.

REPORT OF QUINCY HABIT CLINIC

Nineteen thirty-three marks the close of the seventh year of the Quincy Habit Clinic and one observes a larger attendance during this interval than in any of the preceding years. In addition to a marked increase in the number of cases dealt with, there has also been encouraging progress noted in the community's appreciation of the aim and purpose of the clinic. This fact has facilitated the program in such a manner as to not only benefit the individual patient but has also made it possible to demonstrate the importance of a mental hygiene approach to general community problems.

An earnest attempt has been made to fully appreciate the mental hygiene needs of Quincy and we have endeavored to meet them, taking special care to avoid having a service become routinized or perfunctory and always looking to other agencies that bear a responsibility in the rearing of children for opportunity to inspect our mutual problems in terms of the individual child. Our fundamental premise has been that improvement in our psychotherapy, social therapy and educational methods can only be effected with continued study of the individual child and the influence his environments are having on him.

The program has not differed markedly in its general outline from that of the previous year in that its two main objectives have been firstly to conduct a weekly clinic where attention has been addressed to personality and behavior problems of the younger child, and secondly, to conduct general educational programs in the community. These met a requirement for information regarding the nature of the work done by the clinic and also about problems of child guidance and other specialized subjects in mental hygiene.

In discussing the clinic activities, we find three questions invariably asked, namely, the types of problems dealt with at clinic, sources from where these children are referred, and the form of treatment given. The answers to the first two questions will be found in the statistical appendix to this report. The answer to the third can only be given in a general way since it would be impossible in a report of this kind to discuss comprehensively the subject of treatment. This involves consideration of the social, psychological and psychiatric technique, and it would necessitate the presentation of a number of cases in order to provide a satisfactory picture. However, it is possible to give a picture of the general procedure.

Cases are accepted without selection in respect to the social, economic, racial or any factors other than behavior. All of the cases under treatment are those having at least average intelligence. The Habit Clinic has directed its attention primarily to the problems of the so-called normal and superior child (as regards intelligence) since there are other agencies that bear the responsibility for the mentally handicapped child. However, it occasionally happens that a defective child is referred to the clinic for diagnosis and recommendations, in which instance the request is fulfilled. The case is then referred to those organizations whose attention is addressed toward the problem of mental deficiency. Although the clinic has not concerned itself with the problem of mental retardation as such, it has, however, assisted in meeting mental hygiene problems which have arisen in families where one child, because of his intellectual handicap, has been the cause of a destructive

attitude in the parents that is not conducive to the welfare of the other children in the family. This, as well as similar problems arising in like situations, has been dealt with by the clinic.

The study of the child begins after a careful physical examination has been made, since problems of physical hygiene, of disease or physical defect must be considered in any psychiatric program to be outlined. In cases where physical factors are accepted as primarily causative in the production of a particular problem for which the child was referred, the clinic may withdraw in favor of a medical program. In many cases, the medical investigation goes hand in hand with the psychiatric.

The physical examination is followed by a social service investigation conducted by a psychiatric social worker and comprises as complete a picture of the child's life as is practicable, from the time of his birth up to the date of his visit to the clinic, and includes all available information regarding the home; namely, family background, parent-child relationships, as well as relationships with other members of the household; his school adjustment, teacher-child relationship, and so forth. In this same manner, as full a picture as possible is obtained of his play life and his adjustment to the group.

Every child is given a psychological examination during which the psychologist attempts to ascertain information regarding his intellectual capacity, also any special abilities or disabilities he may have. School achievement tests are given if a need is indicated—which is oftentimes a requirement in cases where a school difficulty is the main problem revealed. The psychological tests contribute significant leads in the study of most of the clinic cases.

The psychiatrist acquaints himself with each child, and the above collected data. The psychiatric examination may vary from mere observation of the child's behavior to more intensive exploration of his inherent drives, interests, attitudes and relationships to those about him. This is determined by the child's age, the problems presented, and other factors. In younger children whose difficulties for the most part are but symptoms of a situational problem, investigation and treatment are directed more to the parents and the situation as a whole than to the child.

Every case is reviewed and interpreted in the light of the information at hand, and each staff member participating in it makes his contribution. Treatment is then formulated and directed by the psychiatrist, with the assistance of the social worker and others who are interested and in a position to be of assistance.

Treatment varies with the individual case and is so highly individualized as to preclude a complete and satisfactory presentation of it in a report of this kind. A large part of the therapy resolves itself into the problem of parental education along the lines of child management. There are other instances in which treatment involves not only psychotherapy for the parent or parents but also reconstruction of the whole environmental situation. In this direction, our social service staff has been much interested in attitude therapy, and the members of this staff have applied it in some cases with encouraging results. Because of the pressure of the work but few cases could be treated in this intensive manner, because of the time involved. Treatment procedures can be briefly and perhaps more satisfactorily portrayed by means of the following listing:

1. Direct information and advice to parents, teachers and others responsible for the guidance of the child.

2. Psychotherapy directly with the child.
3. Psychotherapy with the parents.
4. Social therapy conducted by the social worker in her contact with the home.
5. Changing of pedagogic procedures necessary for the specific needs of the child (frequently seen in children who are problems to the school by reason of incorrect placement in the grades).

Any one or more of the above approaches to the child's problem may be utilized by the staff members, always in cooperation with the school or other agencies interested.

Study and treatment of clinic cases in practically all instances involves considerable contact with the child or his associates (parents, teacher, etc.) outside the clinic. This means the social worker frequently makes visits to the home for purposes of further observation, or she may contact other individuals, leaders in recreational or cultural interests, in attempting to provide or create supplementary opportunities in the form of social or recreational outlet for the child. If these are not available, she may undertake to supply them herself by taking the child or a group of children, as the case may be, on an outing to a museum or other place of interest.

The chief objectives in the educational aspect of the clinic's program have been:

1. To interpret the work of the clinic to the community.
2. To encourage further interest in the problems of child guidance.
3. To stimulate parental interest in the mental aspect of the child's development.

We realize that now, as always, parental attitudes have a tremendous influence in the shaping of children's behavior patterns and when these attitudes are warped, as they are prone to be by the worries and frustrations produced by the present economic conditions, parents need help more than ever to assist them in maintaining a wholesome, healthy attitude and constructive perspective toward their children.

There has been developed in Quincy a form of interrelationship and cooperation between the Habit Clinic and the schools. This has very much aided the clinic in its work with school children, making it possible to give a more efficient service than would probably have otherwise been practicable. This was done through monthly meetings attended by principals, teachers and members of the clinic staff. At these times there were mutual discussions regarding the various school children who had been seen at clinic during the month. These conferences have made for a clearer and fuller understanding of the individual child and a better opportunity for the most effective program of treatment was provided.

It has been felt for some time that a problem of occupational therapy might be utilized as a supplementary measure to the regular clinic service by fulfilling a two fold function; namely, as an aid in studying the personality of the child, to ascertain the presence or absence of such traits as leadership, domination, resourcefulness, ingenuity, manual dexterity, and so forth; and secondly, as an adjunct to a psychotherapeutic program. This procedure has been tried with encouraging results in another clinic and it is hoped that arrangements may be made whereby it will be possible to carry out a program of this sort at the Quincy Clinic this coming year.

The Commissioner of Health of Quincy has keenly and seriously appreciated his responsibility for leadership in organizing resources for promoting a child welfare program in the city. He has been most helpful in interpreting the Habit Clinic to other health agencies and his interest has brought about a cooperative service between the Habit Clinic and other children's clinics operating in the city who now understand the aim, the treatment potentialities and the resources within the clinic for dealing with problem children.

Infantility	Pre-psychotic tend
Inferior makeup	Restlessness
Jealousy	Running away from home
Over-suggestibility	Truancy
Temper tantrums	Unpopularity
Environment	Vocational and educational adjustment
Abusive father	Wayward tendencies

The year just ended is the fourth of this Clinic in Quincy. Owing to the discontinuance of the Home-Making School in September of this year, the Clinic is now being held in the Coddington School through the courtesy of the public school authorities. Time—each Thursday at 2.30 P. M., except during July and August and other school holidays.

Respectfully submitted,

(Signed) GRACE T. CRAGG,
Psychiatric Director.

REPORT OF MILK INSPECTOR

JANUARY 1, 1934.

DR. EDMUND B. FITZGERALD, *Health Commissioner.*

DEAR SIR: I herewith submit my report for the year ending December 31, 1933.

The following statistics refer to milk, cream, ice cream, oleo-margarine and buttermilk, produced and consumed in Quincy.

Dairies in City of Quincy

1 cow	10
2 to 6 cows	4
30 to 44 cows	2
Total number of cows in Quincy	95
Total number of cows in nearby dairies who serve consumers in City of Quincy	528
Milk produced in Quincy and nearby dairies (qts.).....	5,280
Milk sold in Quincy, raw (qts.)	580
Milk contractors' processing plants, storage and creameries in City of Quincy	10
Milk contractors' processing plants, storage and creameries out of City	29
Teams, auto cars and trucks employed in distribution of milk, cream, ice cream and buttermilk in City of Quincy	197
(All have been inspected)	
Milk consumed in Quincy per day (qts.)	34,375
Pasteurized milk consumed per day (qts.)	33,795
Raw milk consumed per day (qts.)	580
(All from tuberculin tested cows)	
Certified milk consumed per day in Quincy (qts.)	149
Grade A milk consumed per day in Quincy (qts.)	2,215
Chocolate milk consumed in Quincy (qts.)	105

REPORT OF BACTERIOLOGIST

JANUARY 1, 1934.

DR. E. B. FITZGERALD, *Health Commissioner*.

DEAR SIR: During the past year examinations were made in the laboratory as follows:

Plate counts (milk)	624
Pus and streptocci (smears)	648
Chemical examinations (milk)	704
Ice cream (chemical)	72
Ice cream (plate counts)	72
Total examinations	2,120

Respectfully submitted,

EDWIN E. SMITH, M.D.

REPORT OF INSPECTOR OF MEATS AND PROVISIONS

DECEMBER 31, 1933.

To the Commissioner of Health, Quincy, Mass.

DEAR SIR: I submit the report of the work in this office for the year ending December 30, 1933.

Inspections made 1,563

Meats and Foodstuffs Condemned as Unfit for Food

Poultry (pounds)	297
Beef (pounds)	44
Smoked shoulders (pounds)	8
Corned shoulders (pounds)	20
Corned beef (pounds)	67
Lamb (pounds)	53

Food Establishments in Quincy

Markets	135
Stores	125
Restaurants and lunch rooms	76
Fruit stores	63
Bakeries and food shops	25
Creameries	10
Delicatessens	7
Fish markets	60

More fish was used for food this year than usual. The prices in the market have been very low, and quality good. A large assortment of all kinds to suit one's taste.

Dealers should not use out of the bottom of barrels in which fish has been shipped to them as the gurry settles to the bottom and to use this ice over again would destroy good fish instead of preserving it.

Retail dealers should remove fish from the barrels as soon as it arrives at the store. Too much water used on fresh fish softens it and takes away some of the real fish flavor.

Restaurants, cafeterias and lunch counters have been looked after very closely this year. All glasses or other eating or drinking utensils used in refreshment places should be sterilized at least twice a day, washed and rinsed with hot water before each separate use.

People who have received a beer license from our city the past few months are also serving sandwiches of meat and other food which must be inspected. I saw that refrigerators and all utensils are perfectly clean and cared for, according to the rules of the Department of Health.

We have a few old refrigerators in some markets that have been in use for some years and steps have been taken with the market men to install new ones with all up-to-date modern improvements this year.

Each year brings its changes with some stores and markets, but as a whole our market men are more than pleased at the pick up in business over the holiday trade this year. Prices very reasonable for the best quality of poultry in years.

The market men and supervisors of the chain stores are always willing at all times to cooperate with us in keeping their places of business clean and in an up-to-date sanitary condition with this department.

We have in Quincy this year, twenty-eight large chain markets and seventy-four chain stores which represent three of the largest companies.

Respectfully submitted,

HOWARD ROGERS,
Inspector of Meats and Provisions.

REPORT OF INSPECTOR OF PLUMBING

JANUARY 1, 1934.

DR. EDMUND B. FITZGERALD, *Health Commissioner*.

DEAR SIR:—As Inspector of Plumbing I have the honor to submit my fortieth annual report.

DR. EDMUND B. FITZGERALD

To His Honor the Mayor, the President and Members of the City Council:

GENTLEMEN:

The Board of Managers of the Quincy City Hospital present the following report for the year ending December 31, 1933, together with reports of the various departments.

Your attention is especially directed to the various departmental reports. These reports, submitted by the heads of the various departments of the Hospital supply detailed information of the equipment and work accomplished by their departments during the year.

The Board of Managers was organized by the election of Mr. John H. Taylor, Chairman, and Mrs. Madeline McCormick, Secretary.

At the request of Your Honor, plans were prepared for a new Administration Building to be constructed from funds allotted by the Federal Government under the Public Works Act. These plans of a much needed Administration Building provide offices for the executive and clerical force, adequate admittance offices, library and conference rooms for the staff, and rooms for the Superintendent, Assistant Superintendent and internes who are now housed in the present Administration Building. Space has also been provided in the basement of the proposed building to be used as a garage, until such time as it will be possible to construct a permanent garage adjoining the present Service Building. This will result in transferring the ambulance from the Police Station, where it has been housed for many years, to the Hospital, where it should be.

On account of the financial need of the City, no large expenditures were made during the year for additional equipment. There were, however, expenditures which the Board felt were necessary, made for an oxygen tent for the medical service and a vacuum pump for the operating room.

In the past, it has been the custom to provide annual appropriations for salaries and expenses only. The Board feels that in order to maintain the Hospital in accordance with modern practice there should be an annual appropriation for additional equipment, and has so recommended in the budget which it has submitted for next year. In an institution such as the Hospital, there are constant demands by the staff for new and improved equipment, and if the Hospital is to be maintained at its present standard these demands should be adequately cared for.

The total expenditures during the year amounted to \$298,188.52, a decrease of \$16,114.72 from the previous year. Of this amount, \$14,773.28 represents a reduction in the cost of supplies and services purchased, and \$1,341.44 represents a reduction in the amount of salaries and wages. The saving effected in the cost of supplies was largely due to reorganizing the purchasing methods of the Hospital. Under the system now in use, specifications of all supplies and equipment are submitted each month to various concerns who are invited to bid on the requirements. The list of concerns bidding is constantly increasing, as bids are sent to any concern requesting them. All purchases are made from the low bidder on each item.

The reduction in the amount of salaries and wages, notwithstanding the fact that there were more graduate nurses employed than ever before, was due to a rearrangement of salary schedules.

These schedules, although somewhat lower than previously existing, were above the average salaries paid by hospitals of similar size and rating in the Metropolitan District. The Board of Managers feels that the improved financial condition of the City should this year warrant a return to the salary schedule previously in effect, and has so recommended in the budget submitted.

The income from patients amounted to \$155,610.62, and the income received from Endowment Funds amounted to \$4,284.62, a total of \$159,905.24. This amount was \$10,238.87 less than the receipts last year. This reduction in income is a natural result of the economic situation. An examination of the statistics shows that although the total number of patients admitted to the Hospital during the year increased over the previous year, there was a decrease in the number of patients paying full rates, and an increase in the number of free patients and patients paying partial rates.

In April, Miss Ruth J. Adie, R.N., resigned as Superintendent of the Hospital and the Board appointed Miss Mildred Constantine, A.M., R.N., as Superintendent.

The State Auditors, in their report of December, 1933, stated that as at July 20, 1933, there were outstanding accounts in excess of \$287,000.00 due the City on account of services charged by the Hospital. Many of these accounts go back to 1925 and are uncollectible and should be charged off. It is hoped that during the coming year a system will be installed whereby the financial ability of the patient to pay for hospitalization will be determined on his admission to the Hospital, and not several years after he has been discharged, thus eliminating the practice heretofore followed of carrying accounts on the records for several years.

We desire to express our appreciation to the Hospital Aid Associations and to all individuals and organizations who have assisted the Hospital with donations and gifts.

JOHN H. TAYLOR,

Chairman of Board of Managers.

GENERAL INFORMATION

Private rooms: Two visitors at a time, 11 A. M. to 8 P. M. daily.

Semi-Private: Maternity, 3-4 P. M. and 7-8 P. M. daily.

6 Ward patient: 2-3 P. M. and 7-7.30 P. M. daily. Two visitors at one time in the afternoon and one at night.

Children's ward: 2-3 P. M. daily.

Children under 16 years of age may be allowed to visit patients in private rooms, one child at a time.

Children under 16 years of age are not allowed to visit children or maternity patients, due to the prevalence of contagious diseases among children.

Under no condition will relatives or friends of patients be permitted in the operating room or delivery room during time of operation or delivery.

Charges

(Subject to change)

Medical, Surgical—\$4.50, \$5.00, \$7.00 a day; with bath, \$8.00 a day.

Semi-Private—\$4.00 a day.

Four-bed Private (when available)—\$3.50 a day.

Private bed in Children's ward, \$4.00 a day.

Private tonsil and adenoid patients in ward—\$8.00 for 24 hours.

Private room, for 24 hours—\$10.00. Additional charge if patient remains more than 24 hours.

Maternity

Private Room—\$6.00-\$8.00 a day.

Semi-Private—\$5.00 a day.

Ward—\$4.00 a day.

In line with general hospital practice, all bills are payable seven days in advance. Over payments are refunded. The request for payment in advance in no way involves a question of credit but is a rule adopted in the interest of the economical conduct of the Hospital.

The Hospital reserves the right to move to the open ward a patient occupying a Private or Semi-Private room who fails to pay his bill for Hospital service within 72 hours after presentation.

Extra charges are made for Laboratory work, Delivery Room, Physiotherapy treatments, X-rays, board of private nurse, special medicine or vaccine, etc.

The charge for Private Room includes board and hospital nursing but not medical or surgical or obstetrical attendance, which must be arranged for with attending physician.

Ward rates include board, bed, nursing care and the professional services of the members of the Hospital Staff on duty at the time the patient is in the Hospital. The doctors receive no remuneration for their services to ward patients.

Private Nurses

Arrangements for private nurses should be made through the admitting office. The salary of the private nurse is paid direct to her by the patient or relatives. The Hospital makes a charge of \$1.00 a day for her board. No reduction is made in case the nurse, for any reason, has some of her meals away from the Hospital.

A list of registered nurses, who are disengaged, is kept at the Hospital and may be consulted at any time. Graduates of other Hospitals are not called for duty in the Hospital when a Quincy City Hospital graduate is available. Graduates of the Quincy City Hospital know the routine and are better able to cooperate with it. The Hospital feels that its graduates who stay in and around Quincy should be encouraged in so doing, as the citizens of Quincy are thereby assured adequate nursing care when it is needed.

Private patients may be cared for only by members of the Active and Courtesy Staffs. Patients are admitted to the ward upon recommendation of any physician.

Patients may be visited by clergymen of their selection and, so far as possible, the Hospital will grant the performance of any desired religious rites.

Accident or emergency cases are received in the Accident Room at any time. All out-of-town accident cases must have a private physician who is a member of the active staff.

Patients suffering from mental or chronic diseases are not admitted to the Hospital.

Contagious cases are not admitted to the Hospital.

Whenever a patient is removed from the Hospital without the approval of the attending physician or surgeon, the Superintendent shall require from the person assuming the responsibility of such removal a written statement signed to that effect.

In case of operation on minor, permission to give ether must be signed by a parent or guardian.

Telephones

There are telephone connections in all Private Rooms except Rice II. Instruments may be installed with permission of the attending physician. Toll calls according to rates.

MISCELLANEOUS INFORMATION

What to Bring

Private patients entering the Hospital should bring with them nightgowns, bathrobe, slippers, comb, tooth brush and tooth paste. Maternity patients are requested not to bring clothing for the baby to wear in the Hospital.

Valuables

Money and other valuable must be deposited in the Hospital safe; otherwise no responsibility will be assumed.

Radios

Patients are allowed to have radios in rooms and wards but they must be kept quiet so as not to disturb surrounding patients. A charge of \$.50 a week will be made for each radio.

Library

The Thomas Crane Public Library maintains a branch at the Quincy City Hospital. Books are obtainable from the Librarian who visits each floor between 2 and 5 P. M. on Mondays, Wednesdays and Fridays.

Suggestion

It is requested that any suggestions for improvement of service be made at the Superintendent's office before the patient leaves the Hospital.

REPORT OF SUPERINTENDENT

To the Board of Managers, Quincy City Hospital:

With the advent of a number of CWA workers we were able to concentrate our patients in part of the hospital and give the workers an opportunity to renovate most of the hospital wards and furniture. A number of clerks from the CWA have given us valuable help in revising the filing system in the X-ray Department and checking up the records.

A financial investigator has been added to the hospital staff with the hope that a definite understanding may be reached with the family while a patient is still in the hospital to the end that the hospital charges may be reasonable and within the ability of those who are responsible for payments.

Rates for special duty nursing in the hospital were reduced from \$42.00 to \$35.00 a week. While this arrangement seems not to have materially increased the number of calls for special nurses, many of the nurses feel they have been kept at work for longer periods.

In May the duties of the hostesses were combined with those of the admitting office.

An active group of women workers at the Hospital and the Cranch School have provided us with numerous binders, children's pajamas, towels, and other items. One particularly helpful item was the new edges put on the slightly worn blankets. This was all hand work and necessarily slow.

For a portion of the year the Hospital was fortunate in obtaining the services of Mrs. Helen S. MacFarland through the Boston School of Occupational Therapy. Mrs. MacFarland worked with adult patients recommended by the doctors. While she was with us our funds were so limited she could not offer the patients as much variety in occupation as she wished, but various patients learned to produce useful and decorative articles which they can continue to make at home. Mrs. MacFarland's home obligations required that she give up the work after a few months. However, it is my hope that further work may be accomplished in this line next year.

Another innovation which is most helpful to all is the acquisition of volunteer teachers from the Leslie Kindergarten School in Cambridge. These students read to and play with our children. With some of the older school children who stayed a long time in the Hospital they have been able to do some teaching. We hope this work helped the children a little when they ultimately returned to school.

During the year 1933 the Quincy City Hospital was approved as a training field for internes. As a result the duties of the internes have been changed and a regular rotating service arranged. Three volunteer internes have given us the benefit of their services for three and five month periods.

With the resignation in May of the dietitian, a reorganization of that department became imperative. The new dietitians have made marked improvements in the dietary service, particularly in the diets for diabetic patients and others requiring special menus. The babies' formulae have been transferred from the main kitchen to a special room and supervised by a nurse in charge of the nursery.

During the year numerous Quincy residents have been most generous to the nurses in the matter of magazine subscriptions. Where we had duplicates the publishers have been generous in changing the subscriptions so that we have been able to provide the nurses

and the visitors' waiting room with a most satisfactory list of periodicals. The Retail Merchants' Association contributed a large number of excellent toys to the children's ward at Christmas time. Throughout the year we have received smaller contributions of flowers, scrap books, bed quilts and other useful items which have been very much appreciated by the patients.

MILDRED CONSTANTINE.

REPORT OF STAFF OF QUINCY CITY HOSPITAL

To the Board of Managers and Superintendent of Quincy City Hospital:

The various departments of the Quincy City Hospital, regardless of numerous difficulties during year of 1933, have continued to function and have done their work well. The entire Staff of the Hospital have given unstintingly of their time and efforts in carrying on the work in these departments.

Ever mindful of the high classification of our Hospital, namely Class A, the Staff has endeavored at all times to carry on for the benefit of the citizens of Quincy and for the maintenance of this high standard. It is their earnest desire that the work done at the Quincy City Hospital will always be of the highest possible standard.

DANIEL B. REARDON, M.D.,

President of Staff of Quincy City Hospital.

REPORT OF THE SCHOOL OF NURSING, QUINCY CITY HOSPITAL, 1933

To the Board of Managers and Miss Constantine:

At the present time the School of Nursing consists of fourteen third year students and five second year students. Owing to the over supply of nurses, it seemed best to comply with the request of the nursing profession and omit the usual fall class of students. This measure has increased the number of floor duty nurses to the extent of employing all of our own graduates interested and qualified for this type of nursing, besides employing carefully selected graduates from other hospitals of high repute.

The full curriculum of study for the nursing school has been followed implicitly throughout the year with the six months' affiliation in Pediatrics and Medical Diseases at Bellevue Hospital, and the three months' course in Contagious Diseases at the Charles V. Chapin Hospital in Providence.

Recently, much thought has been given to a more effective program for the third year students, aiming to develop the essential qualities of leadership and initiative. In this program is now included a month of advanced work in the Diet Kitchen; another month is spent in learning of the duties and responsibilities of charge nursing; a third month is devoted to advanced work in the Operating Room; while a program is under way which will provide for advanced work in Obstetrics.

Graduation took place on June fourteenth when thirteen nurses received their diplomas. Mr. Edmund A. Whitman was the speaker of the occasion and his address reflected his keen interest in nurses. The exercises were followed by the usual banquet and dance.

This year the scholarship given by the Hospital Aid Association for a four months' course in Public Health Nursing at Simmons College was given to Miss Roberta Meade.

Without exception, the doctors have loyally supported the School of Nursing, generously giving of their time to lecturing and caring for sick nurses. I feel a debt of gratitude for their interest and cooperation. Their lectures have been chaperoned largely by our supervisors and charge nurses who have demonstrated their teaching ability both in the classroom and on the wards. This is a very

progressive group and I am happy to report that three of its members are taking advanced courses in Ward Administration at Simmons College, two are studying at the Lincoln Preparatory School, and another member is taking a course at the Boston University. Three others have definitely enrolled for a course in Nursing Procedures at Simmons College next semester, while one charge nurse and three of the floor duty nurses have been granted leaves of absence for post-graduate courses.

Extra-curricular activities have embraced a monthly social evening for the staff members and several dances and card parties for the students. In October the third year students held a bazaar, from which they realized a substantial profit.

The Hospital Aid Association teas have been a source of enjoyment to our nurses. To this organization we are also indebted for our professional magazines and the student scholarship in Public Health Nursing at Simmons College.

May my sincere appreciation reach all of those loyal friends of the nurses who have earnestly supported us during this past year.

Respectfully submitted,

DOROTHY E. DAWES,
Acting Superintendent of Nurses.

LABORATORY REPORT

In rendering the annual report of the Clinical and Pathological laboratory for the past year a general review of the development of the laboratory work and facilities at the hospital during the past five years is indicated in order to give the citizens of Quincy, who may read this report, a comprehensive picture of the function of the laboratory service of their hospital.

In order to qualify as a Class A institution it is necessary that a hospital have a clinical and pathological laboratory, in keeping with the size of the institution, to do routine diagnostic tests. The rapid development in laboratory service in hospitals throughout the country has been due primarily to the recently discovered practical tests which are very important in determining the character of various diseases. Formerly the laboratory in the smaller, as in many of the larger, hospitals was confined to small, dark quarters in a remote part of the institution suggesting that the laboratory was an afterthought in construction. In the more recently constructed institutions, however, the laboratories are recognized as very important units and, in general, are properly located and suitably equipped to do the required work.

The laboratory of the Quincy City Hospital has been brought up to date with adequate modern equipment to do the standard routine tests required of a 300 bed, Class A institution. The character of the work may be divided into the following:

Chemical—which includes the determination of blood and urine and miscellaneous fluids.

Bacteriological—which includes the determination of the various types of bacteria such as are found in sputa, blood, nose and throat and fluids from various parts of the body.

Pathological—which includes post mortem examinations and the examination of tissue removed at operation.

There are employed at the hospital a part time Pathologist and two full time Technicians. The Pathologist supervises all the work,

performs the autopsies, does the gross and microscopic examinations on the tissues removed surgically and serves as a diagnostic consultant to the Staff. The Technicians carry on all the routine work which includes, urinalyses, blood chemistry, blood counts, spinal fluid, gastric analysis, food tests and routine bacteriology together with the determination of the basal metabolic rate.

The number of specimens examined during the last few years shows a marked increase indicative of the constantly growing demand upon the laboratory for routine work.

It is required by the American College of Surgeons that at least 15 per cent of all deaths have a post mortem examination in order that a hospital may qualify as a Class A institution. The Quincy City Hospital has qualified in this respect and the examinations have helped materially in increasing the knowndge of the staff. The general public is beginning to realize the value of this service.

The gross and microscopic examination of tissue removed surgically is a very important phase of the laboratory work. The correct diagnosis of a tumor the malignancy of which is in question is of prime importance in the subsequent treatment of a given patient. The ordinary white blood count is of tremendous value in determining the necessity for surgical treatment of a patient as in a doubtful case of appendicitis. The determination of the blood sugar content is of more value than that of the urinary sugar in cases of diabetes and serves as a guide in the dietary treatment of this disease. The determination of the presence or absence of bacteria in the circulating blood by means of a blood culture is one of the most important laboratory tests.

The laboratory also acts as a central board of health station for the distribution of vaccines, antitoxins, antisera for the diagnosis and treatment of contagious disease in the city.

Diagnostic guinea pig and rabbit inoculations are made in connection with diseases such as tuberculosis and other bacterial infections. A new pregnancy test which approaches 100 per cent accuracy is made by injecting rabbits with the urine of a suspected pregnant case, making the diagnosis possible in a few days.

The laboratory of the Quincy City Hospital has been self supporting since its inception, bringing a profit to the hospital, and is now examining specimens received from outside sources.

FRANCIS P. McCARTHY, M.D.

Report of the examinations of the Clinical and Pathological Laboratory of the Quincy City Hospital for the year 1933:

Pathological surgical specimens	947
Autopsies	72
Urinalyses	8,030
Renal function tests	72
Blood examinations:	
W. B. C.	1,462
R. B. C.	975
Hbg.	993
C. I.	970
Differentials	899
Platelet	4
Reticulocyte	13
Bleeding times	44
Clotting times	87

Blood typings	44
Blood matchings	224
Blood chemistry:	
Blood N-P-N	290
Blood sugars	245
Icteric indices	6
Van denBergh	1
Blood cultures	34
Throat cultures	23
Miscellaneous cultures	130
Bacteriological smears	132
Sputa	113
Exudates	5
Transudates	3
Spinal fluid examinations	28
Gastric content and vomitus	2
Feces	74
Autogenous vaccines	8
G. P. inoculations	24
Ascheim-Zondek pregnancy tests	115
Basal metabolic rates	82

Total number of examinations 16,151

Respectfully submitted,

FRANCIS P. McCARTHY, M. D., *Pathologist.*

REPORT OF THE WOLLASTON BRANCH, HOSPITAL AID ASSOCIATION

The Wollaston Branch Hospital Aid Association held its meetings on the first Thursday of each month in the Community Room of the Wollaston Library from October to June.

Our purpose is to sew for the Hospital.

We sent flowers to the Hospital Thanksgiving and in February made ten bed jackets for the children patients.

There are twenty-eight members in this branch at the present time.

Respectfully submitted,

MRS. FRANK S. CROFTS,
President.

PHYSICAL THERAPY DEPARTMENT

To the Board of Managers and Superintendent:

The following is a yearly report of the Physical Therapy Department of the Hospital. The number of treatments given monthly during the year are as follows:

January	490
February	480
March	810
April	490
May	505
June	373
July	326
August	481
September	532
October	618
November	392
December	459
Total	5,880

The object of the Department is the use of physical measures in support of the treatment of both medical and surgical cases, to reduce their discomfort and shorten the duration of their disability.

The Physical Therapy Department of our Hospital is considered to be the best equipped unit of its kind in any hospital in New England, and compares favorably with that of the best New York hospitals.

As its name implies, Physical Therapy is the treatment of disease by means of all forms of physical energy, i.e., various wave lengths of light, ultra violet, radiant light and infra red; various forms of electricity, static, high frequency, galvanic and sinusoidal. Artificial fever induction. Hydrotherapy. Massage. Manipulative therapy, and the so called radio knife for removal of malignant growths.

Many new growths of the skin, both malignant and benign, have been treated in the department during the past year. The after care of fractures in so far as restoration of function is concerned, by massage, light, manipulation, sinusoidal electricity and diathermy, is a large part of the work of this department.

Toxic conditions arising from intestinal stasis are frequently treated in the department by means of colonic irrigation and the use of sinusoidal current, cabinet light baths and hydrotherapy. Our equipment for hydrotherapy is complete. In addition to the various forms of baths we include the arm and leg whirlpool for the treatment of infected extremities.

Cases of both acute and unresolved pneumonia are treated by the department with diathermy and indicated forms of light. Various forms of vibratory massage treatments are given with our equipment.

Physical Therapy is of special value in the treatment of the unfortunate chronic cases where natural activities have been materially diminished through disease. It has served to make the patients more comfortable, and to increase their efficiency.

Respectfully submitted,

CLAUDE L. PAYZANT, M.D.

REPORT OF THE X-RAY DEPARTMENT

FEBRUARY 16, 1934.

The past year saw a change in the personnel of the X-ray Laboratory, due to the resignation of Miss Helene G. Reed, who has held the position as technician for a period of four years.

Rebecca M. Philbrick, a thoroughly trained and competent technician, was appointed in her place, and she has continued the work with the same degree of efficiency as her predecessor.

A further addition to the personnel of the Laboratory was made when the administration assigned Alice F. Broderick for a short time each morning for stenographic work. Her accuracy in taking medical dictation and her knowledge of hospital records makes the work of the Department easier for all concerned.

Another change which will surely act for the benefit of patients and doctors alike is the installation of a new card system of records, which we hope will be ready and in good working order by the first of March, 1934. This system will be available for the use of doctors during the working hours of the technician.

The following is a statistical report of the cases seen in the X-Ray Department during the year 1933:

Out patients	1,780	
House patients	1,454	
Total	3,234	
Deep therapy	141	
G. I. tract	336	
G. U. tract	173	
Gall bladder	144	
Upper extremities	563	
Lower extremities	833	
Skulls	163	
Noses	20	
Jaws	32	
Chests	352	
Pelvis	115	
Spines	182	
Teeth	82	
Barium enemas	61	
Ribs	47	
Sinuses	47	
Mastoids	89	
Sternum	3	
Foreign bodies	3	
Pregnancies	11	
Reduction of fractures under fluoroscope.....	6	
Pyelogram	58	
		3,546
Treatments		
W. C. T.	44	
Carbuncles	8	
Thymus	19	
Ears	14	
		85
Grand total		3,631

With sincere appreciation of the hearty cooperation of the Administration and Staff during the past year, I am

Respectfully yours,

CHARLES WHELAN, M.D.

REPORT OF THE HOSPITAL LIBRARIAN, 1933

The beginning of the year 1934 marks the end of eight and a half years of library service in the Quincy City Hospital. The service has now become an established fact and is taken for granted by a great many of the patients.

There have been no notable changes in the service during the year. The librarian continued her visits three times each week, trundling the library wagon about the hospital, distributing books and magazines to all who wished for them.

In behalf of the hospital patients I take this opportunity to thank again the members of the "Hospital Aid" for the magazines which they supply for the library service. All subscriptions were renewed this year.

The permanent collection of books in the hospital library was augmented by forty during the year. Also, books were borrowed from the Thomas Crane Main Library in response to frequent requests on an average of four a visit.

At present there are 896 books in the permanent collection; 643 of which are adult fiction, 126 juvenile fiction, 40 adult non-fiction and 87 juvenile non-fiction.

The total circulation for the year 1933 was 10,555 books, showing a loss of 416 books as compared with the circulation of the previous year. Detailed figures follow:

	Fiction	Non-fiction
Adult	7,245	1,236
Juvenile	1,545	529
Total	8,790	1,765

The above figures include 128 books written in the Italian language, 11 in French, 5 in Finnish, 2 in Arabic, and one in Spanish, also a total of 820 periodicals.

Respectfully submitted,

ZAYMA CONNOLLY, *Librarian.*

REPORT OF THE QUINCY HOSPITAL AID ASSOCIATION

As in the past, we have endeavored to be of service in our small way to the Hospital. Up to our annual meeting in May we have held monthly all day sewing meetings.

With the advent of the CWA workers the sewing was pretty well taken care of. We have allowed them to use two electrical sewing machines for their work.

Our Simmons College scholarship has been used this year.

In June the members of the graduating class were presented their hospital pins by our organization.

As usual, we have subscribed for current magazines for the nurses and ward patients.

At Christmas time small useful gifts were given to all ward patients as well as those in the Children's Ward.

Respectfully submitted,

SUSANNE CLARK BRESLYN,
President.

REPORT OF POLICE DEPARTMENT

JANUARY 1, 1934.

HON. CHARLES A. ROSS, *Mayor, City of Quincy, Mass.:*

DEAR SIR:—I respectfully submit the Annual Report of the Police Department for the year ending December 31st, 1933:

Personnel of Force

Chief, Ernest H. Bishop
Captain, Daniel H. Doran

Lieutenants

Conclusion

The city has been very free from major crimes during the past year. The only one of any importance was the robbery of the Wollaston Branch of the Quincy Trust Co., which was entered about closing time by armed men who threatened the two employees present at the time, and escaped with the money that was in the cash drawers.

This incident emphasizes the fact that the banks have a duty to perform as well as the police. If these bank hold-ups are to be stopped, the banks must do their part by installing preventative equipment and not leave it all to the police, who cannot be expected to maintain an armed guard for a private institution.

During the time that the schools are in session the Department has received numerous calls for officers to guard places where the children have to cross the street in going and coming from school. These requests for officers at crossings other than the ones that are now guarded could not be complied with without the addition of more men to the Department, as all of the day men are now occupied on school work.

I would suggest that the janitors of some of the schools might do some of this work as is done in other places.

At the close of the year I was enabled to equip the Department with a supply of tear gas and the equipment necessary for its use.

Five old cars used for patrol work were exchanged for new ones in August and these should be replaced by new cars near the close of this year. These cars are run about 40,000 miles in a year and the expense for repairs after that becomes very heavy and it is more economical to replace the old cars than to pay these large repair bills.

There are six motor-cycles in use in the Department. Three of these are three years old and the others have been in use for two years. These should be replaced as the repair bills are excessive.

I strongly recommend that a short-wave radio transmitter be installed for the use of the Department and that at least six of the police cars be equipped with the receiving apparatus. I believe that this should be a two-way system so that the cars can communicate with the station by radio. Some installations which include this feature have been made and are working well. The City of Boston will shortly ask for bids on this type of installation after a long series of tests which have convinced Commissioner Hultman that this is the proper type of radio for police work.

The Department has suffered the loss by death during the past year of two of its members. Patrolman Daniel J. Ford and George K. Lindgren. Patrolman Ford was one of the old-timers of the Department, while Lindgren was one of the younger men. In the passing of these two men the city has suffered a distinct loss.

Four patrolmen have been retired on a pension after a long and useful service in the Department. Two patrolmen have resigned to enter other lines of business.

In conclusion I wish to thank His Honor Mayor Charles A. Ross, the members of the City Council and all other city officials and the

justices, clerks and other attachees of the District Court for their kindness and consideration and the attitude of helpfulness which they have displayed toward the Department and myself.

I also wish to take this opportunity to assure the members of the Police Department that I am not unmindful of the good work that they have done in assisting me to carry out the duties of the Department. They have worked well and faithfully to perform any duty to which they have been assigned, no matter how arduous or disagreeable it may have been.

Respectfully submitted,

ERNEST H. BISHOP,
Chief of Police.

REPORT OF FIRE DEPARTMENT

JANUARY 1, 1934.

HON. CHARLES A. ROSS, *Mayor, City of Quincy, Quincy, Mass.*

DEAR SIR:—I respectfully submit the annual report of the Fire Department for the year ending December 31, 1933.

Houghs Neck Station

One White Pumping Engine.
One American LaFrance Ladder Truck.

Fire Alarms

During the year there were 818 alarms.

Bell Alarms	436
Telephone Alarms	348
Still Alarms	34
False Alarms	86
Reported Fires	4 (Put out by occupants)

During the year there were eleven second alarms.

During the year there was one general alarm.

The Central Station responded to 447 alarms:

284 bell, 154 telephone, 9 still.

The Wollaston Station responded to 311 alarms:

163 bell, 132 telephone, 16 still.

The Atlantic Station responded to 200 alarms:

70 bell, 114 telephone, 16 still.

The Quincy Point Station responded to 110 alarms.

87 bell, 11 telephone, 12 still.

The West Quincy Station responded to 184 alarms:

120 bell, 61 telephone, 3 still.

The Houghs Neck Station responded to 95 alarms.

63 bell, 32 telephone.

The total number of feet of hose laid was 94,100 feet.

Headquarters laid 41,550 feet.

Wollaston Station laid 14,300 feet.

Atlantic Station laid 13,450 feet.

West Quincy Station laid 10,250 feet.

Quincy Point Station laid 9,450 feet.

Houghs Neck Station laid 5,100 feet.

Total number of feet of ladders raised, 6,520.

Total number of gallons of chemicals used 1,015.

Total number of hours absent from quarters, 677.

Number of hours Engines pumped, 76.

Number of inspections made, 16,217.

Number of hours at drills, 287.

Number of hours hydrants in use, 100 hours.

Flood Light Truck Operations

Number of alarms answered, 239.

1,000 watt light in use 60 hours.

500 watt light in use 76 hours.

300 watt light in use 54 hours.

250 watt light in use 73 hours.

Under water lights used 10 hours.

Electric saw used 2 hours.

Oxygen masks used 7 times.

Inhalator used 11 times.

Inhalator on Deputy Chief's car used 10 times.

There were 11,550 feet of wire used in the above operations.

December	10,081 00	9,659 00	19,740 00
Total	\$86,676 99	\$61,108 55	\$147,785 54

Two veteran firemen died during the year. Both men had been in the department for many years.

Lieutenant John Denneen, with 33 years of service, and James Dillon, with 21 years of service, both passed away during the year.

Both of these men had been faithful and efficient firemen and in their deaths the Fire Department has suffered a very distinct loss.

There were 5 men pensioned during the year. These men were Deputy Chief James C. Gallagher, Lieutenant Andrew Scully, Michael Barry, Edward Farrell and Samuel Tutton.

All of these men had given many years of conscientious and faithful service to the city and justly deserve their reward. It is my wish that they may enjoy many years of happiness and good health.

There were 152 less alarms than in 1932. This is probably due to the fact that the department has continued the practice of sending men out to burn places that are fire hazards, such as fields, marshes and woodlands. The Welfare Department cooperated by sending men to assist the members of this department.

At the present time there are several vacancies in the department, including that of deputy chief and two lieutenants. These were caused by retirements and deaths. I trust that you will fill these as soon as an eligible list has been established.

There were 70 applications made for the sale of fireworks; 61 of these were approved and 9 were rejected. The sum of \$30.50 was collected for these and was turned over to the City Treasurer.

Eighty dollars and two cents was collected from the sale of old tires and for recharging fire extinguishers, and this was also turned over to the City Treasurer.

Five hundred and ten permits were issued for out-door fires.

There were 3,491 applications for storage of oil in connection with oil burners. There were 1,895 permanent permits issued for range burners and 328 for power burners. There were 1,268 temporary permits issued for range and power burners. This is a large increase over previous years.

There were 16,512 inspections made all over the city, and the citizens and business men, by their cooperation with the firemen in keeping their homes and business places free from fire hazards,

made it possible to reduce the fire loss by \$36,342.46 less than in 1932.

During the year the department received six calls from the Quincy City Hospital for volunteers for blood transfusions and I am proud to say that the members responded one hundred per cent. In every case a transfusion was given by a member of the department.

On the night of January 15th, the department was called upon to perform one of the most difficult and harrowing jobs it ever had. An automobile with four passengers proceeding across the Fore River Bridge crashed through the wooden railing and landed in the river below. The department was notified and after making a quick response was able to hook on to the submerged car with ropes and grappling hooks. Fire Boat No. 44 of the Boston Fire Department was called and, with the assistance of their divers, ropes were placed around the car and it was towed to the docks of the Bethlehem Shipbuilding Co., where a large crane lifted the car to the surface of the water so that the bodies could be removed. One of the passengers was thrown clear when the car went through the railing and was assisted to safety by persons who were the first to arrive at the scene. The under water lights that are carried on our Flood Light Truck were of great assistance to the diver in helping him locate car and tie ropes around it. I desire at this time to extend my heartiest thanks to Commissioner McLaughlin and Chief Fox of the Boston Fire Department for their able assistance rendered at the accident.

The value of our Light Wagon was again demonstrated on May 26-28-29, when it was used to assist the police department in recovering the body of "Red" Curran, murdered Boston gangster, from the waters of Djerf's Quarry. Our under-water lights proved to be of great help to Fred Wallace, the diver who went down into the depths of the water in the quarry and recovered the body of the slain man and the automobile which he was in.

On September 11th, our Light Wagon was again pressed into service to furnish under-water lights for a diver to descend into the waters of Cashman's Quarry to attempt to locate the body of a young man whom the police believed to have been drowned. The diver was successful in recovering the body through the aid of our under-water lights.

Recommendations

I respectfully recommend that a new fire headquarters be constructed on some site south of Quincy Square to replace the present inadequate one. The present station was built forty years ago for horse-drawn apparatus and has long since outlived its usefulness. The strain on the main floor is great, owing to the fact that there are six pieces of apparatus, weighing approximately thirty tons, stored on same. The ventilation and sanitary conditions are inadequate, especially the washroom, which has accommodations for two men, whereas there are fifteen men stationed in the building at the present time and also the shower bath, which is located in the same room as the urinal and within two feet of same, which impairs the health of the members. The building is being maintained in violation of the garage laws.

That a new pumping engine be purchased each year until we have replaced three that have been in service for sixteen years and are now showing signs of wear.

That an aerial ladder be purchased as the present extension ladders now in service will not reach the roofs of many apartment and other buildings in this city.

That more men be appointed to the department so that ladder trucks can be better manned.

That a Captain and Lieutenant be stationed in all stations so that an officer will be in charge of each piece of apparatus when answering an alarm.

In conclusion, I wish to express my sincere thanks to His Honor, the Mayor, the City Council, the various City Departments, and to the officers and members of the fire department, who, through their zealous and untiring work have earned my heartfelt gratitude.

Respectfully submitted,

WILLIAM J. SANDS,
Chief of Fire Department.

REPORT OF FIRE AND POLICE SIGNAL DEPARTMENT

JANUARY 1, 1934.

HON. CHARLES A. ROSS, *Mayor, City of Quincy, Massachusetts:*

Chauffeur, Richard Williams	

Fire Alarm

The Central Office has been completely equipped with low rate full power wave rectifying units, floating constantly across the box and alarm circuits, so that each circuit is protected against breakdown by a fully charged battery, allowing a two to four-day reserve supply against circuit failure.

One hundred and eighty-six battery units have been replaced with new type spray proof cells of longer life and greater capacity.

The cable network has been augmented with the addition of six thousand two hundred and fifty feet of multiple conductor lead and loom-covered cable, allowing more flexible routing of circuits for security against accidents and weather conditions.

Ten miles of single conductor aerial wire with crossarms and hardware have been installed extending and replacing various circuits to accommodate changing conditions.

Six new boxes have been added to the system and several replacements have been made, as forty per cent of the boxes in use are of antiquated type.

All boxes have been tested, painted, cleaned and lubricated periodically.

A summary of alarms, etc., is not included in this report, as it is incorporated in the report of the Fire Department.

Police Signals

The Police signal system has also benefited by the additional cable extensions, as sufficient conductors are always provided for police signals in all multiple conductor construction. Great advancement has been made on all circuits in cleaning up faulty construction through transposing conductors, removing partial grounds, crosses, etc., so that signals would not be distorted or lost in transit. Current supply has been constant, as the low rate rectifiers have noticeably improved the battery conditions, at the same time conserving the natural elemental life of the units.

The recall red light system has been extended throughout the city, giving more uniform coverage in all sections and being of great assistance to the Department.

A summary of signal calls is not included in this report, as it is incorporated in the report of the Police Department.

Traffic Signals

The majority of the traffic signal controllers in use in the City have passed their normal useful life and should be replaced with a newer type allowing more flexibility of operation and conformance with State regulations. The past year has been spent in repairing controls by swapping parts and patch work repairs. Signal construction has been confined to simple changes necessitated by public utility pole replacements. New controllers with optional pedestrian control are needed at numerous intersections to cope with every day conditions.

Respectfully submitted,

THOMAS J. SMITH,
Superintendent.

REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1, 1934.

HON. CHARLES A. ROSS, *Mayor of Quincy, Quincy, Massachusetts.*

DEAR SIR:—I herewith submit the twenty-seventh annual report of the Building Department for the year ending December 31, 1933.

There were no outstanding projects constructed during the year, the majority of the work done being alterations and garages.

I wish to take this opportunity to express my appreciation for the co-operation I have received from the builders of Quincy and all others connected with this work during the past year.

TABULATIONS OF BUILDING OPERATIONS FOR 1933

Ward 1

JOHN FRED ERICKSON, Jr.
Inspector of Buildings.

REPORT OF DOCK AND WATERFRONT COMMISSIONER

QUINCY, MASS., JANUARY 1, 1934.

Received by water from January 1, 1933, to January 1, 1934:

For Quincy Point Power Station:

Soft Coal (gross tons)	56,328 tons
Coke (gross tons)	4,107 tons

For J. F. Sheppard & Sons, Inc.:

Amount of coal of all kinds	No report
-----------------------------------	-----------

For City Fuel Company:

Amount of coal of all kinds	17,585 tons
-----------------------------------	-------------

Amount of lumber received by water from January 1, 1933, to
January 1, 1934:

For Quincy Lumber Company	500,112 feet
Number of spruce laths	146,700
Approximate cost	\$18,000

Respectfully submitted,

EDWARD M. WIGHT,
Commissioner.

REPORT OF WATER DEPARTMENT

JANUARY 1, 1934.

HON. CHARLES A. ROSS, *Mayor, City of Quincy:*

DEAR SIR:—The following is the report of the Water Department for the year ending December 31, 1933.

Respectfully yours,

ANGELO P. BIZZOZERO,
Commissioner of Public Works.

REPORT OF INSPECTOR OF WIRES

FEBRUARY 5, 1934.

HON. CHARLES A. ROSS, *Mayor's Office, Quincy, Massachusetts.*

DEAR SIR:—Upon assuming the duties of Inspector of Wires of the City of Quincy, Massachusetts, on February 5, 1933, numerous demands from the local electrical contractors were made that this office institute, immediately, a more complete and rigid inspection service and, particularly, that more time be devoted to re-inspection of hazardous and unauthorized installations. For this reason, I feel that a partial review of the activities of this office for the year 1933 is necessary. I respectfully call your attention to the following facts.

Although new construction and alterations were at a minimum, our income from permits issued amounted to \$1,136.00.

The number of electricians doing work in this city for the year 1933 have increased $24\frac{1}{4}\%$ over the previous year.

The total number of inspections increased $17\frac{1}{2}\%$ over the previous year.

In co-operation with Chief Sands of the Fire Department, this office has re-inspected 59 premises (old installations) in which fire occurred, some caused by defective wiring. High resistance grounds seemed to be the trouble in most cases. By enforcement of the National Electric Code, Article 9, Section 904-C, that we put into effect February 10, 1933, we feel we will eliminate this hazard to a great extent.

With the co-operation of Fred Erickson, Inspector of Buildings, and Chief Sands, we have located 28 oil burners installed without a permit from this office. Of these, 16 burners had to be re-wired, as they did not comply with the National Electric Code or the rules of this Department. Also, we were able to locate a number of alterations and additional small wiring jobs that otherwise would have been done without any permit or inspection.

In spite of the increased burdens imposed on this office we were able, to a great extent, to care for re-inspection as requested by the electrical contractors. We have on file a letter from the Secretary of the Quincy Master Electrical Contractors' Association expressing approval of the manner in which these inspections have been made, and stating further that, in their estimation, at least \$5,000.00 additional work had been created due to this service.

In closing, I might say that a systematic re-inspection survey throughout the city, such as is now in progress in many of the cities in the country, would very materially reduce the hazard of fire and personal injury. To do this, of course, would mean the employment of at least one additional man.

Very truly yours,

FRANK LINTS,
Inspector of Wires.

JANUARY 2, 1934.

HON. CHARLES A. ROSS, *Mayor, City of Quincy, Massachusetts:*

DEAR SIR:—I respectfully submit my annual report as Inspector of Wires for the year ending December 31, 1933.

Inspection in Buildings

The following specified schedule of electrical inspections made of lights and other appliances installed.

Number of permits issued in 1933.....	1,729
Fees received for the above.....	\$1,136 00

Fees received from Jan. 1 to Dec. 31, 1933, inclusive:

January	\$47 00	July	\$125 00
February	56 00	August	129 00

WM. L. FOSTER, *Treasurer.*

Hingham, December 31, 1933.

Trustees of Weymouth Fore River Bridge.

GENTLEMEN:—I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge, for the twelve months ending December 31, 1933, and I hereby certify that he had accounted for all receipts that have been reported.

I have also reconciled the bank account and find the balance of \$459.05 to be correct.

Very truly yours,

J. IRVING BOTTING,
Auditor.

REPORT OF THE CITY PLANNING BOARD

*To His Honor the Mayor and Members of
the City Council:*

GENTLEMEN:—We herewith submit the nineteenth annual report of the City Planning Board for the year ending December 31, 1933.

Consideration has been given to the study of several highway projects with the view towards eliminating traffic congestion. These projects have been studied together with the Metropolitan Planning Board.

TRAFFIC CIRCLES AT NEPONSET BRIDGE

Plans have been prepared showing a traffic circle on the north side of Neponset Bridge to serve the Gallivan Boulevard, Neponset Avenue and the Old Colony Boulevard, and also a traffic circle on Hancock Street at its intersection with the Quincy Shore Boulevard at the location which was formerly Atlantic Street.

These two circles would be great factors in eliminating the congestion in this location as Neponset Bridge is one of the heaviest traveled bridges in the country. By actual count on a busy day 70,000 vehicles crossed this structure, and it was estimated that 18,000,000 cars pass over this structure during the year.

This board recommends the construction of these two circles for the benefit of relieving the congestion at these centers.

HIGHWAY FROM SEA STREET TO SOUTHERN ARTERY

This board has previously recommended a by-pass of the Southern Artery from a point at Field Street and Brackett Street passing over Field Street in front of the Quincy Electric Light & Power Plant, thence in the rear of the City Stables, across a part of the Broad Meadows and extending to Sea Street opposite Quincy Shore Boulevard.

This new highway would tend to relieve congestion at the Police Station on Sea Street, thereby allowing traffic to travel either on the Southern Artery to Hancock Street or Quincy Shore Boulevard. This highway has been given a great deal of consideration by the Commonwealth of Massachusetts Public Works Department and is now before the State Emergency Relief Board for their consideration.

This highway would improve traffic conditions and also tend to develop a portion of the Broad Meadows.

SOUTHERN ARTERY BY-PASS

There have been several studies in the past few years on by-passing the Southern Artery from a point north of River Street following Town River and terminating on Washington Street at Dee Road. Several locations have been studied and at the present time consideration is being given to the location utilizing Follett Street (formerly Newcomb Avenue), Avalon Avenue, and Dee Road entering the circle at the new Fore River Bridge.

Plans are made establishing a circle on Washington Street at Dee Road into which this by-pass would terminate. This location would not interfere with the industrial development of Town River, would require removal of very few dwellings and reduce the expense of this construction.

SOUTHERN ROUTE TO MILTON

Studies are being made for a proposed highway extending from the circle at Washington Street and Dee Road, westerly to Des Moines Road, thence to Water Street at the Quincy Adams Grade Crossing.

On the extension from this point two locations are being considered, namely: following Water Street and Copeland Street through Miller Street crossing the New York, New Haven and Hartford Railroad west of the West Quincy Station, crossing Grove Street between Ferriter Street and Forrest Avenue, terminating at Pleasant Street opposite Readsdale Road, Milton. The other location bears southerly from the Quincy Adams Grade Crossing passing between Water Street and Liberty Street, through the intersection of Intervale Street and Nightingale Avenue, north of Brooks Avenue at the Lincoln School and crossing Center Street at Albertina Street, crossing the New York, New Haven and Hartford Railroad, north of the Old Colony Crushed Stone Plant, where it will be possible for an overhead pass, opening a new territory from this point to West Street at Bunker Hill Avenue, thence over the Bunker Hill Quarry Railroad location to Pleasant Street at Readsdale Road, Milton.

The construction of this highway would make it possible to connect Hillside Street in Milton to it, providing a direct outlet from Quincy to Dedham and points west.

In connection with this we recommend Granite Street be widened from Hancock Street to Scotch Pond Road and a new extension from this point to School Street at Fort Street, thus making use of Brook Road to connect to this highway at Intervale Street, thereby getting direct access to and from Quincy Center.

Through the cooperation of the Metropolitan Planning Board we have on file plans of these four projects at our office, Room 32, in City Hall.

We also have upon file a photograph of the \$60,000 new station of the Metropolitan Sewer Commission. Although this is in Ward One and but two miles from the heart of the city, we doubt if one person in a thousand has seen this plant which is destined not only to care for the needs of Merrymount, Adams Shore, Post Island and Rye Beach, but will handle eventually the requirements of Braintree and Weymouth.

Improvements by the Metropolitan Park Department consisting of the straightening and resurfacing of Wampatuck Road from Furnace Brook Parkway into the reservation and the construction of an outlook capable of the care of 40 cars will be appreciated. We further recommend that the Metropolitan Park Department cooperate with the directors of St. Moritz to secure an outlet for the existing St. Moritz parking space to the Parkway.

It would seem at this time plans might mature for the construction of a municipal garage at the Water Division plant on Penn Street to relieve storage at City Stables.

A minor suggestion is that the city acquire an approach for footpath from Sea Street to the Adams Shore School, and the General Palmer branch library. This would make a direct communication from the street car line for those who have not the benefit

of their own cars. A distinctive falling off in the use of the library branch has been noted this season, since its removal from Sea Street.

The good work in covering the brooks of the city can well be continued, particularly in the center section of West Quincy.

An omission from our previous report we submit herewith. With the cooperation of four representatives from the local Boy Scouts, a foot traffic count was made at one point covering the pedestrians both ways on each sidewalk, Hancock Street to Granite Street, one hour, Saturday, 7-8 P.M.

REPORT OF BOARD OF SURVEY

To His Honor the Mayor and Members of the City Council.

GENTLEMEN: We herewith submit the Eighteenth Annual Report of the Board of Survey for the year ending December 31, 1933.

This was an entirely new Board appointed this year which met on February 20, 1933, to organize, electing Louis F. R. Langelier as Chairman, and Wallace S. Carson, City Engineer, as Clerk.

The important matter for consideration of this Board was the changing of duplicate street names. Several orders were referred from the City Council to this Board upon which public hearings were held and various street names were changed.

Hearings were held after each abutter was notified and notice of the hearings was published in the local papers on the following dates: March 14, 1933; March 21, 1933; March 28, 1933; April 4, 1933, and April 11, 1933.

This Board has full jurisdiction over the changing of unaccepted street names.

The Board officially changed the following names:

March 21, 1933:

Street	Ward	New Name
Agawam Street	6	Shepard Street
Atlantic Avenue	5	Pitts Avenue
Beach Road	6	Seaway Road
Bryant Place	3	Piper Street
Centre Road	1	Macy Street
Chestnut Street	6	Myrtle Street
Cottage Street (Houghs Neck).....	1	Medway Street
Essex Street	1	Bennett Street
Gilbert Road	6	Canton Road
Green Street	6	Bellevue Road
Hampden Street	6	Bayberry Road
Hanna Place	2	Odom Street
Highland Avenue	6	Belmont Street
West Squantum St. to Holbrook Rd.... }		
Hillside Terrace	4	Holliston Street
Newcomb Avenue	2	Follett Street
Packard Street	2	Lebanon Street
Prilvord Street	4	Mount Vernon St.
Quincy Street	5	Oval Road
River Road	1	Edgewater Drive
Spring Avenue	1	Rowley Street
Spring Street	2	Harkins Street
Station Street	6	Burgess Street
Walker Place	6	Blackwell Street
Webster Street	5	Wentworth Road

March 31, 1933:

Bates Street	4	Ellis Street
Berkeley Terrace	5	Parkman Street
Chatham Street	5	Elmwood Avenue
Chesley Place	1	Gertrude Avenue

Chubbuck Court	2	Walpole Street
Crescent Avenue	6	Alfred Street
Dorchester Avenue	1	Delano Avenue
Fifth Avenue	1	Neptune Street
Frances Street	5	Cedar Street
Glover Place	6	Price Street
Myrtle Place	6	Landgrane Street
Jackson's Lane	3-4	Bartlett Street
Prospect Avenue	1	Chapel Street
Summit Street	6	Carrigg Road
Willow Park	5	Ebett Avenue
Wilson Court	4	Brewer Street
Winthrop Terrace	1	Lakeside Avenue

April 11, 1933:

Atlantic Avenue	1	Homestead Street
Bay View Road	6	Dewhurst Street
Brackett Place	1	Morrison Street
Clare Street	1	Marine Street
First Avenue	1	Belcher Street
Glover's Lane	3	Hillsboro Street
Guild Street	1	Merrimac Street
Hersey Street	2	Keyes Street
Johnson's Lane	4	Terrace Street
Meadow Street	1	Marshfield Street
Morton Street	1	Bayswater Road
Moscow Avenue	6	Dublin Street
Orchard Place	1	Granville Street
Shore Road	1	Marine Street
Summit Avenue	1	Embankment Road
Turner Avenue	1	Tower Street
Utica Street	1	State Street
Palmer St. to Braintree Ave.... }		

May 9, 1933:

Chesley Road	4	Dustin Street
Clark Avenue	3	Prout Street
Crane Terrace	2	Perley Place
Greenwood Street	5	Greenview Street
Lafayette Avenue	6	Hummock Road
River Street	6	Densmore Street
Sumac Road	5	Sunset Avenue
Tabor Street	1	Thomas Street
Wendall Street	2	Bower Road
Williams Court	3	Lark Street
Williams Place	3	South Junior Ter.
Williams Terrace	3	South Junior Ter.
Winthrop Court	1	Brinsley Street
From 19 Winthrop Place to Beach }		
Winthrop Court		
From 7 Winthrop Pl. to 21 Winthrop Ct. }	1	Orleans Street

The Board after consideration voted no legislation necessary on the following streets:

Grogan Avenue, Pine Road, Walnut Terrace, Winthrop Place and Winthrop Street.

The following streets were retained for further consideration:

Greenleaf Place, Hancock Terrace, Merrymount Terrace and Rogers Street.

The Board having jurisdiction over unaccepted streets only would suggest that the City Council appoint a committee to consider the changing of duplicate names on accepted streets to complete this work.

The changes made by the Board were duly recorded in the Norfolk Registry of Deeds as required by law.

During the year the Board approved the plans of two streets on the petition of Henry M. Faxon on land off Quincy Avenue. On September 19, 1933, the Board approved the plan of Mortimer Circle and on October 23, 1933, the Board approved the plan of Hardwick Road.

Respectfully submitted,

LOUIS F. R. LANGELIER, *Chairman*,
JOSEPH N. NOVER,
AARON HOBART, JR.

WALLACE S. CARSON, *Clerk*.

REPORT OF CITY SOLICITOR

APRIL 18, 1934.

HON. CHARLES A. ROSS, *Mayor, Quincy, Massachusetts:*

DEAR SIR:—During the past year I have given opinions to the Mayor, City Council, and other departments of the City. I have appeared in behalf of the City in all cases wherein the City of Quincy was a party in Court. All legal instruments required have been drawn by me. I have taken care of the various duties of my office.

Respectfully submitted,

CHARLES R. YOUNG.

REPORT OF THE MANAGER OF PUBLIC BURIAL PLACES

JANUARY 2, 1934.

HON. CHARLES A. ROSS, *Mayor's Office, Quincy, Massachusetts:*

DEAR SIR:—The Manager of Public Burial Places respectfully submits the following financial report for the year ending December 31, 1933.

Receipts	
Care of lots	\$1,962 00
Sale of lots	8,810 00
Opening graves	7,500 00
Foundation and grading	2,383 00
Perpetual care	11,185 00
Perpetual Care Fund—Interest.....	7,114 32
Other Trust Funds—Interest.....	115 47
	\$39,069 79
Expenditures	
Manager—Salary	\$2,353 85
Superintendent—Salary	2,157 33
Clerk—Salary	686 54
Labor and grading	28,478 52
Truck—Upkeep	558 93
Cemetery—Supplies	1,589 05
Miscellaneous	399 94
Repurchase of lots	260 00
Hancock Cemetery	500 00
	\$36,984 16

In the year 1933 there were five hundred and twelve burials and sixteen removals.

A detailed statement of the Perpetual Care Investment will be found in the City Treasurer's report.

Very truly yours,

THOMAS GAMMON,
Manager of Public Burial Places.

REPORT OF CITY PHYSICIAN

To His Honor, the Mayor of the City of Quincy:

I beg to submit the following report for the services rendered by the City Physicians for the year ending 1933. This report is in accordance with the City Ordinance.

The year has been a very busy one for this department. Without question, more work has been called upon to be performed by this department during this period than for any year since the founding of the city, due to the financial condition confronting the City, State and Federal governments.

At the beginning of the year the number of patients was so great that it was impossible, with any degree of efficiency, to care for the sick, and it was therefore deemed advisable to have daily clinics at the dispensary, the dispensary being used to save the city the cost of renting additional space which was not available in any of the city-owned property. During the winter months the clinic ran, many days, over 100 patients and rarely less than 40 patients per day. With the spring and summer and the inauguration of the various forms of Federal and State Aid, the Welfare list having become smaller, the number cared for at the clinic decreased substantially. With the fall and coming winter, the severe weather increased the size of the clinic. Many days it was impossible to maintain the clinic with the efficiency desired due to the lack of space at the dispensary, both for the patients to wait their turn and the examining and treatment rooms. In all I feel with the available quarters and equipment, we were able to give better service to the sick than they would have received had the clinic been maintained at the offices of the City Physician.

I would recommend at this time that as soon as the governing body of the city deems it advisable they increase the facilities so that more forms of treatment and service may be given at the clinic, taking this added burden from the City Hospital, the hospital not being equipped for "Out Patient" treatment.

There were 5,462 house calls made. There was a total of 7,406 patients cared for at the clinic, of which 3,840 were men, 2,102 women and 1,464 children. At the Quincy City Hospital there were 199 cared for which are classified as "Out Patients," in the house there were 249 surgical cases, 94 medical cases, 128 obstetrical cases, 50 pediatric cases, 218 aural cases and 8 dental cases. There were three deaths and five were cared for at the hospital from the City Home.

There were 63 calls made to the Police Station and 84 were vaccinated for the School Department.

In conclusion, I wish to thank the nurses in the Health Department for their own time given to help in the clinic and I also wish to thank Mrs. Hazel Gifford for her untiring services.

Respectfully submitted,

ISRAEL EDELSTEIN, M.D.,
City Physician,
52 Elm Street.

JOSEPH J. CARRELLA, M.D.,
Asst. City Physician.

CHARLES G. BERGER, M.D.
Asst. City Physician.

REPORT OF THE PUBLIC WELFARE DEPARTMENT

FEBRUARY 19, 1934.

To His Honor, the Mayor of the City of Quincy and Members of the City Council:

The Department of Public Welfare respectfully submits the following report for the year ending Dec. 31, 1933.

The year of 1933 was the worst ever experienced by the Department of Public Welfare. Business was at a standstill, unemployment increasing rapidly, and Quincy's two chief industries, granite production and shipbuilding, were virtually, if not actually, shut down. The more thrifty of the unemployed had at last reached the end of their resources, and were now constrained after two years of waiting to ask for relief.

This was the condition at the beginning of the year. With demoralizing suddenness came bank holidays, a temporary freeze-up of municipal credit, and bitter winter weather.

Despite meagre equipment, insufficient working force, limited resources, the department solved each new problem as presented. It came through the year with a record of never having refused aid where it was needed; of allowing no family to go cold, hungry, or unsheltered, when their plight was brought to its official attention.

In the accomplishment of this staggering task, a peak load of 1,887 families, or over 10,000 persons, were cared for as to food and necessities. The population of Quincy is in the neighborhood of 75,000. The figures speak for themselves as to per cent of population aided.

The following is the financial statement for the year 1933:

Appropriations and Transfers

Salaries	\$21,981 00	
Expense	4,900 00	
Equipment	50 00	
Auto maintenance	3,125 00	
City Home	8,200 00	
Mothers' aid	24,500 00	
Outside aid	580,906 83	
Old age assistance	78,400 00	
		\$722,062 83

Expended

Salaries	\$21,977 59
Expense	4,899 19
Equipment	50 00

Respectfully submitted,

ROLAND BROBERG,
Commissioner of Public Welfare.

ANNUAL REPORT OF THE PARK DEPARTMENT

JANUARY 18, 1934.

HON. CHARLES A. ROSS, *Mayor, Quincy, Massachusetts.*

DEAR SIR:—The Park Department hereby submits its annual report for the year ending December 31, 1933, showing the various activities of the Board and the uses of our parks and playgrounds by the public.

Faxon Field

It has been necessary for the Park Department to spend but little on this field, as early in the Spring, Mr. Henry M. Faxon, who has so generously contributed to its development and maintenance ever since his gift of this tract of twenty-one acres to the City in 1919 and 1922, had the surface of the football field regraded and seeded and the shrub hedge bordering on Woodward Avenue, Coddington Street and the southern artery pruned and weeded. At the southerly end of the field, near the High School, further grading was done, so that a playing area might be provided for the smaller children. The grove on the westerly boundary was carefully trimmed and makes a beautiful background for the open part of the field.

The five tennis courts presented to the City by Mr. Faxon on May 28, 1929, and since that time maintained by him, under the able supervision of Mr. Almon Deane and his assistant, Mr. William Bowyer, were in constant use from April 16th to October 1st. As evidence of their increasing popularity during the first year there were 10,369 playing hours, while in 1933 the playing hours had increased to 20,636. A most successful tournament was conducted during the season for trophies donated and presented by Mr. Faxon, September 14th, to the winners of the several matches. The courts have become a recreational and social center, contributing greatly to the happiness of the people of Quincy.

Supervised Play

Supervised play was conducted for five weeks on the nineteen playgrounds under the direction of the Park Department and supervision of Franklin B. Mitchell and a personnel of nineteen female instructors. The average daily attendance was 2,500.

Winter Sports and Skating

During the Winter, ice was cleared and illumination provided for skating at Manet Lake, James S. Perkins Field, Butler's Pond, St. Moritz, and Sailors' Home Pond. Hockey rinks and nets were also maintained. The toboggan slide was kept in operation at St. Moritz.

Pond Street Playground

Early in the baseball season, residents of Mill Street complained of boys playing baseball in the street. The Department secured permission from Mr. Henry M. Faxon for boys to play on this lot of land, on which there was the remains of an old cellar. This old cellar was filled in by ash dumpings and topped with gravel. The boys who used this playground were excep-

tionally industrious and earnest, and they graded the field themselves and made a backstop, the Park Department furnishing them with a few boards and some wire.

Fore River Club House

The Fore River Club House was repaired under a special appropriation under the direction of the Commissioner of Public Works. This club house has been rented to various organizations for dances and other entertainments.

Whiton Park

At this park the grounds were maintained in good order and the hedge trimmed.

William T. Shea Park

Because of the complaints lodged by neighbors and the small area of the park, the playground apparatus was removed and settees were placed under the shade trees for the convenience of the public.

Merrymount Park

Merrymount Park was very intensively used during the past year for baseball, football, soccer, outings, track meets, drill and bowling on the green. The bowling green was opened for the first time this year, and a great many delightful games were played. The Quincy Bowling Green Club had its opponents from Milton, Boston and Portland. A tournament was conducted for which a trophy was donated by Dr. E. V. Hardwick.

Faxon Park

The sylvan effect of this park was maintained by trimming trees.

Tennis Courts

Tennis courts were maintained on the grounds of the South Junior High School, Fore River Field, Merrymount Park, Adams, Welcome G. Young and John Wendell Moses playgrounds. These were in constant use from early in the morning to sunset.

Baseball and Football

The Park Department conducted a baseball and football league in season.

Permits

The following is a résumé of the permits issued for the various playgrounds and purposes during the past year:

Fore River Field:	
Baseball, Soccer, Football	242
Merrymount Upper Field:	
Baseball, 187; Football and Soccer, 6	193
Henry L. Kincaide Playground:	
Baseball, 184; Football, 3	187
Ward Four:	
Baseball, 167; Football, 10	177
Dennis J. O'Neill:	
Baseball, 148; Football, 11	159
Merrymount Oval:	
Track, 103; Football, 27	130

Alfred N. LaBrecque:	
Baseball, 115; Football, 11	126
James S. Perkins:	
Baseball	123
John Wendell Moses:	
Baseball	116
Merrymount Lower:	
Baseball	77
Faxon Field:	
Soccer, 51; Drill, 5	56
Merrymount Pageant Field:	
Outings and Picnics	35
Fore River Club House:	
Entertainments	24
Acoustic Shell:	
Concerts	19
Merrymount Band Stand:	
Concerts	13
Merrymount Tennis Courts	7
Montclair:	
Baseball	19
Total permits issued	1,703

In addition to the above, all suitable playgrounds and a tract owned by Mr. Henry M. Faxon at Water Street and Quincy Avenue were used afternoons by the schools during the baseball and football seasons.

Co-operation

This Department has co-operated extensively with the Public Works Department and the Welfare Department. Because of the very small appropriation this Department was allotted, the only possible way it could have carried on was with the assistance of the Welfare help. During the Summer months we had an average of twenty-five Welfare men daily working in the Department. The equipment includes two dilapidated trucks, the larger of which, when not in use by the Department, has been loaned to the Public Works Department. For financial statement, reference may be had to the auditor's accounts.

Respectfully submitted,

YRJO M. MATSON, *Chairman*,

HOSPITAL SERVICE, Quincy City Hospital

Monday, Wednesday and Friday, 2-5 P. M.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The sixty-third annual report of the Trustees of the Thomas Crane Public Library is submitted herewith.

On account of the economic depression the library department was obliged to operate on a reduced budget for the year 1933, the appropriation being about fifteen per cent less than in 1932. The allotment for books was decreased over forty-five per cent, which resulted in fewer books being purchased than in any year since 1921.

The effect of this on the circulation is set forth at length in the report of the librarian. However, in spite of this, there is satisfaction in reporting that all the branches and functions of the department were kept intact and there was a total circulation of over 900,000 books. The unit cost per book circulated was the very low figure of seven cents, which shows clearly the economy in management of the department.

During the year the Lakin Square branch was moved to a more central location, and as a measure of economy the trustees were able to secure from the school department the use of the school library in the Adams Shore School as quarters for the General Palmer Branch.

The library has been fortunate in receiving the continued co-operation of the Wollaston Garden Club. This public spirited organization regraded the lawn at the Wollaston branch, set out bulbs for spring blossoming and kept the window boxes in the branch building filled with flowers throughout the year. Acknowledgment is also made of the valuable work done by men of the civil works administration, consisting of exterior and interior painting, refinishing interior woodwork and making other numerous and much needed repairs, including the mending and repair of books.

The trustees record with regret the passing away on October 6, 1933, of Miss Elizabeth A. Garrity, a member of the board. Miss Garrity was a woman of literary mind and of an educational nature and always displayed a keen interest in the work of the library.

In December the board received the resignation of Miss Mabel S. Baxter, librarian of the Baxter Branch at South Quincy. Too much cannot be said regarding the service which Miss Baxter rendered to this library extending over a period of forty-five years. A member of an old Quincy family, she displayed the utmost of devotion, the greatest of loyalty and a keen and active interest always in her work as a member of the staff. The branch, which by vote of the trustees several years ago was named for her and which she brought to so high a state of efficiency and usefulness, is perhaps the best memorial to attest the splendid quality and character of her service. The board was loath to accept her resignation but realized that her faithful work had earned a well deserved retirement. A vote of the trustees was placed on record setting forth their appreciation for the long continued service of Miss Baxter and a testimonial, hand embossed on parchment, was presented to her as a token of the esteem in which she was held.

The trustees take this opportunity to note the continued zeal and efficiency of the librarian and members of the staff and to thank the Mayor and city council for their continued support and co-operation.

Respectfully submitted

GEORGE E. ADAMS,

Chairman.

GEORGIANA CUSHING LANE,

Secretary.

REPORT OF THE LIBRARIAN

To the Trustees of the Thomas Crane Public Library:

The report of the Librarian for the year ending December 31, 1933, is herewith submitted:

First, the more satisfactory side. In spite of the reduced appropriation which the library suffered with all the other municipal departments in the "depression budget" of 1933, we have managed to operate all the various agencies for the distribution of books without shortening the schedule of hours open. We have reached a new high mark in the number of books loaned for home use, slightly over nine-tenths of a million. The use of adult non-fiction showed a decided gain, over 18,000 more books of this class being loaned than in 1932. The opening of the room at the main library, formerly the children's room, as a separate special department for our books on art, business and technical subjects has not only given us additional shelf and reading room accommodations, but has enabled us to render a special service much appreciated and complimented.

The less agreeable side is a very material result of the nearly fifty per cent cut in our appropriation for books and is represented by the marked decrease in the percentage of gain in circulation in comparison with that of recent years, and the very decided loss in the use of books in the *children's departments* at the Boys' and Girls' House and all branches.

Use of the Library

A count at the end of the year showed a total of 25,988 active borrowers' cards, a figure representing at least one-third of the population of Quincy. The total number of books issued for home use from all agencies was 901,823, an increase of 24,298, slightly less than 3 per cent as against a gain of 18 per cent in 1932. The chief factor in this decrease was the actual loss of 81,965 in the circulation of children's books from the figures of 1932, and a percentage loss in adult circulation. However, our per capita circulation remains at 12 per cent, a very high figure, exceeded by very few libraries in the country. Reading room facilities have also been taxed often beyond capacity and to properly supervise the large number of people who frequent the main library during the evening hours it has been found necessary to employ a reserve police officer during the fall and winter months.

Book Additions

Though the Thomas Crane Public Library reached the goal in 1933 of bringing its collection of books just over the 100,000 mark, the number of books purchased during the year was less than one-half the purchases of 1932 and less than those of any year since 1921. The withdrawals of books from use were also less than last year, but the children's department, where the wear and tear is necessarily severe, ended the year with 362 less books than at the beginning of 1933. Whatever the book appropriation for 1934, special attention must be given to building up the juvenile collection.

Branches

As an economy measure the General Palmer Branch Library was moved in April from the store on the corner of Sea street and

Gannett road to the Adams Shore School, the School Department very generously granting for this purpose the use of the room designed for the school library. Probably because the location is off the main thoroughfare and less conveniently accessible, the patronage has fallen off somewhat since the change was made. The Lakin Square Branch was also moved in April to a store at the corner of Adams and Beale streets, a much more central location for this district. As usual the circulation of books from the branches accounted for over 60 per cent of the total. The Wollaston and Norfolk Downs branches showed the largest gains, but all were affected by the decrease in the use of the library by the children. Very little was added by way of additional equipment during 1933, although in some branches there is need of additional shelving.

Children's Work

The loss in children's circulation has already been sufficiently emphasized and accounted for. It has not been the fault of Miss Kingman or Miss Hodgkinson, who have worked hard during the year. An innovation that meant much work was the establishment of clubs among the children who come to the Boys' and Girls' House during the summer. Projects such as book mending and dramatic readings were given and with the cooperation of the Boy Scouts a stage was fitted up in the basement, some settees loaned by the School Department and two or three plays were given. Story telling by Miss Hodgkinson and also by members of the Quincy Federation of Women's Clubs has been a regular weekly feature in the Boys' and Girls' House except for the summer. Lack of funds has still precluded the equipment of an exhibit room for the Alice L. Campbell collection of dolls presented to the library two years ago by the late Chester I. Campbell.

Work With the Schools

Due to lack of funds, no books were purchased the past year for the class room libraries. It was felt that perhaps this work should be discontinued as a measure of economy, but the requests of teachers in the fall were so urgent that we finally complied and about 100 of these libraries were sent to teachers desiring them. This was about 40 less than in previous years and the circulation naturally showed a loss over the figures for 1932. Unless an increase in the book appropriation is soon forthcoming, this work will eventually have to be discontinued.

The X Room

In February the room in the basement of the library, formerly occupied by the children's department until its removal to the Boys' and Girls' House, was opened as a special art and technical room. Because all the books in this collection are marked with an X to designate their location, the library staff have become accustomed to calling it the X room, a name that seems likely to stick. Here are located all our books on engineering, trades, industries, business, medicine, agriculture, fine arts and similar subjects, with a special catalogue. Reading tables are provided and there is an attendant on duty from 1 to 9 P. M. week days. The use of the books in this X room has been very satisfactory, especially during the fall and winter. The room has not only furnished a better service, but has relieved the shelves in the stacks which were overcrowded and has added to our reading room facilities.

Reference Work

Though no figures are kept of the number of questions that come to the reference desk at the main library or of the requests for assistance in finding books on special subjects, we can testify that there has been a considerable increase in this phase of the work of the library. The number of steps upstairs and down and over the building by Mrs. Wilford and the other reference assistants would, if measured, total a surprising figure.

The indexing of the local newspaper file by Mrs. Wilford and by Miss Blake and later by Miss Sisson has been continued during the year. It has been possible not only to catch up with the current papers, but to go back to the year 1916, when the Quincy Patriot and the Quincy Ledger were combined and to start an index beginning that year. In addition, the clipping file of important articles likely to be of more than current interest is gradually growing to assume respectable proportions and has already been found very useful.

Staff

In June, Miss Phoebe Lindberg, for six years librarian of the Temple Branch, resigned to be married to the Rev. Gustav Berglund. By her ability, her pleasing personality and her devotion to the library she had endeared herself to all her associates and to the patrons of her branch at Quincy Point. Matrimony also took from us in November Miss Aline Blake, now Mrs. Frederick Lakewitz, who had been with us for nearly three years as desk attendant, reference assistant and indexer, and whose work had also been characterized by zeal, loyalty, and friendly cooperation. Miss Lindberg's place was filled by the appointment of Miss Doris Rizzi of West Quincy, a graduate of Boston University who had for several years been employed as page and summer substitute. That of Miss Blake was taken by Miss Martha H. Sisson of Wollaston, a graduate of Simmons College School of Library Science, who also had had experience in this library as summer substitute and part-time assistant.

But special notice should be given to the resignation of Miss Mabel S. Baxter, who retired at the end of the year after over forty-five years of work in the Thomas Crane Public Library. Miss Baxter began her service to this library in October, 1888, during the librarianship of Miss Amelia Bumpus, twenty years before the Crane Memorial Library was enlarged to its present size. During all these years she was ever loyal, tireless and devoted to the interests of the library and its patrons. She holds a remarkable record of never having missed a day's work for the first twenty-five years of her service and only one day in thirty-one years. In 1921 she became librarian of the branch library, which was started in South Quincy, a position she held until her retirement. At the time she had served thirty-five years the trustees in her honor named this branch the Mabel S. Baxter Branch. I am sure that you as trustees join with the librarian, her former library associates, the present staff and her host of friends among the patrons of the library in wishing her many years of health and happiness.

There have been the usual staff meetings. When possible members of the staff have attended library conferences in Boston or vicinity and on their own time have taken university extension and other evening courses.

Other Items

The weekly column of book comment in both Quincy papers has been carried on as usual by Mrs. Wilford and as usual has been

very favorably received. Several readers have told us that they clip it each week and mail it regularly to out-of-town friends.

The bi-monthly bulletin compiled by Mrs. Wilford is no longer printed but is gotten out in mimeographed form. In its new format, with pictorial covers and illustrations designed by Miss Callahan, it has attracted much attention from librarians in many parts of the country who have made inquiries as to its make-up and cost.

The public libraries in this country have had a difficult task in these depression years to cope with the abnormal demands made upon them while operating on reduced budgets. The staff of these libraries, usually underpaid, have all the time carried on with enthusiasm, unflagging zeal and loyal devotion. That this is true of the corps of workers in the Thomas Crane Public Library I can testify. And in closing the report I desire to acknowledge the assistance, support and confidence which you have accorded me as the Board of Trustees of this library.

Respectfully submitted,

GALEN W. HILL, *Librarian.*

Saturday, 8 A. M. to 12 M.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of Quincy:

The School Committee of Quincy presents its report for the year 1933.

The Committee held twenty-eight meetings as well as numerous conferences and sub-committee meetings during the school year.

Perhaps no school system has undergone a more hectic year in regard to its budget than has Quincy. Due to the general economic conditions in the United States, school budgets have been under attack more than in any other period in the history of the public school system. The City of Quincy has been no exception as shown by the fact that when the first budget was presented to the City Council there was a slash of 22 per cent—a cut relatively higher than any other department. This impoverished the school system so much that it forced the City Council and School Committee to hold many conferences. It finally ended in an adjustment in December which permitted the schools to function to the end of the year. The School Committee at all times emphasized its willingness to cooperate with the Mayor and the City Council in their endeavor to run the city economically in 1933.

Several sub-committees were appointed by His Honor, the Mayor, to study the various phases of the budget. The first committee was composed of Dr. Daniel B. Reardon, Col. Warren E. Sweetser, and Mrs. Beatrice W. Nichols.

This committee held several meetings, went into the various phases of the budget, and reported to the full Committee on January 16 as follows:

- (1) That there be a general reduction of 10 per cent in the salaries of those employed in the School Department providing the same corresponding reduction is made in all departments of the city employees.
- (2) Recommended the elimination of the school dental clinic from the School Department at once.
- (3) Recommended the temporary elimination of the Evening Academic School, Evening Home Making School for Women, and the Evening Industrial School for Men.

All of this was accepted and approved by the School Committee except the 10 per cent reduction in salaries. The Mayor and the Committee at that time thought it more appropriate to accept a 10 per cent donation.

At a meeting of the School Committee held April 12 the following report was presented by the second special committee composed of Dr. Nathaniel S. Hunting, Mr. Robert E. Foy, and Mr. Joseph J. Kendrick.

"The Chairman, His Honor the Mayor, appointed a sub-committee at the informal conference of the School Committee held Tuesday evening, April 11, this sub-committee to take immediate action to further reconsider reductions in the budget. This sub-committee met at 2 o'clock on April 12 and studied every item on the school budget. The sub-committee made the following report, which was accepted by the Committee:

"We recommend the suspension of the automatic increases, professional improvement increments, sick leave allowance, Home Making School, and Americanization, and further reductions in the budget as follows: Administration, Health, Stationery and Supplies, Operation, Maintenance, Miscellaneous, and Trade School."

This second reduction amounted to \$44,680.

"The two sub-committees, composed of three members each, appointed by the Chairman, His Honor the Mayor, worked earnestly in the endeavor to reduce the School Budget. After careful study these two committees working independently of each other reached the same conclusion—that to operate the schools for the full year within \$1,000,000 appropriated by the City Council would require a reduction in the salaries of the personnel of the School Department for the remainder of the school year or the closing of the schools for approximately ten weeks. To close the schools for that length of time is a direct violation of the State Law and a gross injustice to the children."

In the suspension of the sick leave and the automatic increases, the Committee felt they were doing a grave injustice to the teachers, and the decrease in the purchasing of supplies and books—despite the increase in school population—an injustice to the children. Many citizens question the wisdom and advisability of the elimination of several of the other departments.

The budget as finally presented was \$1,216,033.97, of which \$1,102,532.47 was for the salaries of the personnel, and \$113,501.50 for all other expenses except salaries, or 90.7 per cent of the budget presented April 13 was for salaries, leaving but 9.3 per cent for fixed charges, operation and supplies.

May we respectfully call the attention of the citizens of Quincy to the net cost to the local taxpayer of the School Department for the year 1933. This is based on the final budget presented to the Council on April 13.

In keeping with the financing of any business concern, the receipts as well as the expenditures should be taken into consideration. Therefore, the donation by the personnel of the School Department, the moneys received into the city treasury from the State and other receipts by virtue of the school activities in all justice to the School Department should be applied to the school budget. Thereby, under such conditions, the net cost of the schools to the taxpayers of Quincy should approximate \$974,943.43.

Final budget presented to the City Council and Mayor April 13, 1933	\$1,216,033 97
Money received into the City Treasury by virtue of the School Department	\$ 150,670 54
Estimated donation of the personnel.....	\$ 90,420 00
This leaves a net cost to be raised by taxation for the entire running expenses of the school system for 1933 of	\$ 974,943 43

The net amount expended for the operation of the schools this year is considerably less than this figure.

The figure above mentioned is an average of a little over \$60 per pupil to the taxpayers of the City of Quincy.

This in itself should show the citizens the most excellent and wholesome position that the schools were in or they could not have withstood this tremendous reduction and functioned efficiently.

However, the Committee is glad to report that, taken as a whole, the school children of the City of Quincy are well taken

care of in regard to accommodations, with the exception of the two high school buildings. Both are overcrowded.

The condition at the Senior High School is better than that at the North, owing to the fact that at the Senior High School they have a smaller enrollment and at the same time are using the auditorium and six classrooms in the Coddington building. Then, too, the last of the mid-year classes will complete their work January 24. This will leave an enrollment of less than two thousand at the Senior High School, while at the North there are approximately twenty-three hundred children enrolled. There, too, approximately three hundred of the seventh grade pupils are accommodated in two neighboring elementary school buildings—the Francis W. Parker and the Quincy Schools—and are forced to come to the North for the Manual Arts and Home Economics classes.

The new wing of the North Quincy High School was recommended by the School Committee for the past few years. Tentative plans were presented to the Committee and approved by them on January 12, 1932. Owing to the financial condition of the city, these plans were held in abeyance. There is a greater need than ever before for the addition of this new wing. These plans have been approved by the School Committee.

The City Council have been requested to appropriate money for the new wing. The situation at the North Quincy High School is serious. The net enrolment for November was 2,291. The school was designed for 1,450. These conditions justify the advocacy of more adequate housing, which we hope will become possible in the near future. We recommend that the Mayor and School Committee of 1934 give this their early and serious attention. The excellent spirit shown by the pupils, the industry and the high professional spirit of the teachers, together with the cooperation of the entire supervisory staff have enabled the school officials to solve many problems without the lowering of standards. Several of the most promising pupils in this school did not return for their senior year because of these overcrowded conditions. Can Quincy long permit this condition to exist?

It is with regret that the Committee records the death of Mrs. Shirley T. Holt, a teacher in the elementary schools since 1922, who died December 23, 1933. Loyal and interested in her work, she was at all times a happy influence upon her pupils.

It is only plain justice to say we have a splendid corps of teachers doing excellent work. The Committee appreciate the services they have rendered under exceedingly trying conditions during the year 1933. The Committee have received throughout the year whole-hearted cooperation from the Superintendent and the entire teaching force. To the personnel we express our appreciation for their devotion to duty and loyalty to the children of the City of Quincy.

The foregoing report was prepared by a special committee of Mrs. Beatrice W. Nichols and Dr. Daniel B. Reardon, and was adopted as the annual report of the Committee for the year 1933.

In Memoriam

SHIRLEY T. HOLT
Died December 23, 1933
Teacher 1922-1933

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

At the outset permit me to quote from an editorial in the Boston Herald, Monday, December 25, 1933:

"Between this joyous Christmas day and December 25, 1932, a greater change has taken place in our national life than between President George Washington's first Christmas in 1789 and Herbert Hoover's last December in the White House. Only a vain person will attempt to predict the exact outcome of the vast experiments which have been initiated since March, and none but an undiscerning American will question the statement that, for good or for ill, a great social, industrial, economic and political revolution of a benign nature has taken place."

That is, tremendous alterations have taken place in the political structure of our federal and state governments and local self-sufficiency is now merely a phrase in many places.

The industrial set-up differs completely from the old order. The public schools have not escaped this maelstrom of change. The difference between the social attitudes of the past and the present day is perhaps the most striking feature of it all.

The School Committee's report states definitely that it has been a hectic year. In this statement we must concur. Amidst this woozy order of things the school maintained its composure.

We must adjust ourselves to the social thinking that must play a larger part in all our school work. In all our planning we must always be sure that the center of thought is the child. If we overlook this fact, we shall find ourselves out of step, embarrassed, and trailing rather than leading.

In the face of danger or disaster on a sinking ship we would strike down any one who attempted to save himself at the expense of the child. Children come first not only on sinking ships but in our hearts, our homes, our churches, and our schools. They are first. The race can save itself, can lift itself higher only as the children are lifted up. Boards of education and school committees and other public officials are often hard pressed financially but they cannot afford to give up the idea of the children first.

I am pleased to say that the Quincy School Committee have carried on with high regard alike for the children for whom the schools are organized and maintained and for the citizen taxpayers who support and make them possible. Services of all kinds are expected by the citizens; at the same time there is a constant, feverish demand for a decrease in the cost of these services. The services expected during the past year were all out of proportion to what the legislative body of the City felt the City was able to pay.

If the same citizen who expects much will study the records of the school and learn of its achievements, he will find that the men of today who have been in the thick of the fray for the past few years with all its varied experiences and character building forces and who have carried on undaunted are better men than ever before. Do not mistake it.

American Education Week—The parents of the children who come in closer contact with the schools than any others, when they learn definitely of the work carried on, are willing to sacrifice that

their children should be well educated. Invitations were sent out to the parents to visit the schools during American Education Week. Eight thousand parents responded. This shows the eagerness with which the parents are willing to be informed provided the proper medium for information is put before them. American Education Week proved this.

Curtailments—It was deemed expedient to purchase only enough of coal, oil, supplies, books, as was absolutely essential for the conduct of the schools for the remainder of the year. Very few if any repairs were made, that is, instead of purchasing for the ten months the schools are in session, we only purchased sufficient for the period of time between September and January, leaving us in every respect with our material supplies exhausted to begin the work in January, 1934. This is not economy.

Every possible effort was made to curtail other expenditures during the year. I am listing below the outstanding retrenchments, the elimination of:

1. Home Making School
2. Americanization Work
3. Evening Schools
 - a. Academic Evening School
 - b. Evening Home Making for Women
 - c. Evening Industrial for Men
4. Automatic Increases for 1932-33 and increments
5. Sick Leave

There is a great demand in the City today for Americanization. According to Miss Perry's figures, Quincy has 2,000 illiterates. Adult alien education is one of the most important phases of American civic life. The neglect of it today will result in increased cost to the city, state, and nation tomorrow.

The School Department and the school personnel have cooperated in every way possible in the curtailment of expenses, at the same time keeping their eye on the efficient work that is expected.

In spite of the difficulties of the year and the many trying situations which have confronted the school officials, the year has been an outstanding one in progressive improvements.

Attention to the Secondary Schools—A few years ago, the School Committee asked me to give my personal attention to the secondary schools. For the past two years I have given careful consideration to every phase of the secondary school program. A careful study of the facts obtained gave rise to further study in the different units of the school system. Thus, by carefully studying and evaluating the results obtained, we can make better the work of the school and thus solidify the entire school unit in a more compact and better adjusted school system.

The fundamentals taught in the elementary schools do not change as do the variety of subjects in the upper level. In the upper level the program is differentiated to meet the needs of the different types of school population that is ever changing in our school system. The increase in the number of offerings is absolutely essential to meet the demands of the varied abilities and needs of the pupils now in the secondary schools. Revising these offerings to meet the rapidly changing needs of the time is only keeping pace with public demands and public attitudes toward the schools.

Increase in High School Enrollment—A tremendous increase in enrollment has taken place in the secondary schools. In September, 1927, there were enrolled in grades 7 to 12 inclusive 4,193 pu-

pils. These were distributed in twelve different units, such as 7B, 7A, etc. The elimination of the midyear promotion has made it possible to carry on in six different units.

On September 11, 1933, the net enrollment in grades 7 to 12 inclusive was 6,770 or an increase in the secondary schools during the last six years of more than 61%.

	7B	7A	8B	8A	9B	9A	10B	10A	11B	11A	12B	12A	Total
1927	537	406	540	345	553	296	429	267	274	168	245	133	4,193
1933	1,222		1,212		1,276		1,224		940		896		6,770

There are several reasons for this tremendous increase in the upper level of our schools. I should place the junior high school first. It is the exploratory period in the school life of the child. There is also a transition from the compulsory to the elective studies within the junior high school unit. Then, too, the people are more determined that their children shall stay in school until they finish the high school. The recent economic conditions have played a very important part in this enrollment.

This, indeed, has given us a very complex problem because of the change in the types of pupils who are entering the high school, a problem that must be faced not only by the educators but by the community. It has also caused in Quincy a problem in the housing of these pupils. For several years we have been overcrowded at the Quincy Senior High school and the crowded condition at the North Quincy High school has become acute. The combined enrollment in the North Quincy High school of the junior and senior units is approximately 2,300 pupils, 2,000 of whom are housed in the North Quincy High building which was built for 1,500 pupils. Types of pupils of varying abilities, new offerings essential to meet the present demands, overcrowded conditions, heavier teachers' loads, have taxed the patience and the strength of the teaching personnel. The spirit with which the teachers have faced these difficulties and increasing demands deserves the highest commendation.

The North Quincy High School—The North Quincy High school is the first six year high school in the city of Quincy and one of the few in this section. The class of June, 1934, will be the first class to graduate from this school. The six year high school is an economical and efficient type. It is a particularly convenient type in moving from the ninth to the tenth year.

College Entrance Record—A study was made of the records of the college candidates in the Quincy Senior High school last June.

There were 20 who took the College Entrance Board examinations. Of the 85 examinations taken by them, over 82% were passed.

For a rating of 80-90%, honors are given; for a rating of 90-100%, high honors. The following table gives the record of Quincy candidates in comparison with that of the 16,004 candidates from all over the country:

	Per cent of 80-90 "Honors"	Examinations Rated 90-100 "High Honors"	Total Per cent of Examinations Given Honor Ratings
All candidates	16.1	5.4	21.5
Quincy "	20.0	22.3	42.3

This is an excellent showing.

In addition to those who took College Entrance Board examina-

tions, 40 pupils were certified for college entrance—19 for state teachers' colleges, 21 for other colleges.

A Program of Pupil Adjustment—A program of Pupil Adjustment has been established in the junior and senior high schools. The courses of study have been revised and enriched better to provide for the various groups of pupils with their varying interests, abilities and purposes, and better to meet the demands of the present day. Pupils have been scientifically placed within the school program so that they can work to the best possible advantage. A system of counseling has been set up to provide individual attention for every pupil. Teachers especially qualified to act as counselors assume responsibility for the pupils over a three-year period, helping them to adjust to the school, guiding them in their choices, and checking on their progress. The most recent development has been an attempt to provide more adequately for the health of the pupils. The work in Pupil Adjustment has been an outgrowth of the work of the dean of girls in the Senior High school. It is under the direction of Miss Harrison.

The several phases of the work are discussed below:

The Enrichment of Offerings—As the result of careful study, the junior and senior high school courses of study have been revised and the offerings enriched.

A new Home Economics curriculum was put into the senior high schools last year. (By curriculum is meant a course of study comparable to the college preparatory or the commercial.) The progress of this work has been outstanding. Whereas in 1931-32 there were 11 girls specializing in this department, at the present time there are 275. This is in addition to those who are enrolled in elective courses in Home Economics of whom 125 are taking Foods, 184 Clothing, 80 Art in Dress, 109 Home Management.

The Home Economics work in the ninth grade is new this year. In addition to English, Science, and Civics, the curriculum includes a survey course in Home Economics dealing with such problems as My House, My Family, My Money, Child Study, Home Hygiene, and First Aid, following the State Department outline. A correlated course in Practical Mathematics has been worked out by a committee of teachers. For girls who leave school early such a program offers much that is related to practical living. For girls who plan to continue, it leads into the Home Economics work at the senior high school level.

In the field of Art considerable has also been done. New courses have been prepared in connection with the Home Economics work—a 9th grade course in Art in the Home, a 10th grade course in Art in Dress. Advanced courses in History of Costume and Home Decoration are to be offered next year. In addition, a course in Appreciation of Art is being offered to boys and girls in the senior high schools. Miss Adams, the Art Supervisor, is now supervising the Art work through the 12th grade. She has devoted a great deal of extra time to the preparation of this new work.

With the growing recognition of training for citizenship as the primary objective of the public school, there must be more and more emphasis upon social science.

A course in Problems of Vocational Adjustment has been put into the 11th year as an elective for boys and girls. The course was prepared by Miss Wakeman and Mr. Price. It includes subject matter in the fields of economics and sociology as well as vocational information. As far as we know the course is unique. It has already attracted the favorable attention of the State Department of Education.

Work in Civics has been put into grades 7 and 8, combined with subject matter of significance for guidance purposes. This new course, which was prepared by the junior high school counselors, forms the basis for group counseling. (To be discussed later.) The course starts with the pupil himself and his new school, his privileges and responsibilities as a citizen of that school, and the larger communities of which he is a part. He learns of the educational opportunities that are ahead of him and the vocational fields into which they lead. He brings his own school problems into the classroom where they are discussed.

All of these new courses have been outlined as part of the program of Pupil Adjustment. They represent a very careful attempt to provide more adequately for the various groups of pupils and to meet the demands of the present day. They have been planned with certain objectives very definitely in mind: worthy home membership, worthy use of leisure, economic intelligence, training for citizenship. *The school program must keep pace with social and economic changes.*

In connection with the enrichment of offerings, the following point should be made: New courses do not mean increased cost. In fact, sufficiently varied offerings represent a saving in that pupils succeed in work which is suitable for them and in which they are interested. Restricting all pupils in the total number of points which they are allowed to carry, as we have done in the senior high schools this year, means that a limited number of subjects are taken as "extras."

The Scientific Placement of Pupils—A second phase of the Adjustment work has been the scientific placement of pupils within the school program and the adaptation of instruction to meet their varying needs.

Last spring information was obtained relative to the 825 pupils who were to enter the Senior High school in the fall: their previous school record, intelligence quotient, the results of standard tests, their choice of subjects, and whatever additional data were available through principals and teachers. On the basis of this information, pupils were classified and grouped according to their habits of work. This was done by Mrs. Frye. As a result, there are in the Senior High school 21 distinct groups of pupils to whom the work in all subjects is definitely adapted. Heads of departments have been given the responsibility of adapting the instruction in content and methods of presentation.

The placing of pupils within the school program so that they can work to the best possible advantage is a means of efficiency.

The progress of these pupils has been carefully followed. The records for the first term show a decrease in failure to the extent of 16 per cent in comparison with last year's grade 10 pupils in the Senior High school. A 16 per cent decrease in failure represents not only an increase in educational efficiency but a substantial saving in dollars and cents.

The problem of failure needs further study. It is a big problem and involves many considerations. At the present time the question of marks and report cards is being studied by principals and teachers.

An intensive study of the senior high school pupils who were failing last spring revealed the fact that a large proportion were carrying unreasonably heavy loads. This led to a study of all pupil loads and a ruling whereby senior high school pupils are limited in the total number of points which they are allowed to carry—a maximum of 22 in grade 10 and 24 in grades 11 and

12. (A total of 60 is required for graduation.) As a result, pupils are made to feel that taking courses is a privilege, that if they wish to succeed they must choose their subjects more carefully and take their work seriously.

The decrease in the average pupil load has been as follows:

	Senior High	North Quincy High
Grade 10.....	1.33	3.60
Grade 11.....	1.34	2.03

The total decrease in these two grades alone is 4,015.20 points, which is the equivalent of the work of 5 and $\frac{1}{2}$ teachers. This means a saving in salary of over ten thousand dollars.

In an attempt to get at some of the underlying causes of failure a series of standard tests in reading, spelling and arithmetic reasoning were given throughout the city last November in grades 3, 6 and 9. The results show surprising variation in achievement on the part of pupils in the same grade and reveal the need for an intensive study of the situation to determine remedial and preventive measures. It will necessitate sending someone into each of the schools to work with the pupils individually and in groups. This work of diagnosing academic difficulties and coaching pupils can best be done by Mrs. Frye.

The Counseling Work—As a further means of effecting satisfactory Pupil Adjustment we have set up a system of counseling.

Instead of one person in one school attempting to give attention to the girls of that school we now have a group of persons serving as counselors for all of the pupils in all of the junior and senior high schools under the direction of Miss Harrison. Teachers were selected for this work on the basis of personality and interest. They are receiving their training "on the job" through a series of conferences and general meetings.

Each counselor has a certain group of pupils for whom he or she assumes responsibility over a three-year period. The junior high school counselors meet their pupils in groups twice a week. Attention has already been called to the combining of the work in civics and group counseling.

In addition, all counselors assume responsibility for their pupils as individuals, helping them to adjust to the school, guiding them in their choice of subjects, making adjustments in their programs when necessary, and checking on their progress. A pupil in a junior and senior high school may have in the course of his three years in the school, from 20 to 25 different teachers. Each one is concerned with him in some particular respect at a particular time. The counselor is concerned with the pupil as a whole and his development over a period of time. The counselor thus supplies the one constant factor in the three-year program of the child.

In this way we have provided individual attention for every pupil, and a comprehensive guidance program has been gotten underway at no additional expense. It has been entirely a matter of organization.

The counselor serves as a clearing house for information. Facts which in themselves seem inconsequential may, when brought together, become significant. Cases presenting difficulties are referred to the School Department for investigation. Those requiring home visits are assigned to Miss Perry and Mr. Clark who have been devoting part time to this work. Their contacts and experience make them invaluable in this field. The interpreting of the school to the home, and the home to the school, is one of the most vital and far-reaching phases of the work.

Extension of the Health Work—The matter of providing more adequately for the health of pupils has demanded attention.

In the spring of 1932 Mrs. Baker was put into the Senior High school as a health instructor to work with the dean of girls. Her work has been very effective. It has included the handling of emergency room cases, the dismissal of pupils in cases of illness, the supervision of the girls' rooms, co-operation with the physical education department, the follow-up of eye and ear examinations, group instruction in hygiene, the administration of welfare work among pupils, and the investigation of all cases presenting health problems.

The health work has become a necessary adjunct to the counseling program. Similar provision should be made at once for health work at North Quincy. The work done in the Senior High school has also shown the need for a more constructive health program throughout the system.

In November a committee of junior and senior high school counselors took upon themselves the consideration of the possibilities of furthering the health work as part of the program of Pupil Adjustment. They submitted a report to the Superintendent which shows a careful study of the situation. It makes 41 specific recommendations under the following heads:

Can Anything Be Done to Make the School Environment or the School Activities More Healthful?

What Health Instruction Should Be Given Pupils in Groups?

What Can Be Done to Make Counselors More Alert to the Existence and Significance of Health Factors and to Insure Adequate Individual Attention for Individual Physical Needs?

What Can Be Done to Make the Entire School System More "Health Conscious"?

What Can Be Done to Contribute Further to the Physical Welfare of the Pupils?

The recommendations are practical and suggestive and should receive consideration as soon as possible.

The junior high school course in General Science is being revised by a committee of teachers to include group instruction in health in grades 7 through 9. A course of study in Health Education recently prepared by the State Department is available for use in the elementary grades.

Two health projects of a welfare nature which were initiated by the above mentioned committee are already underway:

1. The Home Economics departments in the junior and senior high schools are preparing a series of menus for family use of high food value at low cost. These are available to the pupils to be taken into the homes. The material distributed includes menus with food order and recipes for preparing the less familiar dishes.

2. Information has been obtained in regard to the Child Feeding Program of the Federal Emergency Relief Administration. Through local welfare departments, funds are available for the feeding in school of undernourished children whose families are on the welfare. This means that we can furnish hot lunches to those pupils in the junior and senior high schools and can provide milk during the morning session in the elementary grades.

Information has been secured in regard to all undernourished children throughout the system. In the judgment of the school nurses and principals, there are the following number of cases needing attention:

	In the Junior and Senior Schools	In the Elementary Schools	Totals
Children Whose Families Are on Welfare	31	71	102
Children Whose Families Are Not on Welfare	46	289	335
Totals	77*	360	437

* (All cases of need in the junior and senior high schools are already being taken care of.)

It seems advisable to give this matter immediate attention.

Considerable welfare work has been done among the boys and girls in the schools. The chief source of help for dental and medical attention, glasses, etc., has been a relief fund established in the fall of 1931 by the Quincy Teachers' Association. At the present time a total of \$2,388.91 has been spent. The cases of all needy pupils are carefully investigated by the school nurses and home visitors.

The work in Pupil Adjustment which has been organized during the past year and which is outlined above represents outstanding progress. A department of this kind is essential if we are to avoid waste in education.

In addition to the regular work, the supervisors report the following accomplishments during the year:

Miss Howes, the Supervisor of Music, reports the discontinuance of the Music Memory Contests and the introduction of a true Music Appreciation course in the elementary and junior high schools. Every grade in every building has been provided with the Victor records necessary for developing the course. Through proceeds derived from concerts the Music Department was able to finance the plan.

Instrumental class work has increased this year, the enrollment totalling nearly four hundred children. The instrumental instructors are particularly well equipped and adapted for the work, thereby creating a favorable reputation for class work in school. Also, the lesson fee of only twenty-five cents is a strong factor. This work finances itself and is of no expense to the city. Classes are offered for all orchestral and band instruments and for piano. Orchestras are available to pupils of all schools—elementary, junior and senior high. Both senior high schools have a school orchestra and band and also a training orchestra. These senior organizations were awarded first prizes at the New England Band and Orchestra Contest in May.

Miss Dellicker, the Grammar Supervisor, reports the completion of three units of work prepared by a committee of teachers—one in Reading on Good Citizenship, one in History on the Story of Records, one in Geography on the Teaching of China.

Under the direction of Miss Adams, the Art Supervisor, an exhibit of the drawing work in grades 1 through 12 was prepared and displayed for the Quincy Art League. The course in Art Appreciation, which was started last year in grades 1-6, has been ex-

tended through grades 7, 8 and 9 in the junior high schools. The other new courses offered by the Art department have already been discussed.

Dr. Drew, the School Physician, gives the following report of the follow-up clinic of the State Department of Health held in February:

Number of children recommended for re-examination.....	95
Number of children re-examined	87
Number of children improved	82
Number of children unimproved	5
Number of children X-rayed	89
Number of children tested	82
Number of reactors	69
Number of non-reactors	13
Number of children recommended for sanatorium treatment	1
Number of children recommended for summer camp	10
Number of children discharged from the clinic	4
Number of children referred to Dispensary Clinic	5
Number of children referred to Out-Patient Department, M. G. H.	1

With the assistance of Dr. Frederick Costanza, the pupils of the ninth grades were examined last spring.

During the fall months the children of the first grades were examined.

Due to the limited budget, the campaign for the prevention of diphtheria was omitted in the spring—also the physical examinations of pupils in the seventh grades.

According to the report of Mr. Whiting, Supervisor of Physical Education, nearly five hundred pupils in the Senior High School, selected by various tests in May, 1932, attended special classes in physical education four times weekly. The primary purpose of these classes was to improve physical vitality, correct defects and develop pupil morale. Retests in January, 1933, revealed that the 500 pupils actually improved an average of over 20 per cent; some as much as 50 per cent.

Following the same testing procedure as in 1932, tests were given and the organization of physical education classes for September, 1933, was based upon results of those tests.

With the opening of the 12th grade this year at North Quincy Senior High, inter-school athletics began. These games will tend to develop a greater school and civic spirit.

Lists of suitable teaching aids available for grades 2, 3 and 6 have been distributed to the teachers of those grades. Mr. Krasker, the Director of Visual Education, calls attention to the fact that education goes on more than five hours a day, that in order to counteract the present undesirable influences of the commercial moving pictures the schools must assume some responsibility for the educating of children to a better appreciation of films.

Annual reports were received from the principals of the Senior High School and the North Quincy High School.

In referring to the work in Pupil Adjustment, Mr. Ernest L. Collins, Principal of the Senior High School, says: "We have used every means—class teachers, counsellors, visiting teachers and contacts with the junior high schools, to adjust the pupils of the entering class to the school and the result has been very gratifying. On the whole, there has been an improvement in scholarship and many possible failures have been avoided."

At the graduation exercises in June the following awards were made:

Washington and Franklin Medal for Excellence in American History to William A. Coates.

Wollaston Woman's Club scholarships to Elizabeth E. Smith and Gladys W. Leonard.

Quincy Women's Club scholarships to Joan E. Rigby and Alli M. Puro.

L'Eco Club Scholarship to Anna M. Palmisano.

Jewish Scholarship Club of Quincy scholarship to Isadore Schwartz.

Quincy Business and Professional Women's Club scholarship to Linnea M. Allgorin.

Squantum Women's Club prizes to John R. Young and Isabel M. Allen.

The Quincy Women's Club prizes for the boy and girl who, in the opinion of the faculty and their class, had contributed most to the school, to Vincent J. Barry and Anna V. Danielson.

Mr. James S. Collins, Principal of the North Quincy High School, reports on the reduction of failures as follows: "The number of failures has been reduced to a gratifying degree. We feel that money has been saved by this reduction. We feel that discouragement, which often leads to undesirable attitudes, has often been eliminated, and that courage and enthusiastic effort have taken its place."

The first scholarship to be awarded is that of \$50.00 from the Atlantic Women's Club—to be given to the most outstanding boy or girl in the northern part of our city.

The Assistant Superintendent, Mr. Albert H. Cochrane, has reported for the State-aided schools and special classes.

Respectfully submitted,

JAMES N. MUIR,
Superintendent of Schools.

The Day Trade School

The depression from which the country is slowly recovering caused some people to attack vocational education. It is not, then, out of order to restate some facts in regard to Vocational Education.

Vocational schools in Massachusetts came into being as a result of a Commission appointed by Governor W. L. Douglas in 1905, consisting of nine members chosen from leaders in labor, finance, law, agriculture, business, social service, economics and education. The Commission made such a convincing report that the Legislature of 1906 authorized Governor Guild to appoint a "Commission on Industrial Education" for a three-year term. This Commission was empowered, among other things, to initiate and establish schools "with the cooperation and consent of local authorities."

The "Commission on Industrial Education," which in its three years' regime established sixteen evening and four day schools for industrial education, was not composed of professional educators. The members were A. Lincoln Filene of Boston, a merchant; Charles H. Winslow of Fitchburg, vice-president of the Massachusetts State Federation of Labor; Carlton D. Richardson of North Brookfield, a member of the State Board of Agriculture; Mrs. Mary Kehew, president of the Women's Educational and Industrial Union (Mrs. Kehew soon resigned because of ill health and Milton P. Higgins, president of the Norton Company of Worcester and other manufacturing enterprises, was appointed her successor). Later Miss Emily G. Balch, Professor of Economics and Sociology at Wellesley College, was added to the group. The Commission was headed by Dr. Paul H. Hanus, Professor of Education at Harvard University.

The central thought in the minds of Governor Douglas and the members of the original Commission was that "... The advance in scientific and mechanical production had far outstripped the ability of industry to train its workers; that apprenticeship was already a dying institution; and that the haphazard and uneven preparation in skilled and industrial intelligence was already a serious problem." They also took a decided stand against prevalent confusion between technical and vocational education.

Massachusetts was a pioneer state in the field of industrial education putting into actual practice a felt need recognized by many of the country's leading men. In 1907, the President, Theodore Roosevelt, in a letter to the President of the Massachusetts Institute of Technology, wrote: "No one can look at the peoples of mankind as they stand at present without realizing that industrial training is one of the most potent factors in national development—surely this means that there must be some systematic method provided for training young men in the trades and that this must be coordinated with our public school system."

Organized labor had been studying the subject for years. In 1908 the American Federation of Labor appointed a special committee with John Mitchell as chairman, which studied the question for three years. The final report, recommending industrial training at public expense, was adopted by Labor in the convention of 1911. The report contains these significant statements. "If the American workman is to maintain the high standard of efficiency the boys and girls of the country must have an opportunity to acquire educated hands and brains such as may enable them to earn a living in a *self-selected* vocation and acquire an intelligent understanding of the duties of good citizenship. No better investment can be made by taxpayers than to give every youth an op-

portunity to secure such an education. . . . The ninety per cent who are going into manual occupations have the same right to the best preparation for their life's work that the state can give them as have the ten per cent who go into the professions."

The Quincy Trade School, founded one year after the above statement was made, gives such an opportunity to boys in Quincy and its vicinity.

The quoted statements given above are just as true today as they were then. An intelligent reading of the codes so far adopted under the N. R. A. will convince most people that industry has not adequately provided for the "learner" and that apprenticeship is nearer dead today than it was in 1906. Apparently industry has assumed that most of the industrial training will be given by the already organized "Vocational Schools."

Our present President, Franklin D. Roosevelt, is in accord with the general plan of vocational education for in a nation wide radio address broadcast from Albany during the presidential campaign he said, "I go along with the thought that we must increase vocational education for those children who otherwise would not receive adequate training. That kind of vocational training will raise the standards of worthwhile employment not only now but also in normal times. . . . We know that already many professions are over supplied and it is a fair guess that during the coming generation we shall devote more attention to educating our boys and girls for vocational pursuits which are just as honorable, just as respectable, and in many instances, just as remunerative as are the professions themselves."

There are three classes of boys that the Day Trade School serves:

- (1) The boy who desires to enter industry through a proper knowledge of and ability in some trade.
- (2) The boy to whom the usual high school work would be difficult, either through his lack of interest or because he learns more readily by "doing" rather than from books.
- (3) The boy who, through force of circumstances, is obliged to acquire something of a salable nature as soon as possible.

With all codes so far adopted under the N.R.A. prohibiting children under sixteen entering industry, there will be an ever increasing number of young people remaining in school. Trade education offers a golden opportunity to many.

The following table shows the enrollment and average membership for the past five years:

	1928-29		1929-30		1930-31		1931-32		1932-33	
	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.	Enrol.	Av. Mem.
Auto Mechanics..	43		48	29.3	37	30.85	54	42.79	55	47.73
Electrical	35		38	32.5	37	32.64	37	31.12	34	31.30
Machine	40		31	25.7	38	24.95	16	12.96	22	16.49
Machine (Co-operative)		4	2.	5	1.	2	1.	2	1.
Plumbing	36		39	29.1	29	23.76	31	24.28	38	25.79
Sheet Metal.....	20		18	16.3	18	16.67	21	15.38	19	14.32
Woodworking	76		68	47.1	56	40.99	53	36.57	60	48.03
Total Enrollment	250		246		220		214		230	
Total Average Membership.....		192.6		182.0		170.86		164.10		184.66

The average membership of 184.66 is the largest the school has had since the school year 1928-29, and is an increase of 12.5 per cent over the membership of 1931-32. The average membership for the first four months of the present school year is 219.59, which is an increase of 15.2 per cent over the same period last year. In several departments there is a waiting list, all the boys that can possibly be cared for having been enrolled. All indications point toward a need for expansion, not for curtailment.

Because this school is State-aided, the State lays down certain broad principles and rules for its guidance. To insure the practical nature of the work, the State requires that all trade and related work teachers shall have earned their bread and butter at the trade they teach for at least eight years. When tradesmen protest against the activities of the trade school they should remember that because of this school twelve high class tradesmen have been removed from competition with them. Should they be forced back into the trade their combined wages would be much more than the labor value of the work done by the boys they teach. The State also requires that the major part of the work be productive, that is, on real jobs that can be sold for real money. It further limits the number of pupils per teacher—in the past the limit was sixteen for a shop teacher and twenty-four for related work teachers.

The first cost of this type of education is undeniably higher than that of the average high school. To offset this the Federal government assists communities in paying a small part of the teachers' salaries and the State pays back to the town or city one-half the net cost. The final cost to any individual community is thus less than for regular secondary education.

Although the average membership of the school for the school year 1932-33 increased 12.5 per cent the total cost was decreased by \$3,580.85 to \$47,163.74, and this total cost was further reduced as follows:

Tuition for non-residents	\$9,065 00
Cash for products made in the school.....	879 22
Aid from the Federal Government	1,739 50
Aid from the State of Massachusetts.....	17,642 03
Miscellaneous receipts	59 60
Total receipts	\$29,385 36
Net cost to the City of Quincy.....	17,778 39

In addition to the receipts shown above the Trade School teachers donated to the city \$2,496.30 for the school year 1932-33. However, when speaking of net costs the donation has not been included.

While the average membership for the year increased 12.5 per cent the net cost decreased 11.7 per cent. The total cost of the Trade School has been steadily declining due (until the past year) to a decline in enrollment and more efficiency in administering the school. Now the membership has again begun to increase and indications point to the largest membership in the history of the school for the present school year. It will be difficult to continue to reduce total cost in face of an increased enrollment without decreasing the quality of service rendered.

The Home Making School

Due to economy measures forced upon it, the School Committee voted to close the Home Making School at the close of the school year in June, 1933. The following table shows the average membership of the school for the eight years that it came under my supervision:

	1925- 26	1926- 27	1927- 28	1928- 29	1929- 30	1930- 31	1931- 32	1932- 33
Ave. Mem....	41.86	43.11	47.87	51.06	50.2	57.4	63.1	59.94

From the school year 1925-26 to 1931-32 the school increased 50.7 per cent. There was a slight falling off in the figures of 1932-33 due to the uncertainty of the school's future. Many girls did not enroll who otherwise might have done so and others left school and went to work. For the first five months of the school year the average membership was 64.4 indicating that it was functioning at capacity enrollment (a membership of sixty really represents the number that could be most efficiently handled in the building). Where the enrollment usually increased in February there was only a slight increase. On May 1, 1933, there were actually 56 pupils who were members of the school. When school closed on June 23 there were only 41 members—fifteen had obtained jobs, or being over sixteen, decided to remain at home. Some of the withdrawals during May and June were normal for every year some girls feeling they had acquired something they could sell obtained jobs and left school.

Of the 41 pupils in school on June 23, eight had completed the course and graduated. Of that group four are in the Senior High School, one in the Boston Trade School, and three decided their school education was complete and did not enter any school in September. Thirty-three pupils had not completed the work of the school. Seven of these girls are now enrolled in the Senior High School and one in the Braintree High School, five are enrolled in the Boston Trade School, six are enrolled in one of the Junior High Schools, two moved away and 12 have withdrawn from school. Of the 12 who have left school some have obtained work and others being over 16 and not required by law to attend school have decided that they have been in school long enough.

It is a great satisfaction to know that all the regular teachers of the school are placed. Two are teaching in the South Junior High School, Miss Atkins is teaching cooking in the Southbridge High School, Miss Woods is teaching dressmaking in the Boston

Trade School, and the former director, Miss Cowles, is Supervisor of Home Economics work in Cranston, Rhode Island.

The total cost of the school for the school year 1932-33 was again reduced, this time by \$1,052.49 to \$13,231.38. This total cost was reduced as follows:

Tuition for non-residents.....	\$570 00
Cash for products made in the school.....	606 59
Aid from the Federal Government.....
Aid from the State of Massachusetts.....	6,020 21
Miscellaneous receipts	9 45
<hr/>	
Total receipts	\$7,206 25
Net cost to the City of Quincy.....	6,025 13

The net per capita cost for the year was \$100.52, which is \$8.80 more than the net per capita cost for the school year 1931-32. The increase in the net per capita cost is due to the fact that the City received no aid from the Federal Government because the school was discontinued. Last year the Federal Aid amounted to \$1,084.93. Had that amount been received as in past years, the per capita cost would have been about \$18 less.

The city also received \$598.17 from the Home Making School in pay donations for the school year 1932-33.

The Continuation School

The Continuation School completed its first full year as a part time school, Mr. Dana B. Clark, the Director, devoting time which amounted to about one day a week. Mr. Clark spent four hours per week teaching the boys, supervised the work of the girls and made the necessary follow-up visits. His follow-up work with the Continuation School pupils fitted in nicely with the home visiting work which he did with the Senior High School pupils. It was also possible to place all the girls in one division, which reduced the teaching time of the two part time teachers to two hours per week. The academic teacher of the girls spent some time making the necessary home visits.

The decline in Continuation School enrollments is shown below which covers the past ten years:

	1922 1923	1923 1924	1924 1925	1925 1926	1926 1927	1927 1928	1928 1929	1929 1930	1930 1931	1931 1932	1932 1933
Boys	77	71	127	67	84	95	82	72	45	29	13
Girls	27	28	50	26	56	62	65	54	47	42	32
Total	104	99	177	93	140	157	147	126	92	71	45
Hrs. of Service						11860	7996	7148	6132	4056	2208

The hours of service are a better indicator than the enrollment for some pupils become sixteen during the year and thus drop out. The enrollment does not show the reduction but the hours of service do.

The N.R.A. codes which so greatly changed the character of the Continuation School in other communities this fall by setting the

age limit at sixteen affected the Quincy Continuation School but slightly, as most of the boys became sixteen during the summer and the sixteen year limit does not apply to domestic service. Practically all the girls enrolled in our Continuation School were engaged in domestic service either on home permits to aid in their own home or on domestic service permits for housework away from home.

There are enough girls still in the domestic service to continue one division of girls as heretofore. Only two boys were enrolled this fall, one of whom became sixteen in December. One boy was placed in the Trade School on part time and the other in the special class at the Central Junior Portable. Mr. Clark, while relieved of the actual teaching, is responsible for the boys, but has more time for home visiting and has been able to handle the attendance service for the girls.

By going on part time for a full year the total cost of the school was reduced 59 per cent to \$987.04. Being a State-aided school the cost was further reduced thus:

Cash for work done	\$1 77
Aid from the Federal Government	179 84
Aid from the State of Massachusetts.....	402 71
Total receipts	\$584 32
Net cost to City of Quincy.....	402 72

The salary donation from the Continuation School for the school year 1932-33 amounted to \$40.45.

The State Department of Education has approved a transfer of the Federal funds, which had been allotted to Quincy to help pay salaries in the Evening Industrial School and Evening Home Making School for Women, to the Continuation School. This sum is large enough to pay the women part time teachers and part of the director's salary.

Evening Industrial School for Men

The Evening Industrial work has been discontinued by vote of the School Committee after the school year 1932-33. It had practically eliminated itself as the following table of enrollment indicates:

	1928- 29	1929- 30	1930- 31	1931- 32	1932- 33
Automobile Mechanics.....	20	18	24
Electrical Wiring.....	18
Machine Drawing and Shop					
Mathematics	43
Machine Shop Practice.....	26	18	15	18
Plumbing	33	20	15
Roof Framing.....	22
Sheet Metal Drafting.....	23	19	27	52	14
Ship Blue Print Reading....	44	53	156	113
Totals	211	110	198	234	38

The Sheet Metal Drafting class lasted but four and one-half weeks and was closed because of poor attendance. The Automobile class was maintained for nineteen weeks.

For the year ending August, 1933, \$556.11 was expended for the two classes above. This cost was reduced as follows:

Tuition for non-residents	\$93 60
Aid from the Federal Government.....	56 76
Aid from the State of Massachusetts.....	202 87
<hr/>	
Total receipts	\$353 23
Net cost to City of Quincy.....	202 88

Evening Home Making School for Women

The discontinuance of the Evening Home Making classes, while a necessary economy on the part of the School Committee because of a lack of funds, is in my opinion an actual economic loss to the community. During the school year ending in August, 1933, the women enrolled in the classes took raw material valued at \$3,760.19 and turned it into finished products worth \$13,300.69, an actual economic gain of \$9,540.50. It is true that \$104.13 represents the increased value of the cooked food as contrasted with the raw and the cooked food was eaten by the women, so it might be said that no needed value was created. In many cases, however, I know that many of the women ate a light evening meal the night they went to cooking class because they knew they would eat again later. But deducting the \$104.13 leaves \$9,436.37, which represents increased values created in the clothing classes and home decorating classes which were actually put to use in the home.

Old discarded clothing was renovated and made into useful, attractive garments, which were actually worn by members of the household. Furnishings for the home were made out of old and new materials, making the home more attractive and comfortable for the entire family.

In the food classes the use of "left overs" and the cheap cuts of meat were stressed. Home management and budgeting the income were introduced. Thus many women were able to serve better food to their families, dress themselves and their children better at less actual cost, and make their homes more attractive. This helped to keep the family more cheerful and contented at a time when it was essential that the morale of the community be maintained.

I do wish to stress the fact that no school funds were used to purchase any material in these classes. The women furnished all the material used in the clothing and home decorating classes and each woman in the cooking classes was assessed twenty-five cents per lesson, out of which fund all food used in the cooking classes was purchased. The cost of these classes represents the cost of teachers' salaries, supervision, janitor service, heat, light and power.

The following table gives the scope of the work and the enrollment:

	1928- 29	1929- 30	1930- 31	1931- 32	1932- 33
Clothing	719	522	538	544	476
Foods	153	150	87	150	166
Home Decoration	42	100	126	166	152
Home Nursing	37	30	94	61	52
Totals	951	802	845	921	846

The home nursing classes, while creating no economic values that could be actually appraised in value, probably were more effective than one would think because the knowledge obtained by the women in the classes undoubtedly helped to keep the families which they represented in better health. Good health is always an economic asset.

One food class was an innovation. It consisted of men who were members of the various companies of the Massachusetts State Guard. They were given a ten lesson course in quantitative cooking so that they might be more efficient cooks during the required summer camp period. This course was requested by officers of the State Guard, and the cost of the raw food material was met by the different companies. Many of the men came from out of town and their tuition was paid by the community from which they came.

The table of enrollment shows a decrease which amounted to 8.9 per cent, but by strict economy and closing classes where the attendance was poor the total cost was reduced 23.3 per cent over that of last year to \$5,971.21. This total cost was reduced as follows:

Tuition for non-residents.....	\$352 00
Aid from the Federal Government.....	673 97
Aid from the State of Massachusetts.....	2,472 62
<hr/>	
Total receipts	\$3,498 59
Net cost to City of Quincy.....	2,472 62

In addition to the receipts shown above \$45 of the supervisor's salary was donated to the city.

Americanization Work

During the school year 1932-33, the department spent \$3,772.04 on Americanization work. This is a reduction of 19.5 per cent over the total spent in 1931-32. The total enrollment was 445, just 100 less than the previous year, a decrease of 18.3 per cent.

The State will reimburse Quincy \$1,718.72, which makes the net cost of adult alien education \$2,053.32. In addition to this \$157.50 of the Supervisor's salary was donated to the city.

For the \$3,772.04 spent in the work, the department employed a supervisor and nine teachers who carried on nine evening school classes, four factory classes, three home classes and one class for unemployed men.

The enrollment of 445 includes 28 minors, but the law under which the State reimburses the communities for adult alien education does not permit reimbursement for minors. It cost \$230.72 to teach the minors English. According to State law all persons between 16 and 21 years of age who cannot read and write English as well as a sixth grade pupil must attend at least evening school. It is much easier and cheaper to teach these minors with the adult aliens than to organize a special class for them in the evening academic school.

The evening school classes were maintained for twenty weeks but the factory classes, which were held at the Fore River plant, were closed earlier because so many men were laid off that attendance became too small to justify holding classes.

The number of each nationality enrolled is shown in the table below which, unfortunately, does not include the 74 men in the unemployment classes:

Chinese	2	Polish	3
Canadian French	5	Portuguese	4
English speaking countries	58	Russian Jew	12
Finnish	46	Russian (not Jewish).....	8
German	8	Spanish	1
Greek	5	Swedish	20
Italian	172	Swiss	1
Lithuanian	1	Syrian	8
Mexican	1	Born in U. S. but lived for	
Norwegian	5	many years abroad.....	11

Thirty-five of the above group were unable to read or write in any language at the time of enrollment. A study of the nationalities enrolled will show that there are sizable groups from nationalities known to be Bolshevistically inclined. Now that the opportunity for these people to be taught by teachers absolutely loyal to American traditions has been removed, one wonders by whom they are being guided in the journey toward citizenship.

After the regular classes were closed, Miss Perry organized and taught the Mothers' classes and also a class of 74 unemployed men. Prominent men and women addressed the men and at each session the teacher answered questions and assisted the pupils with their problems. The project was worthwhile and helped to sustain the good morale of the men.

The usual excellent cooperation was given by the various clubs, organizations, Federation of Women's organizations and the Public Library.

In closing this report it is right that high tribute should be paid to the work Miss Perry has done in aiding the adult aliens to become good citizens. The quality of the work done in Quincy is known throughout the State. Even now Miss Perry is giving freely of her own time and is of great assistance to people desiring to take out citizenship papers. Her work has been invaluable in creating a right attitude in the hearts of Quincy's foreign born population. I hope the time is not far distant when it will be made possible for Miss Perry to devote much of her time in directing the education of the adult alien.

The Evening Academic School

Reducing the evenings of attendance from three to two seems to have been justified by the increased enrollment and attendance. The following table shows the enrollment and attendance figures for the past five years:

	1928- 29	1929- 30	1930- 31	1931- 32	1932- 33
*Total Enrollment.....	347	486	593	744	854
*Average Membership....	180.8	229.3	281.3	368.59	478.15
*Average Attendance.....	134.8	170.2	205	271.81	337.35
*Per cent of Attendance	74.5	74.2	72.8	73.74	70.55

*Figures of Evening Gymnasium classes not included.

The average membership of 478.15 is 29.7 per cent greater than the average membership for 1931-32 and shows a growth of 164.4 per cent in five years.

No evening schools were opened this fall so the cost of \$1,430.50 for the fiscal year 1933 only represents the cost for the ten weeks the school was maintained during the first three months of the year. For the school year 1932-33 the Evening Academic School cost the city \$3,321.75. For that amount the department maintained eight gymnasium classes, requiring six different teachers handling an average membership of 340.08, in addition to the regular academic classes which required in October, 1932, nineteen teachers and a principal to teach a membership of 698.5 in thirteen different subjects.

The membership always dwindles in the academic classes as the evening school year advances and the teaching force is reduced. For the week ending March 17, 1933, there was a membership of 202, which required ten teachers and a principal.

Mentally Retarded Pupils

During the school year 1932-33 one hundred seventy-nine new children were referred to the various State Clinics for mental examinations, and fifteen children previously examined were referred for re-examination. Thirty-one children were examined by the Guidance Clinic, twenty-nine by the Habit Clinic, and one hundred thirty-four by Dr. Patterson of the Wrentham Clinic. The Guidance and Habit Clinics handle cases of children who do not adjust themselves well to their environment either in school or at home. They may or may not be mentally retarded.

Dr. Patterson of Wrentham examines children definitely believed to be three or more years mentally retarded. Of the one hundred thirty-four children examined by Dr. Patterson, seventy-one were found to be definitely mentally retarded, forty-two were in the dull normal class and twenty-one were found to be normal mentally. There are some teachers who still hesitate to refer children to Dr. Patterson for fear some unfortunate label will be placed on the child. It is a very significant thing that the Clinic found twenty-one children normal mentally, believed by the teachers to be mentally retarded. These twenty-one children may not be doing good work for many various causes, but at least it has been established that the children have sufficient mental power to do good school work if other causes of failure can be removed.

On December 1, 1933, there were one hundred seventy-five children in the school system known by individual examination to be three years or more mentally retarded. On October 1, 1932, there were one hundred fifty-nine. One hundred sixty-one mentally retarded children are being taught in special classes as follows:

Adjustment Class in Junior High School.....	10
Opportunity Class for Older Boys.....	35
Opportunity Class for Older Girls.....	18
Ungraded Opportunity Classes (6 in number).....	98

Every effort should be made to discover the mentally retarded child early in his school life for it is much easier for all concerned to make the necessary educational adjustments while the child is in the primary grades. Much progress has been made in Quincy, but achievement tests given this fall and during the fall of 1932 have indicated that many pupils probably mentally retarded have found their way into the Junior and Senior High Schools where bitter disappointment is apt to await them. Unless the work is adapted to their needs they often acquire poor attitudes toward life and tend to slow up the educational progress of other pupils.

APPENDIX A
STATISTICAL DATA

1. Financial Statement for the Fiscal Year Ending
December 31, 1933

I. REGULAR AND STATE-AIDED SCHOOLS

Appropriated by City Council	\$1,000,000 00

¹Cafeterias, gymnasiums, special rooms and shops: Senior High, 15; Trade, 6; North Quincy High, 18; Junior Highs, 27; Thomas B. Pollard, 1; Willard, 1.

²Assembly hall used for classroom purposes.

³Valuation of Continuation and Trade Schools' furniture included in Senior High School valuation.

⁴Past wing addition occupied September, 1931.

⁵Quincy Point Junior High School valuation of land and building and the square feet in lot included in Daniel Webster School figures.

⁶Addition of four rooms occupied September, 1931.

⁷Addition of nine rooms and assembly hall occupied January, 1930.

⁸Auditorium and four classrooms used for Senior High Commercial classes.

⁹Addition of four rooms occupied September, 1930.

¹⁰Located on Senior High School lot. Valuation of land and building included in Senior High School figures.

¹¹Addition of ten rooms occupied September, 1924.

¹²Addition of nine rooms and assembly hall occupied March, 1930.

¹³Addition of eight rooms and assembly hall occupied September, 1932.

7. Report of the Dental Clinic, Coddington School,
January 1 to February 18, 1933*

Number at present registered for treatment.....	2,413
Number of new patients during year.....	115
Number of completed patients for year.....	30
Total number of visits to clinic during year.....	623

FILLINGS

Number of amalgam fillings	92
Number of cement fillings	8
Number of synthetic fillings	1

EXTRACTIONS

Number of permanent teeth extracted	16
Number of temporary teeth extracted	199
Number of patients' teeth cleaned	348
Total number of operations during year.....	664
Number of first and second grade children examined by School Dentist	891

*Discontinued because of drastically reduced budget.

8. Report of Work of the School Nurses
January 1 to December 31, 1933

Children examined for various causes.....	51,193
Home calls made	1,694
Children referred to School Physician	30
Children referred to school dental clinic and private dentists	300
Children referred to eye and ear clinics	408
Cases of corrected vision	188
Children referred to various other clinics	192
Arrangements made for tonsil and adenoid operations.....	118
Contagion found and reported	165

9. Report of Sight and Hearing Tests, October, 1933

School	Number Examined	Defective in eyesight	Defective in hearing	Parents Notified

APPENDIX B

LISTS OF GRADUATES

1. Senior High School

(a) JANUARY, 1933

194

Ruth M. Alexanderson	Thomas LeRoy Eaton
Linnea M. Allgorin	Frederick Long Farrell
Enid Dorothea Anderson	Eleanor Favreau
H. Gertrude Avery	Charlotte Fay
Elizabeth Ilvia Ayres	Abbott W. Fish, Jr.
Dorothy Juliette Badot	Finn Follum
Louis Barone	Esther Beverly Fragaer
Helen M. Bates	Dorothy Harriet Francer
Harold Belknap	Josephine M. Gangi
Harold Bent	Louise L. Gaudreau
August Bergonzi	James Austin Geekie
Adelaide Marie Biloni	Mark Joseph Gill
William Cameron Bissett	Bessie Anne Gioncardi
Muriel Mae Blackmore	Beatrice Goldstein
Frances M. Bosworth	Anna C. Goodsell
Charles E. Bresnahan	Allen C. Gotlieb
Margaret A. Brunet	Elizabeth Lucretia Greene
Louise Ellen Buck	Evelyn Gustavson
Betty Butterworth	Fannie Guzzi
Annabelle Marie Cameron	Kathleen Hansen
Aida N. Cassellini	Winifred Claire Healy
Helen Rita Casellini	Lillian C. Hedein
Bernard Castleman	John G. Hedman
Helen Winifred Chesebro	Ella A. Heikkila
Dorothy Elizabeth Coburn	Joseph H. Hoffman
Virginia T. Cochrane	Grace E. Holton
Francis Paton Condry	Armas K. Hill
Norma Margarette Rae Cook	Harriet Ardellis Hobart
James N. Coriati	Dorothy Hunt
Elizabeth Cull	Allan Jenness
Joseph Ambrose Cunniff	Dorothy Hannah Johnson
Katherine Bernidette Cunniff	Dorothy Lillian Johnson
George T. Cushman	Grace Maye Johnson
Adeline D'Alessandro	Henry Lawrence Johnson
Lloyd H. Darling	Norman O. Johnsen
Lawrence Ivan Davidson	Ruth Anna Johnson
Ralph B. Dearnaley	Vieno Dagmar Josephson
Virginia R. DeLuca	Phyllis Keene
Dorothy A. DellaLucca	Gordon Kelley
Julia Italia DeSimone	Arthur Fredrick Kelley
Anna Claire Devine	Donald John Kelsch
Mary Louise DiBlasio	Robert B. Kessen
Yola M. DiCesare	Anne Mary Kirbirstis
Olga Di Troia	Alfred Benedict Knasas
Rita A. Doane	Sylvia Emma Koose
William E. Doherty	Rose Kurtzman
Eleanor Louise Dolan	Stephen J. Kusser
Olive G. Dunstan	Wilho Kyllonen

Charles T. Lambros	Eleanor Jane Quinn
Marie Latini	Marion Louise Rogers
Charles Walter Lehto	Benjamin Rudner
Aune Irene Leppala	John Ryan
Martha Schrender Liljegren	Margery May Sandberg
Francis Charles Lindberg	Harriett Elliot Sanders
Henry Emil Linden	Joseph Santagata
Lynwood Littlefield, Jr.	George N. Savela
Elizabeth A. Lord	Elizabeth Louise Scavo
James Frederick McCormick	Mary Rose Marie Schneiderhan
Edmund Saint-John McCarron	Robert R. Sealund
Margaret Marion Macdonald	Mario Serafini
Lillian McGarry	Marjorie A. Sferruzza
William Robertson McGhee	Jessie Shaevitz
Alexander N. McGuire	Max Shangold
Leonora Violet Maggiani	Majorie Stewart Shunk
George Edward Malloy	Marie Regina Singler
Evelyn Irene Maloney	David Skoler
Bernice Jeanette Martineau	Elizabeth Ellen Smith
Hazel Olivia Matson	Genevieve M. Smith
Helen Mary Mattulina	Gertrude A. Smollett
Beatrice Annie Mayo	Dorothy G. V. Soderberg
Livia A. Mazzola	Barbara Spear
Doris Arlene Means	Margaret Speed
Frank H. Meda	Althea Eden Stokes
Grace E. Mitchell	Edward James Stoner
Marjorie Irene Mitchell	Jane Louise Sullivan
Mary Stewart Montgomery	Peter Francis Sullivan
Dorothy Alice Morris	John E. Swett
John Adam Moyes	Ethel May Taylor
John D. Murchison	Hazel Agnes Taylor
Naomi Sawyer Newall	Stanley Parker Thompson
Ruth Nickerson	William Henry Thorn
Joseph L. Norton	Edward Francis Tibbetts
Eleanor M. Nugent	Ida Tolpin
Harry Leslie Nylen	Margaret Ferguson Turner
Phyllis M. O'Brien	Frances Evelyn Varney •
Elsa C. Olson	Vernon E. Waldron
Merlyn Esther Orcutt	Margaret Lucille Ward
Videa Pagnani	Elizabeth Weston
Anna S. Pappas	Velma Lovina Whitehouse
Luis Paragallo	Albert Widdop
Norma Lucille Pare	Emma Lucile Wight
Karin Emelia Peterson	Holly Marguerite Williams
Gladys J. Phillips	Janet Williams
Lewis J. Pierce	Jennie Menai Williams
Ruth Margaret Pinkham	Margaret Isobelle Williams
Linda Patricia Poluzzi	J. Herbert Wilson
Charlotte Frances Potter	Mary Zaporetski

(b) JUNE, 1933

417

Doris Abell	Kenneth Allen
Annie Alban	Adeline A. Ambler
Isabel Marie Allan	Thomas H. W. Ames
Bernard N. Allen	Edna L. Amet

Dorothy Agnes Anderson	Lloyd Edwin Craig
Dorothy Q. Anderson	Francis Adams Crocco
Fayette Reed Anderson	Helen Cushing
J. Harold Anderson	Harold H. Cushing
Leonora O. Armstrong	Ralph D. Cushing
Claude William Bailey	Sonia Cutler
Marjorie O. Bailey	Frederic Cutler
Ruth M. Bailey	Ernest Dahlquist
Alice Evelyn Baker	Jeanette Catherine Dailey
Lucille Ruth Baker	Anna Viola Danielson
Frances M. Barry	Ralph F. Davis
Richard F. Barry	Barbara Jean Dawber
Vincent J. Barry	Robert M. Delaney
Dorothy Elizabeth Batchelder	Romulus DeNicola
Harold C. Baumber	Curtis Derby
Marion G. Beausang	Charles M. deVarennes
Bertrand Earl Bennison	Richard S. Devlin
Marjorie Louise Bentley	Henry Herbert Dewar
Willard A. Berg	Martha Washington Dewey
Janet F. Berlo	Anne DiBona
Giovanna Biagini	Lucia DiBona
Agnes R. Bisset	Joseph A. DiLoreto
Harriet Constance Blinn	Mary M. DiRico
Robert E. Blowers	Edmund L. Dodd
Charles Knight Bodine, Jr.	Helen E. Donovan
Paul J. Bogert, Jr.	Gladys E. Doran
Edith Christine Booth	Christopher G. Dravis
Myrtle Elizabeth Bowen	Rita Genevieve Driscoll
Everett Joseph Bracchi	Thomas S. Duggan, Jr.
Lillian R. Brasslow	Arthur Edwin Dumont
Helen Frances Brigham	Mary B. Eddy
Madeleine Mason Browne	Elma E. Eko
Gertrude Clare Bryan	Richard D. Ekroth
Anne Frances Budrick	Natalie Toward Engley
Herbert Morton Bullock	May Ericson
Eleanor Earl Burt	Ruth M. Erikson
Marguerite Ethel Butler	Clare O. Ewing, Jr.
Laurence Clifton Cahoon	Lawrence J. Falvey
Stanley Winchester Call	Edith M. Ferguson
Catherine Jane Cannavo	Mildred A. Findlay
Helen Josephine Carey	Elizabeth Fisher
Dorothy Louise Carlson	Jeanie Francis Fisher
Walter John Carlson	Henri Andre Fluchere
Ruth Monica Cashman	Ruth Evelyn Foster
Marion C. Chambers	Isabella Mercer Fotheringham
Ruth M. Champeau	Arthur H. Fowler, Jr.
Philip T. Chase	Harriet New Fowler
Philip G. Cheney	Maude E. Francis
Mary Cirillo	Robert J. Freestone
Hugh Elliot Clancy	Marion C. Fuller
Paul Clancy	Harriet Galberg
Natalie Gibson Clark	Frances Nathalie Garrick
Eleanor Marguerite Clarkin	Catherine Mary Gill
Jack Vincent Clarkin	Helen Bell Gilmore
Nelson Clifford	Edward Goodman
William A. Coates	Phyllis Christina Goss
Louis Coffman	Robert Gould
Corinne Commass	Robert Brooks Graham, Jr.
Edna R. Cosgrove	Robert James Granahan
John D. Coyle	J. Louise Grant

Thelma M. Grant	Richard Keefe
Eva M. Grayson	Mary Kelley
Dorothy Anna Greene	Everett Webb Kennedy
Doris Mary Griffin	Joseph George Kennedy
Francis W. Griffin	Florence A. Kenney
Fabbio Grippi	Frank Kenney
Russell Vincent Guarcello	Roger T. Kenney
Dorothy Anna Gudas	Robert King
Genevieve Guilmartin	George Dunsford Klein
Cecilia Doris Gurhey	Emma Knight
Anthony Hagopian	Barbara Knowles
Laurence Marshall Hall	F. Melvin Knowles
Oscar A. Hallberg	Lucille Koons
Gertrude Hallisey	Robert Traynor Koritsky
Howard Marsden Harding	Alex von G. Kuhns
Virginia Anne Harrington	Gus Kuhns
Ruth M. Harris	Edwin Kujanpaa
Dorothy Cecilia Hart	Philip M. Kurlansky
Henry G. Harvi	Ruth Elizabeth LaHive
Willis Monerietff Hayden, Jr.	Virginia Mary Lake
J. Francis Haynes	Kenneth William Lavers
Donald F. Heffernan	Ruth F. Lear
Helmi K. Heikkinen	Leon Louis LeClair
Janet Patricia Hennessey	Gladys Williams Leonard
Frank Herlihey	John F. Leonard
Mary Hickey	Gertrude C. Leppala
Robert Higgins	B. Irene Lester
Edwina J. H. Hillstrom	Albert Littlewood
Paul H. Hollinshead	Agnes Louise Littlewood
W. Edward Howard	Annie Lochrie
Elwin T. Howard	William Lochrie
Dudley Francis Howe	Edwin A. Locke, III.
Helen Russell Howorth	Lodovico Lorito
Dorothie Place Huke	Muriel Lowell
Mary Elin Hunt	Margaret Elizabeth Lumsden
L. Charles Hutchinson	Francis John Lundy
Elbert W. Hutson	Robert Daniel Lyons
Aisla Hyslop	John McAllister
Harry Immar	Esther Ann McAskill
Walter Isaksen	Eleanor May McCarthy
Evelyn Mary Jack	Mildred Gertrude McCloskey
Paul Joseph Jacobs	Edward P. McConarty
Wendell Francis Jacques	Frank McCormick
Gunnar Frederic Jaukkuri	Margaret Alicia McCue
Albert B. Johnson	Virginia B. MacCurdy
Barbara Louise Johnson	William P. McEvoy
Ethel Johnson	Charles Johnson MacGibbon
Viola Johnson	Grace E. McIntire
Arthur W. Johnston	Donald E. MacKay
Charles G. Johnston	Edmund McKenney
Aili Ruth Jokinen	Herbert T. McKenzie
Norene E. Jones	James Alexander MacLachlan
Marion A. Jordan	Donald R. MacLennan
Thelma Kalberg	Bruce MacLeod
Ruth Frances Kateon	Christina May MacLeod
Edward N. Kaye	Hugh Woodrow MacLeod
Thomas C. Kearney	Margaret Ethel MacLeod
Elizabeth Keating	Mildred Esther MacLeod
John F. Keating	David MacLerie
Frances Keefe	

James Frederic McNamara	Esther Ada Pyyny
Marguerite M. McShane	John Edward Quinn
Leslie O. MacWilliams	Danea Ranalli
Jeanne Macomber	Frederick M. Rasmussen
Dorothy Southwick Malone	Perry Harris Rebello
Mary Elizabeth Mandeville	Robert P. Reed
Harold Sarkis Manuelian	John Leonard Reilly
Mary Ann Marini	Yvonne G. Richards
Reno Marini	Agatha Eleanor Richter
Evelyn Marion Mattson	John Eleanor Rigby
Elizabeth R. Mayer	Bernard Philip Rispin
Ugo Mazzei	John T. Roberts
Norman Louis Melville	Wardell H. Roberts, Jr.
Hazel Meyer	Doreen C. Robertson, Jr.
Mary Irene Mills	Howard Arnold Robinson
Phyllis Gertrude Moles	James Archie Ross
Frank Montuori, Jr.	Frank James Rusconi
George Howell Morgan	Daniel Thomas Ryan
James D. Mulcahey	Eugene Hollis Ryder
Francis L. Muldoon	Olga Salvucci
Harold Mulligan	Ralph Oulton Sanford
Barbara Emerson Mundi	Vincent Sangster
Muriel Florence Nason	Lena Santospirito
Ben Neill	Orrin B. Saunders
Elmer Torsten Nelson	J. Paul Schofield
Dorothy Olive Newcombe	Clara C. Schulze
Arthur Newton, Jr.	Isadore Schwartz
Phyllis Marie Newton	Edith E. Sealund
Lucy Rose Nobili	Lawrence H. Seggelin
Donald W. Noguera	Virginia Mae Sewell
John William Normington	Beatrice Amy Seymour
Evelyn Frances Norwood	Robert Franklin Sharp
John Frederick Oberg	Barney Shangold
Harry B. Odum	Leslie Robert Shaw
Esther Heduik Olsen	Rita I. Shea
Mildred Elizabeth Olsson	Martha A. Shearer
William Alfred Olson	Florence Elizabeth Shepard
M. Phyllis O'Mara	Philip Thomas Sheridan
Margaret O'Neil	Edna May Sherriff
Virginia M. Owen	Mary Phillips Sherriff
Gladys W. Palmer	Donald Eugene Shrader
Anna Marie Palmisano	Walter G. Shuttleworth, Jr.
Filomena M. Papagni	Sylvia Eleanor Siitonen
William K. Patterson	George Sisti
Winston A. Peacock	Albert H. Slate
Mary Elizabeth Peak	Agnes D. Smith
Julia Irene Pearce	Harry Smith, Jr.
Forrest Anthony Pease	Helen Evelyn Smith
Ellen Edith Peltó	James Alfred Smith
Leverett Alexander Peters	C. Robert Snyder
Andrew Hayden Peterson, Jr.	Constance Elizabeth Southworth
Henry John Peterson	Paul R. Spinney
Joseph Phelan	Jean N. C. Steele
Aino Kristiina Pitkanen	Helen L. Steele
Mary Grace Pitts	Lester Wilton Stephen
Charles S. Plummer	M. Ernestine Stevens
Ruth Grace Porthouse	Charles Adams Stevenson, Jr.
Lily C. E. Prest	Nettie Elizabeth Stevenson
Ida A. Priscella	Ruth Miller Stevenson
Alli Marion Puro	Evelyn Margaret Stewart

Arthur Szathmary

 David C. Wohlander
 Ina Claire Woodward
 Robert Burns Woodward
 Richard W. Wyman
 Edward Francis Young
 John Robert Young
 William Younie
 Michael Zinchuk

2. Graduates from the Home Making School

JUNE, 1933

20

Dorothea Virginia Andresen	Louise Emma Mattulina
Ada Morley Braman	Eileen Frances McNabb
Ida Mae Cameron	Katherine Teresa Morrill
Olga Ida Cassani	Emily Bell Rand
Antoinette Eleanor Componeschi	Carmela Salvucci
Beatrice Marie Deveau	Emma Elizabeth Smith
Irene Gertrude Donnellan	Helen Louise Smith
Catherine Deborah Hutchins	Mary Squatrito
Geraldine Esther Knight	Mary Jeanette Surette
Marion Elizabeth Lahey	Wilhelmina Barbara Timcoe

3. Graduates from the Trade School

JUNE, 1933

41

Auto Mechanic Department

Carl Albert Capone	Carl G. Ekholm
Angelo Christiano	Richard Loring Mitchell
Robert Lester Collins	Shirley John Peck
James H. Davey	Philip Ricci
Charles Del Longo	James J. Tantillo

Cabinet Making Department

Horace T. Brackett	Joseph C. Gonzalez
Edward A. Gioiosa	Clifton W. Locke

Electrical Department

Joseph Alfano
David F. Bresnahan
John L. Chiminiello
Joseph P. Conway

Alfred E. Davis
Hubert H. D'Hooge
Richard J. Nourse
James Robert Parsons

Machine Department

Andrew Biagini
Wendell F. Locke
Matthew F. Reera

William B. Sacchetti
Anthony J. Sangiolo
John J. Sawyer
Ernest Frederick Sears

Pattern Making Department

Wildred E. DeCoste

Antonio Di Bona

Plumbing Department

Rocco J. Della Barba

Frederick W. Young
John Frederick Youngworth

Sheet Metal Department

Arthur John Chella
James Kane
Peter J. Mastroianni

Robert E. Moore
Emil J. Nigro
Joseph J. Sullivan

Machine Co-operative Department

Hartlie Emerson Kelley

APPENDIX C

SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

1. Organization of Staff, December, 1933

Black face signifies attended without graduation

Attendance for less than one year at an institution is not noted

JAMES N. MUIR, B.S., Superintendent, University of Pennsylvania;
elected 1927

ALBERT H. COCHRANE, Ass't Superintendent, Harvard, A.B., Ed.M.;
elected 1925

Senior High School—Coddington Street

Teachers	Department	Where Educated	Date of Election
Ernest L. Collins.....	Principal	Bates College, A.B.....	1912
George A. Wilson.....	Asst. Principal, Biology, Industrial Mathematics.....	Massachusetts Institute of Technology, B.S..	1921
Mildred B. Harrison...	Dean of Girls.....	Wellesley College, B.A., George Washington University, M.A.....	1929
Felix V. Cutler.....	Social Science department..	Bates College, B.S., Harvard University, Ed.M	1926
Sally F. Dawes.....	English department.....	Radcliffe College, A.B., Middlebury College, A.M.	1913
Alfred T. Knapton....	Latin department.....	Hobart College, A.B., Harvard University..	1929
Leslie C. Millard.....	Commercial department....	Salem Normal, Boston University, B.B.A....	1925
Joseph W. Thomas....	Science department.....	Wesleyan University, A.B.,	1918
Clara E. Thompson...	Mathematics department...	Bridgewater Normal...	1892
Charles B. Thomson...	Manual Arts department...	1913
Victoria M. H. Zeller..	Modern Language department	Boston University, A.B	1911
H. Russell Albro.....	Business Organization, Prin. of Salesmanship....	Bay Path Institute, Boston University....	1925
Leland H. Anderson...	Mech. Drawing, Algebra....	Mass. School of Art, Lowell Institute.....	1923
Louise H. Baker.....	Physical Training.....	Temple University....	1928
Mary G. Barry.....	Stenographic Office Practice, Typewriting.....	Maltby School, Brown University	1927
Agnes E. Berry.....	Foods	Framingham Normal, B.S.	1932
Ruth S. Berry.....	English	Wheaton College, A.B.	1928
William Bowyer.....	Physical Training.....	Springfield Y. M. C. A. College	1928
Karl L. Briggs.....	Mathematics Review, Geometry, Solid Geometry, Trigonometry	Norwich University, B.S.	1931
Isabel S. Browne.....	English	Emerson College, Leland Powers School..	1921
Burdette H. Buckingham	Physics, Chemistry.....	Mass Institute of Technology, B.S.	1932
Helen F. Burke.....	Commercial Geography....	Bridgewater Normal, Boston University....	1910
Margaret L. Burns....	Bookkeeping, Accounting...	Boston University A.B., Harvard University..	1919
Vera Call.....	English	Smith College, B.A., Middlebury College, M.A.	1927

Senior High School—Coddington Street—Continued

Teachers	Department	Where Educated	Date of Election
Virginia E. Carville...	English	Radcliffe College, A.B., University of Wisconsin, A.M.	1930
Dana B. Clark, Jr. ¹	Fitchburg Normal....	1921
E. Louise Clark.....	Latin	Colby College, A.B., Harvard University, Ed.M.	1924
George S. Clark.....	Manual Training.....	Springfield Y. M. C. A. College	1920
Ruth F. Colclough....	Stenography, Typewriting, Business Organization....	Salem Normal	1920

2. SCHOOL CALENDAR FOR 1934-1935

<i>First Term</i>	<i>Vacation</i>
Wednesday, September 5, to	Friday, December 21, to
Friday, December 21	Wednesday, January 2
<i>Second Term</i>	<i>Vacation</i>
Wednesday, January 2, to	Friday, February 15, to
Friday, February 15	Monday, February 25
<i>Third Term</i>	<i>Vacation</i>
Monday, February 25, to	Friday, April 12, to
Friday, April 12	Monday, April 22
<i>Fourth Term</i>	
Monday, April 22, to	
Friday, June 21	

Senior High School Graduations: Wednesday, June 19.

Holidays Out During Year: Columbus Day, October 12; Thanksgiving, Wednesday noon (12:00) and remainder of week; Memorial Day, May 30; Bunker Hill Day, June 17.

REPORT OF ENGINEERING DEPARTMENT

To His Honor the Mayor and Members of the City Council:

GENTLEMEN:—I herewith respectfully submit the thirty-fourth annual report of the Engineering Department for the year ending December 31, 1933.

This department is called upon by almost every department connected with the City for some sort of engineering. During the course of the year the calls were so varied that it is practically impossible to itemize each request, but work done for some of the departments is as follows:

City Council

Plans and estimates were prepared for all projects brought before the City Council requiring public hearings, such as the taking of lands for street purposes, playgrounds, schools, etc.

All orders that were passed on the acceptance of streets and land takings were also prepared by this department. The City Engineer attends all meetings of the Council and its Finance Committee to furnish them with whatever information they desire in regards to costs of various projects proposed by them.

City Clerk

All plans for acceptance of streets and land takings are prepared and furnished to the City Clerk, who in turn places them on record with the Council Order. A copy of all reports on accidents is received from the City Clerk and immediately investigated by this department in preparation for any suit that may be brought against the City.

City Solicitor

The City Solicitor calls upon the Engineer to appear at any court action brought against the City to testify in his capacity. Descriptions of land takings for street widenings or any other municipal purposes are prepared by this department for the City Solicitor. The City Engineer makes contact with individuals whose property is taken and prepares all the information, together with a deed, for the takings and furnishes the same to the City Solicitor.

Tax Collector

Information is furnished upon request of the Tax Collector for street and sidewalk betterments on properties which are being checked up by attorneys or individuals; 306 of these requests were received during the year and information furnished. This department furnishes all descriptions on parcels of land that are to be advertised and sold for taxes. In 1933 there were approximately 4,000 descriptions furnished the Tax Collector.

Assessors' Department

Plans are prepared for the Assessors' Department and kept up to date so that their plans are complete as of April first, for assessing purposes. These plans show each parcel of land in the

City and the buildings thereon, together with the name of the owner and the area of the parcel.

A copy of the transfer of all properties is obtained from the Norfolk Registry of Deeds and the Norfolk District Registry of Land Court, from which changes on these plans are made. A copy of all the new building permits issued during the year are obtained from the Building Department, which are located and measured in the field and plotted on these plans. During the year there were approximately 3,500 transfers of ownership of properties requiring the time of one assistant most of the year making changes. As it is necessary to make considerable erasures on these plans their life is rather short. Approximately 100 new plans were made during the year.

Park Department

The Park Commissioners call upon this department to lay out the various playgrounds with baseball diamonds, soccer fields and football fields during the year.

The City of Quincy obtained Fore River Field and the Fore River Club House during 1932, and in the early part of 1933 remodelled the Club House in part, using labor obtained from the Citizens' Unemployment Bureau, with the City furnishing all materials. This Club House, which had become very much dilapidated, was repaired and put in very fine condition and has been used as a community center since its repair.

The stands were repaired and the fence removed that enclosed this field.

The field was very acceptable at this time, as the Ward 2 Playground has been used as a borrow pit during the year, otherwise this section would be without a public playground.

The filling in of the Montclair Playground was continued during the year, making quite a considerable area now available for use.

The property used for a water tower on Penn's Hill has been transformed from one of Nature's wildest locations into a beautiful landscape garden.

The wild brush was removed and in its place have been constructed paths, rock gardens, flower beds and retaining walls, making this one of the beauty spots of this section.

This work was all done by welfare labor under the supervision of Mr. Andrew Stewart, the City Forester.

Cemetery Department

The grading of the lower end of the Mount Wollaston Cemetery was continued during the year by welfare labor.

Several sections were laid out into lots by this department during the year.

Building Department

All applications for a permit to build or move any building in the City are referred to this department to establish the grade at which such building shall be constructed.

This work is personally done by the City Engineer, who visits each site before establishing the grade.

The purpose of this is to eliminate the construction of buildings so low that it is impossible to connect the same with sewer and drain. Also to see that the alignment with other structures is adhered to.

This section was added to the Building Ordinance in 1929 and has been a great benefit to both the City and the owners.

An additional charge of two dollars is made for this service, and during the year 185 applications were inspected, which amounted to \$370.00, which was deposited with the Treasurer as receipts of the Engineering Department.

Lines and Grades

Lines and grades are given to property owners on accepted streets upon request. These requests generally are made when an owner is contemplating grading his property or building a wall or fence. The usual number of requests were made and lines and grades given.

Sewers

The sewers that are constructed in the City are planned and laid out by this department. During the year 3.18 miles of main sewer was constructed, for itemized list of these sewers see Commissioner of Public Works Report under Sewer Division.

The installation of sewers in Squantum was continued, the main line along the shore on the east side was extended to Huckins Avenue with all intersecting streets connected to the same.

Sewers were extended from Bates Avenue to Quincy-Milton Heights, which includes Shawmut Street, Gridley Street, Emerald Street and Ferriter Street. This required a main line through private lands to reach these streets, making it necessary to construct through a great deal of ledge and bowlders.

A main line was extended from Des Moines Road through private lands to connect with Charlesmount Avenue, Burns Avenue and South Street.

These streets have had the sewer installed for sometime but have not been available for use.

All sewers were constructed by the Sewer Division of the Public Works Department under the supervision of Walter S. McKenzie, superintendent.

The total main sewers in place in the City to date is 143.218 miles.

Surface Drains

There were 1.882 miles of storm water sewer installed during the year varying in sizes from 8" to 60".

The most important of these was the piping of Sachem Brook from Billings Road to Rawson Road with a 60-inch concrete pipe. Another of importance was the installation of a drain in Glencoe Place to Scammell Street.

For itemized list see schedule attached.

All drains were constructed by the Sewer Division of the Public Works Department with concrete pipe.

The work of compiling plans of the drains that have been installed was continued during the year and will be quite an asset to the City when completed.

Accepted Streets

There were 20 streets accepted during the year, making a total length of 3.297 miles.

For itemized list see schedule attached.

Owing to the difficulty of obtaining finances these streets were not built but will be ready for the program of 1934.

Fenno Street and Rice Road were subgraded and widened to fifty feet by labor received from the Citizens' Unemployment Bureau and the Welfare.

The public-spirited citizens of Quincy contributed to this Bureau to give men and women out of employment an opportunity to work. The City furnished all materials and equipment for work done by this labor.

In 1932 streets were accepted but not constructed; the majority of these were subgraded during 1933.

For itemized list see schedule attached.

Street Widenings

There were no major street widenings during the year.

The Southern Artery between South Street and Quincy Avenue was widened by labor furnished by the Citizens' Unemployment Bureau. The bank at this location was cut back twenty feet.

Rebuilt Streets

As there were no appropriations for rebuilding streets there was no program during 1933.

Granolithic Sidewalks

No appropriation was made by the City Council for granolithic sidewalks as they felt the owners of property would not want an additional assessment.

This is the second year that there has been no program on this type of sidewalk.

Asphalt Sidewalks

This type of sidewalk has become quite in demand in the past few years, which is probably due to the reason that there is no betterment assessed for it.

During the year 6.75 miles of this type of sidewalk was constructed. For itemized list see schedule attached.

Duplicate Street Name Changes

The Board of Survey held several hearings on duplicate street names, and during the year 72 street names were changed.

All owners were notified and all city plans and records were changed.

As the City Engineer is Clerk of this Board, all of this work was done by this department.

P W A

President Roosevelt's Public Works Program was announced in July, and after several inquiries for information pertaining to this program application was made for loans and grants on sewer construction, surface drainage, streets and sidewalks.

The City Council authorized the borrowing of about \$750,000 to take part in this program.

Several conferences were held with the State and Federal Boards controlling this program.

The efforts of this department were concentrated on the sewer and surface drainage of this program. Surveys and plans are now well under way in anticipation of starting this work about April first, 1934.

The Sewers to be installed are at Adams Shore and the Willows Section of Houghs Neck. The Metropolitan Sewer Commission has completed the new Pumping Station at Lee Street, which will

accept the sewerage of these two sections together with Weymouth and Braintree.

Extension of the Squantum System is also included.

The drainage program will include the piping of Montclair Brook from West Squantum Street to Sagamore Creek, the covering of Town Brook from Fort Square to Liberty Street through Brook Road, eliminating this Brook through the Henry L. Kincaide Playground and the John Hancock School Yard and the construction of a new culvert under Adams Street at the Furnace Brook.

These projects will help to relieve the unemployment situation during 1934.

C W A

The Federal Government created the Civil Works Program on November 16, 1933, to assist in relieving the unemployment situation until the P W A Program was under way.

The Federal Government furnished the labor and part of the materials on Public Works Projects that could be completed by February 1, 1934.

The City of Quincy was allotted \$200,000 for this program, and Mr. Roland Broberg, the Welfare Commissioner, was appointed as Administrator for Quincy.

All employees were assigned by the Federal Employment Bureau to these projects.

Projects had to be submitted to the State C W A officials at Boston for approval, which took considerable time as all municipalities in the State were making application at the same time.

For list of projects approved see attached schedule.

This was an emergency relief program and required work to begin immediately to relieve the unemployed.

The City of Quincy was able to increase its quota to about \$375,000 by its willingness to co-operate. The total appropriation for the State had to be assigned within a short period of time, so when any municipality did not apply for their full quota this balance was assigned to other cities and towns who would submit additional projects.

This work is well under way and will help the City both materially and financially.

I wish at this time to extend my appreciation for the co-operation I have received from his Honor the Mayor, Members of the City Council, City Officials and the personnel of this department during the past year.

Respectfully submitted,

WALLACE S. CARSON,
City Engineer.

REPORT OF COMMISSIONER OF PUBLIC WORKS

Dear Sir:

The report of the Public Works Department for the year 1933, excluding the Sewer and Water Divisions, which appear separately, is respectfully submitted herewith. May I at this time pay my compliments to the efficient cooperation that has been extended by James P. Donovan, Superintendent of Streets; John G. Whitman, Superintendent of the Water Department, and Walter S. McKenzie, Superintendent of the Sewer Department.

Respectfully yours,

ANGELO P. BIZZOZERO,
Commissioner.

Highways

Because of the urgency of economy in 1933, the activities of the department were carried along without the benefit of special appropriation and construction loans. In addition, it was necessary for the department to provide from its regular maintenance appropriation, tools, equipment and supervision for the men engaged in the relief programs that were designed to give the city tangible benefits for the outlays it was called upon to make.

The appropriation expenditures of the highway department were as follows:

Salaries and Wages	\$166,864 38
Pensions	13,167 44
Auto Maintenance	8,998 72
Equipment Rentals	27,499 00
New Equipment	1,060 29
Garages and Stable Expense.....	11,662 04
Sidewalks	18,917 91
Brooks	2,668 51
Bridges	4,580 41
Street Signs	4,364 60
Street Oiling	4,951 70
Street Lighting	107,890 71
Street Building	2,150 41
Maintenance material and General Ex- pense	28,933 35
TOTAL	\$403,703 47

For the detail of expenditures, references is made to the report of the Auditor of Accounts. The expenditures under the appropriations for wages, equipment rentals and maintenance material were primarily for street cleaning, patching and more extensive street repairs, snow removal, drainage and gutter maintenance. In addition there was the general upkeep of street parks, public landings, the Granite Street parking area, and sea walls.

Substantial expenditures were made as has already been mentioned for materials, equipment and supervision in connection with

the relief program for the construction of Fenno Street and Rice Road, the cleaning of Faxon Park, and for the painting and grading of Woodward Institute. Material and equipment were provided in connection with the following Civil Works Projects: Merrymount Park roadway, Faxon Field grading, grading of the Daniel Webster school grounds, and the Victory Park playground.

Balances available for the completion of the 1932 streets were far from sufficient. The department assumed the cost of labor, while material and equipment were charged against the balance of the special appropriation in the completion of the following list of streets:

Amesbury Street	Holbrook Road
Bayview Street	Lancaster Street
Belmont Street	Oak Street
Bowdoin Street	Raycroft Street
Bryant Avenue	Sunnyside Road
Clement Terrace	Victory Avenue
Dayton Street	Wesson Avenue
Elliot Avenue	West Street
Elmwood Avenue	Westford Street
Gilbert Street	

Of the 1931 streets, Pilgrim Road was completed and trees planted.

No general program of street rebuilding was undertaken, but widenings were effected at the following locations:

Quincy Avenue and Southern Artery
Granite and Whitwell Streets
Hill and Mound Streets
Water and Franklin Streets
South Walnut and Sumner Streets
Vassal Street and Rawson Road
Payne and Elliot Streets

Sidewalks

A total of 6.75 miles of asphalt sidewalks were laid during the year, both with highway department labor and in conjunction with Civil Works Projects. The streets on which such sidewalks were constructed were as follows:

Albatross Road	Highfield Road
Alton Road	Independence Avenue
Belmont Street	Longwood Road
Berkley Street	Lurton Street
Birch Street	Marshall Street
Chestnut Street	Moore Street
Chubbuck Street	Park Avenue
Colby Road	Pelican Road
Copeland Street	Penn Street
Cottage Avenue	Presidents Avenue
Dale Avenue	Revere Road
Dixwell Avenue	South Street
Farnum Street	Station Street
Federal Avenue	Taber Street
Foster Street	Washington Street
Franklin Street	Walnut Street
Hancock Street	Water Street

Gravel walks were constructed under Civil Works Projects on the following streets:

Des Moines Road
Faxon Park Road
Gridley Street

Rockland Street
Shawmut Street
Weymouth Street

In addition sidewalk repairs were made on both granolithic and asphalt walks, as follows:

Bass Street
Beale Street
Belmont Street
Briggs Street
Brooks Street
Davis Street
Elm Avenue
Grand View Avenue
Highland Avenue
Lincoln Avenue
Maple Street

Marion Street
Marlboro Street
North Central Avenue
Park Street
Phillips Street
Pine Street
Prospect Avenue
Safford Street
Washington Street
Waterston Avenue
Winthrop Avenue

For specific location and yardage refer to City Engineer's report.

Brooks

Brooks have been regularly patrolled and tide gate repaired. Relocation of Sachem Brook through Hamden Circle, Willett, Woodbine and Brooks Streets to North Central Avenue is underway and should be completed in 1934. The section from Rawson Road to Billings Road has been piped and back filled and street grading is in progress. Along the open stretches this brook has been a source of great annoyance to the abutting property holders and its diversion will abate all further nuisances.

Bridges

In addition to the maintenance of Fore River Bridge as assessed by the trustees, the following bridges have been repaired:

Post Island, where the foundation had been undermined; Merry-mount Park, Cross Street, Bates Avenue, and Ward Three Playground.

A temporary bridge will be a preliminary to the construction of a permanent bridge at Fore River. This construction will be by the state, thus eliminating further assessments on the city for the maintenance of the Fore River Bridge.

Signs

One thousand and nine signs of various designs were made during the year. One hundred and twenty concrete stands for signs were moulded and installed. In addition all street traffic markings were drawn and painted.

Street Lighting

Following a survey, numerous changes in street lighting were made in the interests of economy. The electrical service at Wollaston underpass was renewed, and illumination given football fields and winter sports activities.

The changes were:

	Dec. 31 1932	Dec. 31 1933	Cost per year
600 C.P.	7	7	\$76 50
600 C.P.	491	282	67 50
400 C.P.	353	554	49 98
250 C.P.	319	222	39.96
40 C.P.	1,858	1,868	15 00
100 Watt	2	2	30 12
100 C.P.	—	122	19 98
600 Twin	116	116	71 04
600 Single	53	53	91 50
600 Special	2	2	67 50
400 Watt	8	8	73 98
250 Watt	12	12	63.96

Miscellaneous:

Beacon—100 Watt	20	19	30.12
Spotlight—300 Watt	5	5	54 00
Flood Light—600 Watt.....	6	4	67 50
Cross Road Signals—40 C.P.....	1	—	15 00
Caution Lights—40 Watt.....	3	—	13 14
Caution Lights—25 Watt.....	8	4	8 52
Traffic Units—60 Watt.....	{ 43	96	D. Rate
	{ 77	—	
Base Lights—25 Watt.....	10	10	8 10
Fire and Police Signals—60 Watt	31	38	18 00
	3,425	3,424	Per Mo.
Gas Lights	13	13	25 29
	3,438	3,437	

Public Buildings

A total of \$20,449.84 was expended for the maintenance of public buildings, and the care and repair of City Hall. Included in this was the remodeling of the assembly hall at the Fore River Club House and repairs to the roof of the building.

Sanitary Department

Expenditures for the sanitary division, under the direction of John W. Ross, amounted to \$122,449.29, as detailed in the report of the Auditor of Accounts. The amount expended for wages was as follows:

Collection of Garbage.....	\$53,312 85
Collection of Ashes.....	36,967 96
Scavenger Work	1,865 11
Vacations	2,782 00
Wash House	417 39
Abating Nuisances	390 00
Total	\$95,735 31

In addition to a total of 15 city-owned trucks, equipment was hired from time to time, with a total expenditure of \$2,571.91, distributed as follows:

Garbage Collection	\$1,836 76
Ash Collection	735 15

The revenue from garbage disposal was \$4,697.50.

Gypsy Moth and Forestry

Gypsy moths have been suppressed, public gardens maintained and the department has supervised and equipped a corps of men which made available to the welfare department several thousand cords of wood, permission to make the cutting being given by the owners: Henry M. Faxon, Harry L. Rice, David Silverman and John A. Clarke. All of these activities were under the direction of Andrew Stewart, whose expert knowledge of forestry has been of value to the city.

Equipment

The motor equipment of the department, particularly in the Highway and Sanitary Divisions, is entirely inadequate. Much of it is obsolete, and other pieces are too light for the work that they are called upon to do. As a result the expenditures for maintenance and upkeep are excessive.

I wish to recommend at this time that next year serious consideration be given to replacing a substantial amount of this equipment that the activities of the department may be carried out on an economical basis.
